Pediatric Hypertension-Ronald J. Portman 2004-06-12 The importance of hypertension in children and adolescents is becoming increasingly recognized by physicians and scientists in the 21st century. However, in contrast to the attention that hypertension has received in the adult population for the past three decades since the first Joint National Committee (JNC) report, research and clinical knowledge that involves hypertension in children is still very much in its own childhood. Pediatric Hypertension, edited by Drs. Portman, Sorof, and Ingelfinger, is undoubtedly the most up-to-date and clinically relevant contribution to the field of hypertension in children available because it brings together the numerous pathophysiologic, diagnostic, and therapeutic advances in the evaluation of high blood pressure in infants, children, and adolescents. The editors have carefully organized their volume into sections that cover blood pressure regulation in infants and children, blood pressure measurement issues, pathophysiology and clinical assessment for essential and secondary forms of hypertension during childhood, and nonpharmacologic and pharmacologic approaches to the treatment of hypertension in children.

Bases of Adult Attachment-Vivian Zayas 2015-01-08 A great deal is known about how infants form attachments, and how these processes carry over into adolescence. But after that, the trail grows cold: the study of adult attachment emphasizes individual variations, paying little attention to the normative mechanisms of adult bonding. A much-needed corrective, *Bases of Adult Attachment* examines this under-investigated topic with an eye toward creating a robust theoretical model. The first volume of its kind, its multilevel approach integrates current findings from neuroscience and psychology to analyze the processes by which adult relationships develop, mature, function and dissolve. Here in relevant detail are factors contributing to initial attraction, possible scenarios in the evolution from friendship to attachment and the changes that occur on both sides of a relationship as partners mutually influence each other's behavior, emotions, cognition and even physiology. And expert contributors address long-neglected questions in the field with stimulating topics such as: The distress-relief dynamic in attachment bonding. An expectancy-value approach to attachment. The biobehavioral legacy of early attachment relationships for adult emotional and interpersonal functioning. How early experiences shape attraction, partner preferences, and attachment dynamics. How mental representations change as attachments form. Insights into the formation of attachment bonds from a social network perspective. *Bases of Adult Attachment* will interest scholars approaching adult attachment at multiple levels of analysis (neural, physiological, affective, cognitive and behavioral) and from multiple perspectives. This wide audience includes developmental, social and cognitive psychologists as well as neuroscientists, neuropsychologists, clinicians, sociologists, family researchers and professionals in public health and medicine.

Friendship and Happiness-Melikşah Demir 2015-04-09 This is the first book that explicitly focuses on the relationships between various types of friendship experiences and happiness. It addresses historical, theoretical, and measurement issues in the study of friendship and happiness (e.g., why friends are important for happiness). In order to achieve a balanced evaluation of this area as a whole, many chapters in the book conclude with a critical appraisal of what is known about the role of friendship in happiness, and provide important directions for future research. Experts from different parts of the world provide in-depth, authoritative reviews on the association between different types of friendship experiences (e.g., friendship quantity, quality) and happiness in different age groups and cultures. An ideal resource for researchers and students of positive psychology, this rich, clear, and up-to-date book serves as an important reference for academicians in related fields of psychology such as cross-cultural, developmental and social.

The Making of James Agee-Hugh Davis 2008 Wildly productive during his short life, James Agee (1909-1955) is today perhaps best remembered as a novelist-his posthumously published *A Death in the Family* won a Pulitzer Prize in 1958-but he was also a poet, screenwriter, journalist, essayist, book reviewer, and movie critic. In *The Making of James Agee*, Hugh Davis takes a comprehensive look at Agee's career, showing the interrelatedness of his concerns as a writer. A full view of Agee's oeuvre, Davis argues, illuminates its deeply political nature as well as a debt to various sources, particularly European surrealism, that have been little noted by previous Agee scholars. Davis challenges the view of Agee that has persisted since his death-that he is best understood primarily as a romantic individualist at odds with convention and the literary mainstream-and argues that this myth was largely constructed by friends and associates who were so immersed in the tenets of modernism that they distorted Agee's work (and aesthetic intent) in an attempt to purify it in modernist terms. In revealing a writer of far greater complexity than the Agee myth allows, Davis explores, for example, the leftist poetry that Agee wrote in the 1930s, which was almost completely suppressed by his editors. He also throws a fresh light on Agee's collaboration with photographer Walker Evans on *Let Us Now Praise Famous Men* and reevaluates *A Death in the Family* in light of recent scholarship that has produced an almost entirely new version of the novel,

one much closer to Agee's original intentions. A much-needed corrective to the many misconceptions about Agee, Davis's study is a provocative and lucidly written work that is certain to spark new dialogues about one of the most fascinating figures in twentieth-century American literature.

The Great Movies-Roger Ebert 2003 Presents a collection of essays that combine history, analysis, and love for movies covering such films as "All About Eve," "Casablanca," "Lawrence of Arabia," and "Schindler's List." Understanding Foreign Policy Decision Making-Alex Mintz 2010-02-22 Understanding Foreign Policy Decision Making presents a psychological approach to foreign policy decision making. This approach focuses on the decision process, dynamics, and outcome. The book includes a wealth of extended real-world case studies and examples that are woven into the text. The cases and examples, which are written in an accessible style, include decisions made by leaders of the United States, Israel, New Zealand, Cuba, Iceland, United Kingdom, and others. In addition to coverage of the rational model of decision making, levels of analysis of foreign policy decision making, and types of decisions, the book includes extensive material on alternatives to the rational choice model, the marketing and framing of decisions, cognitive biases, and domestic, cultural, and international influences on decision making in international affairs. Existing textbooks do not present such an approach to foreign policy decision making, international relations, American foreign policy, and comparative foreign policy.

Intimacy-Martin Fisher 2012-12-06 Intimacy is a complex and heterogeneous concept that has generated a variety of definitions, theories, and philosophies over the years. Although there is much disagreement about the essential meaning of the term, there seems to be a consensus that intimacy, whatever it may be, is of central importance in human relationships, and specifically, in the theory and practice of psychotherapy.

One approach to intimacy focuses on an intrapsychic conception. Intimacy occurs when an individual achieves full self-knowledge, and is fully in touch with his or her feelings and wishes. From this viewpoint, an intimate act occurs when a person is willing to share these feelings and wishes with another, so that self-disclosure becomes an important index of intimacy. This definition also implies that intimacy need not be reciprocal, so that a therapeutic relationship can achieve a good deal of intimacy without the therapist engaging in self-disclosure. An alternate approach to intimacy stresses the interpersonal nature of the concept. Intimacy is seen as the product of an interaction, and can only occur between people. Each one is able to touch something meaningful in the other, whether at a conscious, behavioral level or an unconscious and inferential level. Therapists seeking intimacy in these terms would probably be a good deal more active, and consider it more important to reveal something of the substance of their own persons, if not the facts of their lives.

The Politics of Fear-Michiel Hofman 2017-01-05 The 2014-2015 Ebola epidemic in West Africa was an unprecedented medical and political emergency that cast an unflattering light on multiple corners of government and international response. Fear, not rational planning, appeared to drive many decisions made at population and leadership levels, which in turn brought about a response that was as uneven as it was unprecedented: entire populations were decimated or destroyed, vaccine trials were fast-tracked, health staff died, untested medications were used (or not used) in controversial ways, humanitarian workers returned home to enforced isolation, and military was employed to sometimes disturbing ends. The epidemic revealed serious fault lines at all levels of theory and practice of global public health: national governments were shown to be helpless and unprepared for calamity at this scale; the World Health Organization was roundly condemned for its ineffectiveness; the US quietly created its own African CDC a year after the epidemic began. Amid such chaos, Médecins sans Frontières was forced to act with unprecedented autonomy -- and amid great criticism -- in responding to the disease, taking unprecedented steps in deploying services and advocating for international aid. The Politics of Fear provides a primary documentary resource for recounting and learning from the Ebola epidemic. Comprising eleven topic-based chapters and four

eyewitness vignettes from both MSF- and non-MSF-affiliated contributors (all of whom have been given access to MSF Ebola archives from Guinea, Sierra Leone, and Liberia for research), it aims to provide a politically agnostic account of the defining health event of the 21st century so far, one that will hopefully inform current opinions and future responses.

Karl Marx: Man and Fighter (RLE Marxism)-Boris Nicolaievsky 2015-04-24 Strife has raged about Karl Marx for decades, and never had it been so embittered as at the time of this book's first publication, 1936. Marx had impressed his image on the time as not other had done. To some he was - and still is - a fiend, the arch-enemy of human civilisation, and the prince of chaos, while to others he is a far-seeing and beloved leader, guiding the human race towards a brighter future. The arena in which Marx was fought about in 1936 was in the factories, in the parliaments and at the barricades. In both camps, the bourgeois and the socialist, Marx was first of all, if not exclusively, the revolutionary. This book sets out to describe the life of Marx the fighter.

Southland--Nina Revoyr 2008-04-01 "[A]n absolutely compelling story of family and racial tragedy. Revoyr's novel is honest in detailing southern California's brutal history, and honorable in showing how families survived with love and tenacity and dignity." --Susan Straight, author of Highwire Moon Southland brings us a fascinating story of race, love, murder and history, against the backdrop of an ever-changing Los Angeles. A young Japanese-American woman, Jackie Ishida, is in her last semester of law school when her grandfather, Frank Sakai, dies unexpectedly. While trying to fulfill a request from his will, Jackie discovers that four African-American boys were killed in the store Frank owned during the Watts Riots of 1965.

Along with James Lanier, a cousin of one of the victims, Jackie tries to piece together the story of the boys' deaths. In the process, she unearths the long-held secrets of her family's history. Southland depicts a young woman in the process of learning that her own history has bestowed upon her a deep obligation to be engaged in the larger world. And in Frank Sakai and his African-American friends, it presents characters who find significant common ground in their struggles, but who also engage each other across grounds—historical and cultural—that are still very much in dispute. Moving in and out of the past—from the internment camps of World War II, to the barley fields of the Crenshaw District in the 1930s, to the streets of Watts in the 1960s, to the night spots and garment factories of the 1990s—Southland weaves a tale of Los Angeles in all of its faces and forms. Nina Revoyr is the author of *The Necessary Hunger* ("Irresistible."—*Time Magazine*). She was born in Japan, raised in Tokyo and Los Angeles, and is of Japanese and Polish-American descent. She lives and works in Los Angeles.

Prevention and Control of Aggression and the Impact on its Victims-Manuela Bach 2013-04-17 *Proceedings of the XIV World Meeting of the International Society for the Research on Aggression: Prevention and Control of Aggression and the Impact on its Victims*, held in July 9-14, 2000, in Valencia, Spain. Aggression is an aspect of human society that has interested scientists for many decades, and their work has provided important knowledge about its causes and way to prevent and control this behavior. However, not only scientists but many professionals working in the wide spectrum of society, from family to international policy, are interested in having programs of interventions capable of reducing aggression and violence in our society. This comprehensive book is a compendium of most research approaches that are currently taking place in the field of aggression, focusing on the interventions to control and prevent this behavior and the impact on its victims. The chapters of the book include biological approaches to aggression, such as neuroanatomy, neurochemistry, neuroendocrinology, genetics and psychopathology; information about aggression in children and adolescents in different settings such as family, school and community; characteristics of aggression

in specific relationships such as marital and sexual, and specific settings such as bars, prisons and traffic; and cultural approaches to aggression, social prejudice, war and programs of peace. Furthermore, a small number of representative chapters about victims are included, ranging from the impact of aggression on behavior and physiology in animal models to victims of war. As this book highlights, the interventions to prevent and control aggression have to be diverse (highly heterogenic) in order to deal with all aspects of human beings and society, ranging from pharmacological control in individuals to programs of peace to promote respect among people and among nations. Scientists, academics and professionals dealing with any facet of aggression and its impact on our society will obtain in this book information about the complexity of this research field and the ways to approach our objective: eliminate aggression from the human behavioral repertoire.

The Planetary Turn-Amy J. Elias 2015-04-30 A groundbreaking essay collection that pursues the rise of geoculture as an essential framework for arts criticism, The Planetary Turn shows how the planet—as a territory, a sociopolitical arena, a natural space of interaction for all earthly life, and an artistic theme—is increasingly the conceptual and political dimension in which twenty-first-century writers and artists picture themselves and their work. In an introduction that comprehensively defines the planetary model of art, culture, and cultural-aesthetic interpretation, the editors explain how the living planet is emerging as distinct from older concepts of globalization, cosmopolitanism, and environmentalism and is becoming a new ground for exciting work in contemporary literature, visual and media arts, and social humanities. Written by internationally recognized scholars, the twelve essays that follow illustrate the unfolding of a new vision of potential planetary community that retools earlier models based on the nation-state or political “blocs” and reimagines cultural, political, aesthetic, and ethical relationships for the post-Cold War era.
