Beyond the End of the World - 2012 and apocalypse-Will Black 2010-10 This book cuts through rampant misinformation circulating about 2012 to present a coherent understanding of the Mayan calendar and the significance of the date. As an anthropologist and journalist, Will Black has conducted research into 2012 millenarianism for several years. He consequently offers a much broader and clearer picture than other books on the subject. In their haste to jump onto the 2012 bandwagon, most authors seem to have forgotten that the Maya are a real people, often living in as violently precarious circumstances as their ancestors. Will Black demolishes fantasies about crumbling calendar stones before examining the brutal cocaine wars blighting Central America. The hedonistic world of many westerners who have become interested in 2012 is contrasted sharply with the lives of ancient and modern Maya. The extraordinary world of shamans is contrasted with that of New Age seekers. Information about key visionary substances is offered.

Structures and Architecture-Paulo J. Cruz 2013-06-27 Although the disciplines of architecture and structural engineering have both experienced their own historical development, their interaction has resulted in many fascinating and delightful structures. To take this interaction to a higher level, there is a need to stimulate the inventive and creative design of architectural structures and to persua

Birth of a New Earth-Adrian Parr 2017-10-24 In response to unprecedented environmental degradation, activists and popular movements have risen up to fight the crisis of climate change and the ongoing devastation of the earth. The environmental movement has undeniably influenced even its adversaries, as the language of sustainability can be found in corporate mission statements, government policy, and national security agendas. However, the price of success has been compromise, prompting soul-searching and questioning of the politics of environmentalism. Is it a revolutionary movement that opposes the current system? Or is it reformist, changing the system by working within it? In Birth of a New Earth, Adrian Parr argues that this is a false choice, calling for a shift from an opposition between revolution and incremental change to a renewed collective imagination. Parr insists that environmental destruction is at its core a problem of democratization and decolonization. It requires reckoning with militarism, market fundamentalism, and global inequality and mobilizing an alternative political vision capable of freeing the collective imagination in order to replace an apocalyptic mindset frozen by the spectacle of violence. Birth of a New Earth locates the emancipatory work of environmental politics in solidarities that can bring together different constituencies, fusing opposing political strategies and paradigms by working both inside and outside the prevailing system. She discusses experiments in food sovereignty, collaborative natural-resource management, and public-interest design initiatives that test new models of economic democratization. Ultimately, Parr proclaims, environmental politics is the refusal to surrender life to the violence of global capitalism, corporate governance, and militarism. This defiance can serve as the source for the birth of a new earth.

Empowering Your Soul-Glenys-Kay 2012-11-13 We are on a fascinating journey of life, of living, and of learning to create for ourselves the life we always wanted: a life that fits neatly around the “health, wealth, and happiness” that most of us have always been striving for. Why haven’t we been able to create this life? What has prevented us from having this mythical health, wealth, and happiness? Some have it and then lose it or throw it away. So often we either can’t create it, or we lose it because we have had absolutely no idea of how the energies of life work. This is what this book is all about—helping you to understand how life works, and in that place you can then create your dreams. You become empowered to make better choices. Not everyone comprehends the very basic foundation of life: that we do create the reality in which we live. When you read this book, you will understand just how important this is. It is a valuable read for all those seeking answers to the meaning of life. We need this information to enable us to better understand and live in the new future we are in the process of creating.

Guardians of Being-Eckhart Tolle 2011-03-21 This wonderfully unique collaboration brings together two masters of their fields, joining original words by spiritual teacher Eckhart Tolle with delightful illustrations by Patrick McDonnell, the creator of the acclaimed comic strip MUTTS. Every heartwarming page provokes thought, insight, and smiling reverence for all beings and each moment. More than a collection of witty and charming drawings, the marriage of Patrick McDonnell’s art and Eckhart Tolle’s words conveys a profound love of nature, of animals, of humans, of all life-forms. Guardians of Being celebrates and reminds us of not only the oneness of all life but also the wonder and joy to be found in the present moment, amid the beauty we sometimes forget to notice all around us.

Drinking from the Wells of New Creation-Kerry Dearborn 2014-10-17 "Dearborn provides us with the gift of deep insight into the heart of God and the ways of the Spirit to open our eyes, our hearts, our homes, and our lives to God and others. Through profound theological reflection interwoven with compelling stories, this book draws us into God’s healing love and new creation. I pray God uses this great book to release the vision of Amos to which I’ve dedicated my life." --John Perkins author of Let Justice Roll Down

The Living Bible-Tyndale 2012-05-24 Celebrating 40 years and over 40 million lives touched, Tyndale is releasing The Living Bible as an eBook. The Living Bible is a paraphrase of the Old and New Testaments. Its purpose is to say as exactly as possible what the writers of the Scriptures meant, and to say it simply, expanding where necessary for a clear understanding by the modern reader.

Revelation and the Antichrist-William Edward Dewberry 2012-10-25 Before the end of time, there will be a short period when Satan will be free to cause great tribulation and distress to the people on earth. God has foreknowledge and has determined the future events that will take place during Satans time on earth. Revelation was written to warn mankind what God has determined for the future. Those who have remained faithful to God will not be harmed during the tribulation and distress. Revelation and the Antichrist is the climax of the story of Gods redeeming plan.

2012-Whitley Strieber 2007-09-18 December 21, 2012, may be one of the most watched dates in history. Every 26,000 years, Earth lines up with the exact center of our galaxy. At 11:11 on December 21, 2012, this event happens again, and the ancient Maya calculated that it would mark the end, not only of this age, but of human consciousness as we know it. But what will actually happen? The end of the world? A new age for mankind? Nothing? The last time this happened, Cro-Magnon man suddenly began creating great art in the caves of southern France, which to this day remains one of the most inexplicable changes in human history. Now Whitley Strieber explores 2012 in a towering work of fiction that will astound readers with its truly new insights and a riveting roller-coaster ride of a story. A mysterious alien presence unexpectedly bursts out of sacred sites all over the world and begins to rip human souls from their bodies, plunging the world into chaos it has never before known. Courage meets cowardice, loyalty meets betrayal as an entire world struggles to survive this incredible end-all war. Heroes emerge, villains reveal themselves, and in the end something completely new and unexpected happens that at once lifts the fictional characters into a new life, and sounds a haunting real-world warning for the future. Earth Building-Laurence Keefe 2012-05-15 Buildings with load-bearing earth walls were once widespread throughout Britain and many thousands still survive, including some dating from the fourteenth and fifteenth centuries. Earth is the ultimate form of ‘green’ building construction, creating no environmental pollutions and consuming virtually no energy. Subsoil can be dug from or near the site to construct buildings that will meet modern needs and conform to the latest building regulations. This book describes all aspects of earth building, explaining how earth performs as a building material and providing guidance on how best to repair and conserve existing earth buildings.

The Seventh-Day Sabbath and Its Redemptive Function in God’s Everlasting Covenant of Grace-A. M. Simataa 2012-05-10 This special and remarkablebook, The Seventh-day Sabbath and its Redemptive Function in Gods Everlasting Covenant of Grace by A.M. Simataa addresses topical issues in the Bible quite pertinent to the 21st Century Christianity. The author takes a defensive approach of the gospel and brings to the surface some of the least understood teachings of the Bible. Although written from a Seventh-day Adventists perspective, people of differing religious background and persuasions will fi nd this book very instructive. If you have been looking for a book that pains takingly discusses the Gospel seriously and biblically this is the book you have been searching for. Some of the topics featured in the book include: The Truth about the Bible Sabbath The Judgment of the Living Heavenly New Jerusalem; The Marriage Supper of the Lamband the Rapture The Remnant Church in the Parables Mr A.M. Simataa teaches at a High School in Windhoek, Namibia. He likes sharing the Gospel with others and spends some of his spare time witnessing to others. The central role of the Seventh-day Sabbath in the Redemption of our race is the least understood topic in the Bible today. Most believers have even dismissed its relevance to todays Christianity. However, the truth is that the Sabbath is at the heart of Christs work to save human beings in accordance with Gods plan. The Sabbath is so central to the work of atonement that Christ is referred to in the Bible as the Lord of the Sabbath. The issue of the Sabbath will become pertinent as we near the End, and every human being will be required to take a stand in the confl ict involving the Sabbath question. This book will plant your feet on a solid foundation.

Advances in Civil Engineering II-Xiang Dong Zhang 2012-12-13 The collection includes selected, peer reviewed papers from the 2nd International Conference on Civil Engineering and Transportation (IC CET 2012) held October 27-28, 2012 in Guilin, China. Volume is indexed by Thomson Reuters CPCI-S (WoS). The 597 papers are grouped into the following chapters: Chapter 1: Geological, Geotechnical and Building Engineering, Chapter 2: Structural Engineering, Chapter 3: Reliability, Durability and Rehabilitation of Structures, Chapter 4: Tunnel, Subway and Underground Facilities, Chapter 5: Bridge and Road Engineering, Chapter 6: Coastal Engineering and Ocean Engineering, Chapter 7: Seismic Engineering, Chapter 8: Surveying and Detection Engineering, Cartography, Measurement and Geographic Information System, Chapter 9: Hydraulic and Fluid Engineering, Chapter 10: Heating, Gas Supply, Ventilation and Air Conditioning Works, Chapter 11: Natural and Technogenic Disasters Prevention and Mitigation, Chapter 12: Computer-Aided Design and Applications in Industry and Civil Engineering, Chapter 13: Engineering Management and Engineering Education.

Building with Earth-Gernot Minke 2012-10-02 For a number of years, the healthy and environment-friendly building material earth, in common use for thousands of years, has been enjoying increasing popularity, including in industrialized nations. In hot dry and temperate climate zones, earth offers numerous advantages over other materials. Its particular texture and composition also holds great aesthetic appeal. The author’s presentation reflects the rich and varied experiences gained over thirty years of building earth structures all over the world. Numerous photographs of construction sites and drawings show the concrete execution of earth architecture.

New Earth Book Three: Rough Trails-L A Graf 2012-09-11 Months after leaving Earth, the struggling colonists on the new world of Belle Terre have barely established a toehold on their new home, a ravaged world still recovering from a catastrophic planetary distaster. Cyclones, storms, landslides and flash floods make survival itself a constant challenge. While Captain Kirk and the Starship Enterprise patrol the sector, on guard against predatory aliens and avaricious space pirates, officers Chekov, Uhura and Sulu stay behind to assist the settlers in their struggle to put down roots in the turbulent soil of an angry planet. But the colonists are a fiercely independent group, not inclined to take orders or direction from their Starfleet guardians. Chekov and the others find their ingenuity and diplomatic skills tested to the limit to save a people to don’t seem to want their help!

Heaven Cracks, Earth Shakes-James Palmer 2012-01-03 When an earthquake of historic magnitude leveled the industrial city of Tangshan in the summer of 1976, killing more than a half-million people, China was already gripped by widespread social unrest. As Mao lay on his deathbed, the public mourned the death of popular premier Zhou Enlai. Anger toward the powerful Communist Party officials in the Gang of Four, which had tried to suppress grieving for Zhou, was already potent; when the government failed to respond swiftly to the Tangshan disaster, popular resistance to the Cultural Revolution reached a boiling point. In Heaven Cracks, Earth Shakes, acclaimed historian James Palmer tells the startling story of the most tumultuous year in modern Chinese history, when Mao perished, a city crumbled, and a new China was born.

Stalking the Antichrists (1965–2012)-George E. Lowe 2013-12-16 Volume 1 of Stalking the Antichrists and Their False Nuclear Prophets, Nuclear Gladiators, and Spirit Warriors,1940-1965 is essentially an enhanced memoir. It is based for the most part on my personal observations and knowledge and specialized information from my academic studies of history, political science, and literature at Grove City College and the University of Chicago,as well as my professional insights into the heart of the U. S. Navy (1953-1957, 1960-1961[OP- 09D]) as an Air Intelligence Officer in Hawaii and Japan and the Pentagon; political- military/counsellor assignments in the State Department as a Foreign Service Officer(FSO-6) at the American embassy in Paris (1962-64); and a speechwriter in the Navy Department (1965). In volume 2, the textual narrative begins with the end of my specific actions/ activities in the Navy and Foreign Service in July 1965, which I have called How I Lived in History, 1950-1965. In retrospect my entire Navy careerfrom my commissioning as Ensign USNR, 1355 AIO, in early September 1953 at Naval Station, Newport, Rhode Island, to my first honorable discharge at Treasure Island on August 27, 1957was in preparation to an understanding of World War II and the Cold War.

New Frontiers in Engineering Geology and the Environment-Yu Huang 2012-08-20 “New Frontiers in Engineering Geology and the Environment” collects selected papers presented at the International Symposium on Coastal Engineering Geology (ISCEG-Shanghai 2012). These papers involve many subjects - such as engineering geology, natural hazards, geoenvironment and geotechnical engineering - with a primary focus on geological engineering problems in coastal regions. The proceedings provide readers with the latest research results and engineering experiences from academic scientists, leading engineers and industry researchers who are interested in coastal engineering geology and the relevant fields. Yu Huang works at the Department of Geotechnical Engineering, Tongji University, China. Faquan Wu works at the Institute of Geology and Geophysics, Chinese Academy of Science, China and he is also the Secretary General of the International Association for Engineering Geology and the Environment. Zhenming Shi works at the Department of Geotechnical Engineering, Tongji University, China. Bin Ye works at the Department of Geotechnical Engineering, Tongji University, China.

Howe-Beverley Ballin Smith 1994 Excavations at Howe between 1978 and 1982 presented an unparalleled opportunity to examine the extensive and complex remains of a broch settlement, and thereby more fully understand the stages of evolution from roundhouse to massive complex roundhouse. The ensuing discovery of the earlier Neolithic structures and enclosed early Iron Age settlements added further layers of importance to this rich and complex site. This volume presents the detailed excavation report, discussing the structural and environmental evidence, the material culture, human remains, and radiocarbon dates.

Worship Beyond Nationalism-Rob Hewell 2012-02-01 The church in the United States faces a dilemma: How is it possible for Christ’s followers to worship faithfully in a nationalistic environment where religion and politics enjoy a vigorous affiliation while the separation of church and state is celebrated as the standard for the relationship between nation and faith? When nationalism propagates itself through a cross-pollination of the stories, symbols, and celebrations of the nation-state and

religious groups, the stage is set for a national history bearing the character of sanctified legend. Such resulting civil religious activity is likely to create dissonance for Christ's followers between what they understand to be biblically faithful and what nationalistic practices may endorse as religiously valid. Worship Beyond Nationalism explores faithful worship as a political act by which Christians declare their allegiance to God in Christ rather than to worldly empires, enabling congregations to enact the reality of God's kingdom and embody the gospel for the glory of God and for the sake of the world.

Designing with Geosynthetics - 6Th Edition-Robert M. Koerner 2012-01-16 Following the structure of previous editions, Volume 1 of this Sixth Edition proceeds through four individual chapters on geosynthetics, geotextiles, geogrids and geonets. Volume 2 continues with geomembranes, geosynthetic clay liners, geofoam and geocomposites. The two volumes must accompany one another. All are polymeric materials used for myriad applications in geotechnical, geoenvironmental, transportation, hydraulic and private development applications. The technology has become a worldwide enterprise with approximate \$5B material sales in the 35-years since first being introduced. In addition to describing and illustrating the various materials; the most important test methods and design examples are included as pertains to specific application areas. This latest edition differs from previous ones in that sustainability is addressed throughout, new material variations are presented, new applications are included and references are updated accordingly. Each chapter includes problems for which a solutions manual is available.

Detained and Deported-Margaret Regan 2015-03-10 An intimate look at the people ensnared by the US detention and deportation system, the largest in the world On a bright Phoenix morning, Elena Santiago opened her door to find her house surrounded by a platoon of federal immigration agents. Her children screamed as the officers handcuffed her and drove her away. Within hours, she was deported to the rough border town of Nogales, Sonora, with nothing but the clothes on her back. Her two-year-old daughter and fifteen-year-old son, both American citizens, were taken by the state of Arizona and consigned to foster care. Their mother's only offense: living undocumented in the United States. Immigrants like Elena, who've lived in the United States for years, are being detained and deported at unprecedented rates. Thousands languish in detention centers—often torn from their families—for months or even years. Deportees are returned to violent Central American nations or unceremoniously dropped off in dangerous Mexican border towns. Despite the dangers of the desert crossing, many immigrants will slip across the border again, stopping at nothing to get home to their children. Drawing on years of reporting in the Arizona-Mexico borderlands, journalist Margaret Regan tells their poignant stories. Inside the massive Eloy Detention Center, a for-profit private prison in Arizona, she meets detainee Yolanda Fontes, a mother separated from her three small children. In a Nogales soup kitchen, deportee Gustavo Sanchez, a young father who'd lived in Phoenix since the age of eight, agonizes about the risks of the journey back. Regan demonstrates how increasingly draconian detention and deportation policies have broadened police powers, while enriching a private prison industry whose profits are derived from human suffering. She also documents the rise of resistance, profiling activists and young immigrant “Dreamers” who are fighting for the rights of the undocumented. Compelling and heart-wrenching, Detained and Deported offers a rare glimpse into the lives of people ensnared in America's immigration dragnet.

Great Walls and Linear Barriers-Peter Spring 2015-02-28 Everyone has heard of the Great Wall of China and knows of Hadrian's Wall and the other barriers lining stretches of Rome's imperial frontiers. But Peter Spring's original new study demonstrates that far from being exceptional, the building of walls and other linear defences was commonplace among the peoples and states of pre-modern era. He finds examples virtually all across the globe and analyses their forms and strategic functions. He finds patterns for their distribution, an important recurrent theme being the divide between settled agriculture and nomads. The author argues that it is mistaken to view such undertakings as necessarily purely defensive measures that might be evidence of insecurity or a 'magnot line mentality', as they were in fact often about aggressive assertion of control over a region or strategic routes. This original and thought-provoking study brings new light and insight to a fascinating and neglected aspect of human political and military history. It The clear text is supported by numerous, specially drawn maps and photographs.

From the very beginning of creation, God has set signs in the heavens for observation and understanding. Mel Gable has masterfully handled the movement of the constellations, planets and stars as well as their meaning and timing for End Times events. In so many areas, his research reveals agreement between science and the Bible. Make the discoveries for yourself. Travel with the author as he unravels some of the mysteries of the universe in a clear and concise style. You will be astounded by his findings. Yolanda Shirley

The Fourth Wall-Walter Jon Williams 2017-10-15 “Walter Jon Williams is a visionary of tremendous power and originality . . . He kills every damn time.” --Junot Díaz, Pulitzer Prize-winning author Dagmar Shaw is back in Hollywood, with a plan to lasso a series of emerging technologies into a revolutionary new form of entertainment.

Sean Makin is a washed-up child actor clinging to life on reality television, until Dagmar offers him the chance to be a star. Sean's past, however, holds the darkest of secrets, and now it looks as if that secret threatens to break loose in a new cycle of violence and murder. Sean's determined to succeed, even if the path to stardom is splashed with blood. But the ultimate secret is Dagmar's, and Sean has to decide how much to pay in order to find out what's on the other side of the fourth wall. “ . . . the blending of mystery-thriller, SF, and traditional Hollywood-story elements is hugely successful. It's one of those ambitious, genre-bending books in which you keep seeing, as you read, ways the story could fall apart under its own weight—but it never does. Surely the best of the Dagmar Shaw series and one of the author's finest novels.” --Booklist (starred review) “This is an ambitious novel, blending elements of science fiction, thriller and Hollywood epic into one wildly inventive narrative. It's the kind of genre-bender that you can spend a lot of time trying to describe, or you can simply say: go read it, right now.” --David Pitt, Winnipeg Free Press Inspiration and Motivation (I Am)-Dana Sheree Coe 2012-05-14 Inspiration And Motivation (I AM) is a dream come true! The Social Conquest of Earth-Edward O. Wilson 2012-04-09 New York Times Bestseller From the most celebrated heir to Darwin comes a groundbreaking book on evolution, the summa work of Edward O. Wilson's legendary career. Sparking vigorous debate in the sciences, The Social Conquest of Earth upends “the famous theory that evolution naturally encourages creatures to put family first” (Discover). Refashioning the story of human evolution, Wilson draws on his remarkable knowledge of biology and social behavior to demonstrate that group selection, not kin selection, is the premier driving force of human evolution. In a work that James D. Watson calls “a monumental exploration of the biological origins of the human condition,” Wilson explains how our innate drive to belong to a group is both a “great blessing and a terrible curse” (Smithsonian). Demonstrating that the sources of morality, religion, and the creative arts are fundamentally biological in nature, the renowned Harvard University biologist presents us with the clearest explanation ever produced as to the origin of the human condition and why it resulted in our domination of the Earth's biosphere.
