who Chose to Reduce Their Risk-Andrea

Patenaude 2012-01-16 This book presents the candid stories of women at high hereditary risk of breast cancer who chose to have their breasts surgically removed while they were still healthy, rather than risk getting the cancer that had, in many cases, devastated others in their family.

- Comprehensive information on how women fare emotionally and interpersonally after this life-altering surgery
- Interviewed as part of a study funded by the Department of Defense Breast Cancer Research Program and the National Human Genome Research Institute
- Every case reveals the ramifications of each individual's difficult but potentially life-saving decision

The Praeger Handbook on Women's Cancers: Personal and Psychosocial Insights-Michele A. Paludi 2014-05-28 Written by experts in psycho-oncology, this book synthesizes the findings of the latest research on women's cancers to empower women to make informed choices about treatment options.

- Presents up-to-date research on women's cancers and current information about diagnoses and treatment options
- Considers women's cancers from a family

systems perspective that recognizes the impact of women's cancers on loved ones and offers strategies for these related challenges, such as how to address the topic of cancer with children

- Provides readers with information on how to prevent and deal with cancer discrimination in the workplace as well as guidance for employers
- Includes an appendix with information about organizations focused on women's cancers and healing

Astrological Insights into Personality-Betty Lundsted 2004-09-01 This down-to-earth exploration of natal chart interpretation shows the familial, male-female patterns in the zodiacal signs and the potentials they hold in combination with planetary energies and house symbolism. Our personalities are strongly influenced by what was happening around us when we were infants and whether our needs were met. Lundsted explains that our natal chart is our parent's transit chart, therefore revealing the truth of our childhood family dynamics. Once we understand these dynamics, Lundsted helps us move beyond

laying blame on our parents by identifying the compensating strengths revealed in the chart. She also shows us that the typically classified difficult or hard aspects in the chart actually hold the key to our transformation.

Mom's Cancer-Brian Fies 2011-07-01 Each year, approximately 1.5 million people in the United States and Canada are diagnosed with cancer. This is one family's story. Winner of the 2005 Eisner Award in the category of Best Digital Comic for the original Web version, Mom's Cancer is now available as a graphic novel. An honest, unflinching, and sometimes humorous look at the practical and emotional effect that serious illness can have on patients and their families, Mom's Cancer is a story of hope—uniquely told in words and illustrations. Brian Fies is a freelance journalist whose mother was diagnosed with lung cancer. As he and his

two sisters struggled with the effects of her illness and her ongoing recovery from treatment, Brian processed the experience in his journal, which took the form of words and pictures. The story that came to be known as “Mom’s Cancer” first gained notice on the internet. It was posted anonymously, with the intention of sharing information and insights gained from his family’s experience. Thanks to the words and illustrations of Brian Fies, readers have already responded that they were surprised and gratified to realize that they weren’t alone. Abrams ComicArts is proud to bring this story to a whole new audience.

Coulda, Shoulda, Woulda-Kenna P. Marriott  
2013-06-05 Jeannine Mongelli was forty years old when she was diagnosed with breast cancer. After a two year battle and a short remission, the cancer metastasized in her backbone. It was aggressive and incurable. In Coulda, Shoulda, Woulda, author Kenna P. Marriott, Jeannine's mother, shares her daughter's intimate story. It weaves both mother's and daughter's perspectives, feelings, and points of view to show

the impact of cancer on the patient and the family. Coulda, Shoulda, Woulda follows Jeannine from just before her breast cancer diagnosis and through the next seven and a half years. It reveals the progression of her illness, the milestones that held the greatest lessons, and Marriott's response as a loving mother. It covers the end of Jeannine's struggle and what happened after her death, because the story doesn't end there. Enlightening and inspiring, Coulda, Shoulda, Woulda presents both a tribute to Jeannine and a self-help guide to assist other patients and families who are facing the challenges of dealing with a life-threatening illness or struggling with loss and death. This memoir reveals one woman's battle with cancer so others understand what she endured and get a glimpse of what they might encounter. It communicates that catastrophic illness is not just one person's disease; it impacts everyone who cares about them.

A Mother's Smile-Kristopher James 2015-11-12  
When his mother was diagnosed with metastatic pancreatic cancer, author, speaker, and producer Kristopher James looked for a book to help support him through the turbulent emotional times waiting for him ahead. When he was unable to find such a book, Kristopher knew he had to write it himself. So, after his mother succumbed to the terrible disease thirteen months later, Kristopher used the extensive journals he'd kept during her struggle and after her death to help others going through the same overwhelming grief and helplessness. Culled from his meticulously kept chronicles, A Mother's Smile provides an honest look at the devastation cancer wreaks on individuals and their loved ones-and provides comfort and solidarity amidst

the pain and sadness. Kristopher draws on his own experiences with his mother to provide helpful, universal guidance for the practicalities of dealing with a cancer diagnosis and aftermath. He assures readers they are not alone-that though the world seems like it is ending, they can find the strength to keep moving forward through the heartache to a place of hope and peace.

In The Stars Part II: Cancer-Sagittarius-Debbie McGowan 2014-06-01 "You must learn to look beyond the evidence. It shows only what you wish to believe is real, not what you really wish to believe." Doubt that the sun doth move; Doubt truth to be a liar, But never doubt I love... (Hamlet, Shakespeare) The Circle is in flux. It's been a hectic six months, and as the friends head into the heat of summer, more trials await that

will truly test the bonds of friendship. For whilst a circle may contract and may even at times constrict, it can also expand, accommodate, embrace. And it is always whole. Eternal. Set over a period of six months (July–December), In The Stars Part II continues to explore the day-to-day lives of The Circle—nine friends from high school, now in their late thirties—following them through a year of celebration, loss, illness and life-changing decisions. In The Stars Part II is Season Five in the Hiding Behind The Couch Series. This book is also available as six separate episodes. The story follows chronologically from In The Stars Part I (Season Four) and Breaking Waves (Novella). It continues in A Midnight Clear (Novella), Red Hot Christmas (Novella) and Two By Two (Season Six). For those readers unfamiliar with the series, In The Stars Part I re-introduces the main characters, so you could pick it up from there and perhaps catch up with the previous books later. \*\*\*\*\* WARNING: this story contains intimate (moderately explicit) scenes between consenting opposite sex (F/M) adults. \*\*\*\*\* What readers say about the

Hiding Behind The Couch Series: “The remarkable characterisation in these novels is what makes them for me.” “This story reminds me of my favorite movies about friendship and relationships.” “Few authors have explored the depths of longtime friends within a group, or ‘circle’ the way Debbie McGowan has!” “The way the author deals with the complexities and issues in these books is delicate and compassionate, but with a matter-of-fact-grit that smacks of reality.” I Am Not My Breast Cancer-Ruth Peltason 2008-09-16 I Am Not My Breast Cancer gathers the warm, loving, frank, and informed voices of more than eight hundred women—from every state in the nation and from continents as far away as Australia and Africa—who reveal their fears, trade advice, share experiences, and express their deepest, most intimate concerns. Essential reading for any woman with this diagnosis, it offers the companionship of other women dealing with this disease. Taking the reader chronologically through the stages of diagnosis, treatment, recovery, and self-discovery, I Am Not My Breast Cancer offers

women a deeper understanding of themselves and living with cancer.

Body Betrayed Beauty-NEHA GANJU. TANNA 2019-10-14 One moment, Neha Ganju Tanna was a happy new mother to a beautiful baby girl. The next, she was a terminal cancer patient. Neha refused to let her diagnosis define her. Body Betrayed Beauty is a compilation of her writings near the end of her life. Through her insight and advice, Neha left an important legacy for the ones she left behind. In this memoir, the author shares how she was able to enjoy her life despite knowing her end. Much of Neha's memoir is directed to her daughter. She describes cherished memories with her new baby girl and offers her insight into all the challenges of growing up. Neha also shares the everyday challenges of being a cancer patient and the need to raise awareness of the insidious disease. Finally, she delves into her own ideas about the nature of God, family, and identity. Each new page reveals a fascinating new facet of an amazing woman and a new lens through which we should view our own lives.
