A New Notion-Cyril Lionel Robert James
2010-03-01 Portraying C. L. R. James as a leading figure in the independence movement in the West Indies and in the black and working-class movements in both Britain and the United States, this volume provides an extensive introduction to James's life and thought before presenting two critical works that illustrate the tremendous breadth and depth of his worldview. Both long-out-of-print pamphlets display James's contributions to Marxist and revolutionary theory as he documents and elaborates on the aspects of working-class activity that constitute the revolution in today's world. Fully encapsulating James's thoughts on democracy and workers' emancipation, these essential works represent the principal themes that run through James's life: implacable hostility toward all "condescending saviors" of the working class and an underlying faith in the power of ordinary people to build a new world.

Transpacific Antiracism-Yuichiro Onishi
2013-07-01 Transpacific Antiracism introduces the dynamic process out of which social movements in Black America, Japan, and Okinawa formed Afro-Asian solidarities against the practice of white supremacy in the twentieth century. Yuichiro Onishi argues that in the context of forging Afro-Asian solidarities, race emerged as a political category of struggle with a distinct moral quality and vitality. This book explores the work of Black intellectual-activists of the first half of the twentieth century, including Hubert Harrison and W. E. B. Du Bois, that took a pro-Japan stance to articulate the connection between local and global dimensions

of antiracism. Turning to two places rarely seen as a part of the Black experience, Japan and Okinawa, the book also presents the accounts of a group of Japanese scholars shaping the Black studies movement in post-surrender Japan and multiracial coalition-building in U.S.-occupied Okinawa during the height of the Vietnam War which brought together local activists, peace activists, and antiracist and antiwar GIs. Together these cases of Afro-Asian solidarity make known political discourses and projects that reworked the concept of race to become a wellspring of aspiration for a new society. Sex, Race and Class, the Perspective of Winning-Selma James 2012 Branching off Marx's theories of class struggle, this impressive collection of essays on workers' rights as they pertains to women's rights aims to educate and inform those interested in radical feminist labor theory. Arguing that class struggle manifests itself as the conflict between the reproduction and survival of the human race, the general theme of the collected essays leans left and warns of market exploitation, war, and ecological disaster. Spanning nearly six decades and compiling essays that have appeared in anthologies or are selections from Selma James' books—some printed here for the first time—these selections preach equality in wages for men and women alike, especially in nontraditional work environments.

Alternative Vegan-Dino Sarma Weierman
2009-12-01 Taking a fresh, bold, and alternative approach to vegan cooking without the substitutes, this cookbook showcases more than 100 fully vegan recipes, many of which have South Asian influences. With a jazz-style approach to cooking, it also discusses how to

improvise cooking with simple ingredients and how to stock a kitchen to prepare simple and delicious vegan meals quickly. The recipes for mouth-watering dishes include one-pot meals—such as South-Indian Uppama and Chipotle Garlic Risotto—along with Pakoras, Flautas, Bajji, and Kashmiri Biryani, Hummus Canapes, and No-Cheese Pizza. With new, improved recipes this updated edition also shows how to cook simply to let the flavor of fresh ingredients shine through.

Organize!-Eric Shragge 2012 Collects essays by activists, academics, lawyers, artists and others on how to organize people to promote social change in diverse areas. Original.

Theoretical Computer Science: Exploring New Frontiers of Theoretical Informatics-International Conference IFIP TCS 2000 2000-07-26 This book constitutes the refereed proceedings of the International Conference IFIP TCS 2000 held in Sendai, Japan in August 2000. The 32 revised full papers presented together with nine invited contributions were carefully reviewed and selected from a total of 70 submissions. The papers are organized in two tracks on algorithms, complexity, and models of computation and on logics, semantics, specification, and verification. The book is devoted to exploring new frontiers of theoretical informatics and addresses all current topics in theoretical computer science.

Alexandr A. Chuprov: Life, Work, Correspondence-Oscar Sheynin 2011-03-09
Erstmals wird hier Leben und Werk Aleksandr A. Chuprovs (1874-1926) beschrieben, des zu seiner Zeit bedeutendsten russischen und kontinentalen Statistikers. Das Buch basiert auf Archivquellen aus Moskau und enthält viele Passagen aus Chuprovs Korrespondenz mit Anderson, Bortkiewicz, Markov und Slutsky. Vor allem strebte Chuprov danach, die damals

existierenden Strömungen statistischen Denkens (Englische Schule und Kontinentale Richtung) zu vereinen. Er war überaus erfolgreich und hat sich um das Hervortreten der mathematischen Statistik große Verdienste erworben.

The New Cambridge Bibliography of English Literature: Volume 2, 1660-1800-George Watson 1971-07-02 More than fifty specialists have

contributed to this new edition of volume 2 of The Cambridge Bibliography of English Literature. The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis, articulation and coordination that it has been retained in all its essentials for the new edition. The task of the new contributors has been to revise and integrate the lists of 1940 and 1957, to add materials of the following decade, to correct and refine the bibliographical details already available, and to re-shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries.

Play and Participation in Contemporary Arts Practices-Tim Stott 2015-03-24 This book engages debates in current art criticism concerning the turn toward participatory works of art. In particular, it analyzes ludic participation, in which play and games are used organizationally so that participants actively engage with or complete the work of art through their play. Here Stott explores the complex and systematic organization of works of ludic participation, showing how these correlate with social systems of communication, exhibition, and governance. At a time when the advocacy of play and participation has become widespread in our culture, he addresses the shortage of literature on the use of play and games in modern and contemporary arts practice in order to begin a play theory of organization and governance.

Collected Works of Witold Hurewicz-Witold Hurewicz 1995 This book contains papers of the outstanding and versatile mathematician, Witold Hurewicz. Preceding the collection are introductory articles describing Hurewicz's

contributions to Borel sets, dimension theory, and algebraic topology. Hurewicz first studied set theory and dimension, and his papers on this topic are especially clear and precise, making them accessible to beginning mathematicians. His work in algebraic topology is marked by five fundamental papers which provide an introduction to homotopy groups and the Hurewicz Theorem concerning the relation between homotopy and singular homology. These papers are included here in their original form along with English translations. Each paper in the collection is followed by a review from one of the major reviewing journals. These reviews were written by eminent mathematicians and serve as excellent abstracts for the papers. The Complete Works of Thomas Babington Macaulay-Thomas Babington Macaulay Baron Macaulay 1910

The Neighborhood Works- 1993

Stochastic and Differential Games-Martino Bardi 1999-06 The theory of two-person, zero-sum differential games started at the beginning of the 1960s with the works of R. Isaacs in the United States and L. S. Pontryagin and his school in the former Soviet Union. Isaacs based his work on the Dynamic Programming method. He analyzed many special cases of the partial differential equation now called Hamilton Jacobi-Isaacs-briefly HJI-trying to solve them explicitly and synthesizing optimal feedbacks from the

solution. He began a study of singular surfaces that was continued mainly by J. Breakwell and P. Bernhard and led to the explicit solution of some low-dimensional but highly nontrivial games; a recent survey of this theory can be found in the book by J. Lewin entitled Differential Games (Springer, 1994). Since the early stages of the theory, several authors worked on making the notion of value of a differential game precise and providing a rigorous derivation of the HJI equation, which does not have a classical solution in most cases; we mention here the works of W. Fleming, A. Friedman (see his book, Differential Games, Wiley, 1971), P. P. Varaiya, E. Roxin, R. J. Elliott and N. J. Kalton, N. N. Krasovskii, and A. I. Subbotin (see their book Positional Differential Games, Nauka, 1974, and Springer, 1988), and L. D. Berkovitz. A major breakthrough was the introduction in the 1980s of two new notions of generalized solution for Hamilton-Jacobi equations, namely, viscosity solutions, by M. G. Crandall and P. -L.

Notices Of Engravers, And Their Works, Being The Commencement Of A New Dictionary ... Containing Some Account Of Upwards Of 300 Masters-William Young Ottley 1831 Malraux, the Absolute Agnostic; Or, Metamorphosis as Universal Law-Claude Tannery 1991 Moving beyond merely biographical or textual interpretation, Claude Tannery traces the philosophy of life and art developed by Andr Malraux. With both sensitivity and expert interpretation he defines the issues--personal and artistic as well as political--that underlie Malraux's writings--including early as well as late works, novels, speeches, and essays. The result is a new and subtle portrait of Malraux.
