A Management Odyssey-J. M. Haas 1994 The Royal Dockyards were Britain's oldest state enterprise and biggest and most complex industrial unit. This book shows how the Admiralty over two centuries struggled to master the intractable problems of organization and management which the dockyards presented. Haas maintains that the dockyards portrayed an image of being inefficient, high-cost producers. These problems were chiefly extreme centralization but, paradoxically, weak control, inadequate coordination of departments, and accounting procedures, unreliable information about production, costs and material, an insufficiently educated and professionalized constructive corps, and an underpaid and slack workforce. In addition, he contributed to the improvement of coronary angiography and fallopian tube catheterization. The book also describes the author's role as the lead person in establishing the Dotter Interventional Institute in 1990. The Institute was the first freestanding, independent interventional radiology unit to deal with education, research, and patient care. The Days of the Warlords-Paul A. Blaum 1994 This book, while it deals primarily with civil conflicts between the Byzantine Emperor Basil II and the warrior-aristocrats Bardas Phocas and Bardas Sclerus, casts considerate light on Christian-Muslim relations in the Middle East during the century immediately preceding the crusades. These interactions-sometimes hostile, sometimes surprisingly intimate-occurred during that one period between the mid-tenth and mid-eleventh century when Shi'ite Islam, not Sunni Islam, dominated the Muslim world. The ethnic and secretarian fragmentation that marks present-day Islam was already well in place at the end of the tenth century.

The Human Odyssey-Paul S. Kaplan 1992 Integrating developmental principles into a lifespan perspective, this chronologically organized text presents theory, up-to-date research, issues, and applications. Paleoamerican Odyssey collects thirty-one studies presented at the 2013 conference by the same name, hosted in Santa Fe, New Mexico, by the Center for the Study of the First Americans at Texas A&M University. Providing an up-to-date view of the current state of knowledge in paleoamerican studies, the research gathered in this volume, presented by leaders in the field, focuses especially on late Pleistocene Northeast Asia, Beringia, and North and South America, as well as dispersal routes, molecular genetics, and Clovis and pre-Clovis archaeology.

Integrated Pest Management for Collections-Peter Winsor 2011 Integrated pest management (IPM) is not a static approach but one that is constantly evolving. Mass international travel, climate change and other factors contribute to the spread of new pests, and the pests themselves are constantly seeking out weaknesses in our defences. An understanding of the threats pests pose to collections and the necessity for a systematic approach to combat them is now firmly embedded in the work of collection care practitioners. In addition, the trustees and sponsoring bodies of collecting institutions recognise that it is a significant and cost-effective element of good collections management. 2011: A Pest Odyssey, 10 years later describes examples of how the IPM approach has been adopted by large and small institutions around the world, and highlights the many lessons learned along the way. Principal among these is never to become complacent and tied down to routine processes. Another important lesson is the need to ensure colleagues understand and are involved with the process of pest management. There is also a need to understand the wider implications of any pest control activity, for example the effect of chemical treatments on DNA. Coming out of the second Pest Odyssey conference, this book will promote wider understanding and implementation of IPM as an integral part of any collection management programme. The organisers and editorial team hope that everyone involved with the care of cultural heritage collections and buildings will find something of interest and value in this work.
