A New Kind of Monster-Timothy Appleby 2011-04-05 The horrific and astonishing true story of the double life of Russell Williams, who was at once a respected figure in the Canadian military and a ruthless sado-sexual serial criminal and murderer. A model officer and elite pilot, Colonel Russell Williams was trusted with flying international dignitaries including Queen Elizabeth, as well as commanding Canada's most important military airbase. Yet his dark and violent secret life included breaking into 82 homes of girls and women; thefts of vast amounts of lingerie (which he dressed in); two bizarre sexual assaults that left an uncomprehending Ontario village on a knife's-edge; and eventually, two rape-murders. In A New Kind of Monster, veteran Globe and Mail crime reporter Tim Appleby chronicles a true story that could have been lifted from the darkest pages of pulp fiction, one that offers fascinating--and troubling--insights on human psychopathology.

What a Life! a Different Kind of Biography-Nelson Herbert LaFountain 2020-11-15 Herein are printed stories and poems I have written over the years in my own way of telling my story. Rather than an autobiography I

thought this may be a better way of presenting one's life rather than in one mundane book. I began with a book and then I found I like to present my life this way. These are truthful works and not fiction. Some had memory "holes" that needed filling, who said what, or who I gave credit to but nothing that would take away from the story. It's just the way I tell my life. After all, my life has been a series of short stories and poems not one continuous biography or even one long story. I tried to keep them truthful at all times. My poetry is not the deep thinking style but happenings in poetry form. I hope you enjoy it. The Chapter numbers are assigned to the places I lived when the stories happened, not necessarily in the order that they happened. You will find the stories and poems are not numbered. I began writing short stories and poems before I started my book. Then after a few stories, I figured it would be a good way to write a book. So this is it, for good or ill and I am not an author with an extensive vocabulary by any stretch of the imagination, I hope you'll forgive that. They, so I'm told, are quite interesting and easy reading. Take them like vitamins, one or two a day. I hope you will laugh and cry and enjoy! The stories, poems, musings and thoughts in this book, are the product of but not limited to, a lifetime of memories, love, life, pain and laughter. It is a labor of love in an effort to sing the praises of those that deserve it the most, and not for the writer. For it was the people that this work was dedicated to that I have to thank for almost all the memories. If it weren't for the people, there would be absolutely no need for writing this book.

A New History of Life-Peter Ward 2015-04-07 The history of life on Earth is, in some form or another, known to us all--or so we think. A New History of Life offers a provocative new account, based on the latest scientific research, of how life on our planet evolved--the first major new synthesis for general readers in two decades. Charles Darwin's theories, first published more than 150 years ago, form the backbone of how we understand the history of the Earth. In reality, the currently accepted history of life on Earth is so flawed, so out of date, that it's past time we need a 'New History of Life.' In their latest book, Joe Kirschvink and Peter Ward will show that many of our most cherished beliefs about the evolution of life are wrong. Gathering and analyzing years of discoveries and research not yet widely known to the public, A New History of Life proposes a different origin of species than the one Darwin proposed, one which includes eight-foot-long centipedes, a frozen "snowball Earth", and the seeds for life originating on Mars. Drawing on their years of experience in paleontology, biology, chemistry, and astrobiology, experts Ward and Kirschvink paint a picture of the origins life on Earth that are at once too fabulous to imagine and too familiar to dismiss--and looking forward, A New History of Life brilliantly assembles insights from some of the latest scientific research to understand how life on Earth can and might evolve far into the future.

Culture and Materialism-Raymond Williams 2005 Raymond Williams is a towering presence in cultural studies, most importantly as the founder of the approach that has come to be known as "cultural materialism." Yet Williams's method was always open-ended and fluid, and this volume collects together his most significant work from over a twenty-year period in which he wrestled with the concepts of materialism and culture and their interrelationship. Aside from his more directly theoretical texts, however, case-studies of theatrical naturalism, the Bloomsbury group, advertising, science fiction, and the Welsh novel are also included as illustrations of the method at work. Finally, Williams's identity as an active socialist, rather than simply an academic, is captured by two unambiguously political pieces on the past, present and future of Marxism.

Philosopher A Kind Of Life-Prof Ted Honderich 2008-10-14 The story of Ted Honderich, philosopher, a story of a perilous philosophical life, marked by critical examination, and a compelling personal life full of human drama. This is the story of Ted Honderich's perilous progress from boyhood in Canada to the Grote Professorship of Mind and Logic at University College London, A. J. Ayer's chair. It is compelling, candid and revealing about the beginning and the goal, and everything in between: early work as a journalist on The Toronto Star, travels with Elvis Presley, arrival in Britain, loves and friendships, academic rivalries and battles, marriages and affairs, self-interest and empathy. It sets out resolutely to explain how and why it all happened. It is as much a narrative of Ted Honderich's philosophy. He makes hard problems real. Philosophy from consciousness and determinism to political violence and democracy comes into sharp focus. Along the way, questions keep coming up. Does the free marriage owe anything to the analytic philosophy? What are the costs of truth? Are the politics of England slowly making it an ever-better place? Is an action's rightness independent of the mixture of motives out of which it came?

The Less People Know About Us-Axton Betz-Hamilton 2019-10-15 In a powerful memoir, identity theft expert Axton Betz-Hamilton tells the shocking and unsettling story of her family, betrayal, and deceit. Axton Betz-Hamilton grew up in small-town Indiana in the early '90s. When she was 11 years old, her parents both had their identities stolen. Their credit ratings were ruined, and they were constantly fighting over money. This was before the age of the Internet, when identity theft became more commonplace, so authorities and banks were clueless and reluctant to help Axton's parents. Axton's family switched PO Boxes, changed all of their personal information, and moved to different addresses, but the identity thief followed them wherever they went. Convinced that the thief had to be someone they knew, Axton and her parents completely cut off the outside world, isolating themselves from friends and family. Axton learned not to let anyone into the house without explicit permission, and once went as far as chasing a plumber off their property with a knife. She had panic attacks throughout her formative years and often became physically sick with anxiety and quarantined behind the closed curtains in her childhood home. She began

starving herself at a young age in an effort to blend in--her clothes, hair, makeup, and weight could be nothing short of perfect or she would be scolded by her mother, who had become paranoid and consumed by how others perceived the family. Years later, her parents marriage still shaken from the theft, Axton discovered that she, too, had fallen prey to the identity thief, but by the time she realized, she was already thousands of dollars in debt and her credit was ruined. THE LESS PEOPLE KNOW ABOUT US is Axton's attempt to untangle an intricate web of lies, and to understand why and how a loved one could have inflicted such pain. Axton will present a candid, shocking, and redemptive story and reveal her courageous effort to grapple with someone close that broke the unwritten rules of love, protection, and family.

Dying Unto Life-Arthur C. McGill 2013-01-25 "McGill has the power to make ideas, concepts, differing perspectives vivid--to 'in-flesh' them. . . . Then comes the "switch" or reversal or inversion empowered by the very confrontation McGill has arranged. . . . McGill leaves only the demonic as the object of our worship. Just when we supposed that he was about to come to the defense of this "world-governing, background God," he dismisses such a God, leaving us with the demonic, leaving us room to affirm our own doubts and perplexities, leaving us with a harsher formulation than we might have ventured, leaving us attentive to what he is going to do next and to where he is going to lead us. Because by now we are following him." -- From the "Introduction."

Transformative Experience-L. A. Paul 2014-11-06 As we live our lives, we repeatedly make decisions that shape our future circumstances and affect the sort of person we will be. When choosing whether to start a family, or deciding on a career, we often think we can assess the options by imagining what different experiences would be like for us. L. A. Paul argues that, for choices involving dramatically new experiences, we are confronted by the brute fact that we can know very little about our subjective futures. This has serious implications for our decisions. If we make life choices in the way we naturally and intuitively want to--by considering what we care about, and what our future selves will be like if we choose to have the experience--we only learn what we really need to know after we have already committed ourselves. If we try to escape the dilemma by avoiding an experience, we have still made a choice. Choosing rationally, then, may require us to regard big life decisions as choices to make discoveries, small and large, about the intrinsic nature of experience, and to recognize that part of the value of living authentically is to experience one's life and preferences in whatever way they may evolve in the wake of the choices you make. Using classic philosophical examples about the nature of consciousness, and drawing on recent work in normative decision theory, cognitive science, epistemology, and the philosophy of mind, Paul develops a rigorous account of transformative experience that sheds light on how we should understand real-world experience and our capacity to rationally map our subjective futures.

Origins of Life-Freeman Dyson 1999-09-28 How did life on earth originate? Did replication or metabolism come first in the history of life? In this book, Freeman Dyson examines these questions and discusses the two main theories that try to explain how naturally occurring chemicals could organize themselves into living creatures. The majority view is that life began with replicating molecules, the precursors of modern genes. The minority belief is that random populations of molecules evolved metabolic activities before exact replication existed. Dyson analyzes both of these theories with reference to recent important discoveries by geologists and chemists. His main aim is to stimulate experiments that could help to decide which theory is correct. This second edition covers the enormous advances that have been made in biology and geology in the past and the impact they

have had on our ideas about how life began. It is a clearly-written, fascinating book that will appeal to anyone interested in the origins of life. Birthright-David C. Needham 2011-02-23 David Needham asks "Christian, do you know who you are?" in this remarkable and easy-to-understand rerelease of his book about the Christian's birthright. He offers fresh insight into the theological problem of Christian identity, biblically based teaching, and a challenge for personal enrichment and further Bible study. Birthright achieves an excellent balance between the theological and the practical. The author's sincerity and candid writing style are guaranteed to buoy the spirits of readers.

Otherhood-Melanie Notkin 2014-03-04 Melanie Notkin wants to change our perceptions about childless women. The rise of childless women is one of the most overlooked and under-appreciated social issues of our time. Never previously have more women lived longer before having their first child or remained childless toward the end of their fertility. In the U.S., the level of childlessness of women age forty to forty-four has doubled, from 10 percent in 1976 to 20 percent in 2006. Society assumes that women either are mothers or choose not to be mothers, but waiting for love and marriage—or at least a committed union—before embarking on motherhood seems to be the least acceptable life choice for the modern woman. Nearly half of North American women of childbearing age are childless, a steep rise from 35 percent in 1976. Nevertheless, childless women are perceived as the exception, not the norm. In Otherhood, Melanie Notkin explores this modern phenomenon to understand the reasons for this shift, the social and emotional impact of childlessness, and how this "new normal" will impact social structures in the decades to come. Part anecdotal storytelling, part inspirational, part reportage, and part manifesto, Otherhood sets out to get to the heart of the issues, enliven the societal consciousness, and trigger conversation. Notkin offers a very personal take on a trend that affects so many modern women.

The Bible and the American Future-Robert Jewett 2010-01-01 What does the Bible say about the American future? Does it contain an apocalyptic vision in which conflicts are to be resolved by war? Or does it contain a vision of coexistence under some system of conflict management? While both visions have biblical foundations, the apocalyptic alternative has dominated public discussion in the past generation. Most people are not even aware that another vision can be derived from the same Bible and that it transcends the usual definitions of liberal, conservative, or evangelical politics. The essays in this book, written by distinguished scholars from various sectors of the theological spectrum, throw surprising new light on these questions. They were presented as lectures at an extraordinary theological conference sponsored by a large Methodist church in Lincoln, Nebraska, in October 2009. In contrast to the usual shouting matches between partisans, this conference--and this book--featured liberal and conservative Protestant and Catholic scholars who calmly unearthed new insights about the Bible's relevance for the future of America and the world. Readers will be astonished to see these differing viewpoints on the pages of a single book, and even more amazed at the new common ground that is prepared by these fresh and profound furrows.

A Different Kind of Courage-HW Coyle 2011 Summary of back of book.

Rethinking Our Story-G. Douglas Hammack 2014-01-13 "If it ain't broke, don't fix it." But it's no secret that the Christian church is "broke," and does need fixing. Despite great effort, things are going badly for us. We've tried trendy and tech-savvy, entrepreneurial and coffee-house gritty. They're not helping. Our problem is deeper than that. Our problem is our instincts--instincts informed by our story. There was a time when the Christian church was a powerfully transformative presence in society. It can be again--but it will require radical rethinking of the story that informs our instincts. And it's time! It's been five hundred years since the Reformation, our last major update. Today is a pivotal moment in history. With our worldview upended by quantum physics, history is demanding we renew the Christian story for our times. Rethinking Our Story reframes the elements of the Christian narrative for the new era. It explores "quantum" ways of thinking about God, human nature, Jesus, salvation, and the afterlife. The future of the church and the health of our society depend on our willingness to rethink, retell, and live out a better story. We will either update our instincts and contribute to the earth's well-being--or disappear into oblivion.

The Artist's Torah-David Harris Ebenbach 2012-11-06 The Artist's Torah is an uplifting and down-to-earth guide to the creative process, wide open to longtime artists and first-time dabblers, to people of every religious background--or none--and to every creative medium. Above all, The Artist's Torah teaches us that creativity is a natural and important part of the human spirit, a bright spark that, week after week, this book will brighten. Redeeming Science-Vern S. Poythress 2006-10-13 Many people think science is antagonistic to Christian belief. Science, it is said, shows that the universe is billions of years old, while the Bible says it is only thousands of years old. And some claim that science shows supernatural miracles are impossible. These and other points of contention cause some Christians to view science as a threat to their beliefs. Redeeming Science attempts to kindle our appreciation for science as it ought to be--science that could serve as a path for praising God and serving fellow human beings. Through examining the wonderfully complex and immutable laws of nature, author Vern Poythress explains, we ought to recognize the wisdom, care, and beauty of God. A Christian worldview restores a true response to science, where we praise the God who created nature and cares for it.

Heroes, Sages & Madmen-A. Roy Horn 2009-08-12 Heroes, Sages and Madmen is not a book for everyone, but its potent message is about everyone. It reveals a direct and honest no nonsense revelation for spiritual aspirants who with courage, heroism, and sincerity are ready to go beyond the limitations of popular religion, academic philosophy, physical exercise yoga, and mental meditation. It is a revealing new, fresh, and amazing look into the four major traditional Paths of Enlightenment. It takes you where very few will go. It takes you into the midst of the personal attainments, blisses, challenges, pitfalls, and dangers of spiritual practices. And, it takes you into the consciousness and personal strategies of the far reaching socially popular and pretentious pop-guru. The seventy-nine short conversations in this book are guaranteed to convey many key secret spiritual teachings of the past. These secret spiritual teachings are traditionally known only by true and ripe spiritual Heroes and authentic Sages, Saints, and Yogis. Within these pages, you can discover what causes the social bondage, personal dissatisfaction, and the failing habitual struggles for inner Happiness and Peace. In the midst of the enigma and quagmire of ordinary thinking and analytical minds, the author reveals and restates many ancient esoteric secrets of spirituality. And, most importantly, the author shows how you can find a way out of your spiritual, social, and personal dilemmas. In the questions and answers in these conversations, many universal truths are delineated from major philosophies, religions, and spiritual practices and then their apparent differences are explored, summed up, and reconciled. The questions and answers in this book originated from dozens of sincere spiritual aspirants from group sessions, e-mails, personal notes, formal letters, telephone conversations, and one-on-one sessions since the early 1980s. Each question and answer is paraphrased by the author. The information, knowledge, and wisdom in this

book have been distilled directly from personal experience from a lifetime of spiritual study and practices. The questions and answers are direct and sometimes surprising. At other times, the authors direct answers may challenge the spiritual assumptions of many neophyte and mature spiritual aspirants. The purpose of each answer was to directly serve the sincere spiritual aspirants spiritual development and awakening beyond their popular religious, academic philosophical, and social belief assumptions. In addition, popular misunderstandings surrounding classical spiritual teachings and their four major traditional Paths of Enlightenment and practice of yoga are described, evaluated, and discussed in depth. And lastly, the thinking-analytical meditation methods of popular spiritual movements in the West (European cultures) are considered in contrast to the contemplative meditations of the great Sages, Saints, and Yogis of the classical East (Non-European cultures). Unfortunately, the English language does not lend itself to explain and define the metaphysical principles and concepts of contemplative spirituality. Contemporary English is predominately a language of definitions, names, forms, and objects as demonstrated in English as used throughout the material world for business and commerce. Other languages such as Sanskrit, Pali, Tamil, and Hebrew are spoken and written to understand and verbally communicate both the dual physical world of objects and the multidimensional transcendental spiritual world beyond social psychology and formulative physics. For this reason, the author has modified many spelling, grammar, and syntax rules to emphasize and endeavor to explain contemplative concepts that cannot be explained by academic English. Therefore, you may discover that many sections may contain imperfect spelling, grammar, and syntax that are ordinarily absent from professionally produced books. To assure the authors metaphysical meani

Three Theological Mistakes-Ric Machuga 2015-01-05 - Is the existence of God a matter of faith or knowledge? - Does God sometimes act miraculously

or are there physical causes for everything? - Is morality absolute or relative? - Are humans truly free or does God's sovereignty determine everything? - When bad things happen, is God the cause or are they the fault of humans? Too frequently Christians answer these questions with a Yes to one side and a No to the other side. Thomas Aquinas and Karl Barth answer Yes to both. Following their model, Machuga defends a "third way" which transcends the Enlightenment dichotomies of fideism vs. rationalism, supernaturalism vs. naturalism, relativism vs. absolutism, free will vs. predestination, and God's justice vs. his mercy. Machuga begins by showing how these false dichotomies grew out of the Enlightenment assumptions of mechanism, universal quantification, and mono-causation. He then corrects these demonstrably dubious assumptions by articulating a theory of dual-causation. The result is a thoroughly biblical understanding of God, miracles, and free will that can withstand the contemporary criticisms of both science and philosophy.

A New Kind of Missionary-Lionel F. Young 2012-03-01 In the year 1900 there were only 9 million Christians on the African continent. Today, the once dark-continent is home to nearly half a billion believers and growing at a rate of 23,000 new converts a day! A dramatic "southern shift" has taken place in the last 100 years that many in the West have never heard about. Today, most of the world's Christians live in Africa, Asia and South America—the new global South. Here is a short introduction to world Christianity written by a pastor-scholar who discusses some of the exciting opportunities this presents for the Western church. This is a must-read book for every Christian who has a heart for global missions. Based on groundbreaking research that is illustrated throughout with real stories from the global church, A New Kind of Missionary will leave you wondering why a book like this wasn't written sooner.
