Men of Achievement- 1979

Tourism and Protected Areas in Brazil-Stephen Mccool 2018

Winter Tourism-Ulrike Pröbstl-Haider 2019-10-03 Winter tourism has seen increased levels of investment in recent times, in an effort to reduce economic risk, address environmental concerns and adapt to the effects of global warming. New ski destinations are developing and merging with traditional ones to increase spatial distribution, while many established leading resorts are adapting their management models. Climate change adaptation processes are supported by the reduction of CO2 emissions and energy consumption in ski resorts. Current planning challenges include the increasing importance of scenic beauty, nature and sustainable development, as well as snow reliability, snow management and safety issues.

Managing Outdoor Recreation-Robert E. Manning 2012 The global popularity of outdoor recreation and ecotourism is on the increase. At present, there is little systematic information on the management practices that have been successful in National Parks. This book presents the issue of how to manage outdoor recreation in ways that protect the integrity of park resources and the quality of the visitor experience. Using case studies drawn from the U.S. National Park System, it illustrates a range of successful management approaches that can be applied worldwide.

Liability of Corporate Directors-Dennis Campbell 1993 A comparative analysis of the law relating to liabilities of corporate directors in major jurisdictions around the world, including Europe, the United States and the Bahamas. The first section of the book introduces the subject of directors' liability and provides a historical perspective. This is followed by a detailed country by country survey which covers: the distinction between directors and officers and the consequences of that distinction; liabilities for contracts for executive directors; the distinction between outside and inside directors and the liabilities and duties that arise in the management of a company; defences available; indemnification; insurance cover; other methods of protection available; limitation on directors' liability and liability in third party actions.

Nature-based integration-Pitkänen, Kati 2017-05-30 Increased attention to, and careful planning of the integration of migrants into Nordic societies is ever more important. Nature based integration is a new solution to respond to this need. This report presents the results of a Nordic survey and workshop and illustrates current practices of nature based integration by case study descriptions from Denmark, Sweden Norway and Finland. Across Nordic countries several practical projects and initiatives have been launched to promote the benefits of nature in integration and there is also growing academic interest in the topic. Nordic countries have the potential of becoming real forerunners in nature based integration even at the global scale.

Contemporary Issues in Sociology of Sport-Andrew Yiannakis 2001 Melnick, PhD, Contemporary Issues in Sociology of Sport includes: an exploration of topics and themes that have received limited attention in other sociology of sport texts but have been long-standing social concerns; a review of the attitudes toward female athletes and the anti-homosexual phobias present in sport; an in-depth look at the impoverishment of children's games in America; an overview of high school sport participation; a study of the challenges and benefits of the big-time collegiate sport experience; a critique of television's impact on sport and its portrayal of gender and race, and a review of sport and globalization. Unit I provides the reader with a historical background on the development of sociology of sport and addresses several critical issues about the relationship between sociology, physical education, and sociology of sport.

Public Libraries and Social Justice-John Pateman 2016-04-15 The need for public libraries to tackle social exclusion and engage in social justice becomes ever more urgent as the gap between rich and poor continues to widen, and the very survival of public libraries in the heart of the community is open to debate. If public libraries are to develop and grow in the future and become relevant to the majority of their local communities, then they need to abandon outmoded concepts of 'excellence' and fully grasp the 'equity' agenda. This book examines the historical background to social exclusion and the strategic context in terms of government and professional policy. The authors propose a compelling manifesto for change and outline practical ways in which public libraries can be transformed into needs-based services.

Inside Sports-Jay Coakley 2005-08-19 How do people become involved in sports? What can their experiences teach us? These are two of the many questions asked by this unique collection of personal stories of people involved in sport. Told by researchers who have interviewed participants and observed what happens in the setting where people play sports, the contributions not only show how sport studies contribute to the wider study of society, but also describe the difficulties and challenges faced when doing research of this kind. Inside Sports is divided into four main sections reflecting the social processes and developments over time that make up the experience of sport for most people, however diverse their circumstances may otherwise be: \* Early experiences: being introduced to sports \* Experience and identity: becoming an athlete \* Deep in the experience: doing sports \* Transition experiences: facing life beyond the

playing field. In its extensive coverage of the sporting experience from within, as well as its discussion of research methods, Inside Sports will be essential reading for all students studying sport in society.

White Sports/Black Sports: Racial Disparities in Athletic Programs-Lori Latrice Martin 2015-03-03 The racial makeup of sports in the United States serves as a classic example of racism in the 21st century. This book examines the racial disparities in sports and the continuing significance of race in 21st-century America, debunking the myth of a "postracial society."

- Examines how race and sports are powerful social constructions
- Presents examples of how sports can serve as both a liberating and an oppressive force
- Explains how sports influence and are influenced by society and the ways in which institutional barriers and personal practices perpetuate racism in sports and in the society at large
- Documents how historic racial stereotypes, such as the "brute" and "sapphire" caricatures, are alive and well in the world of sports

The Dowry Blade-Cherry Potts 2016-02-25

Backboards & Blackboards-Patricia A. Adler 1991 College basketball experienced its greatest rise in popularity during the eighties, becoming one of the most commercially successful spectator sports in America. With this rise came an era of scandal: recruiting violations, spurious admittance practices, and controversial treatment of student athletes. Within this guarded context of scrutiny, allegations of improprieties, and media celebrity, Patricia and Peter Adler penetrated the public front of a top twenty basketball team. The result of their efforts, Backboards and Blackboards: College Athletes and Role Engulfment, is a compelling inside account of an exciting, intimidating, and glamorous hidden arena.

Contemporary Fashion Illustration Techniques-Naoki Watanabe 2009-06-01 The primary skill needed by anyone who works in fashion is the ability to convey—to clients and the general public alike—images of the designs. The impression given to the viewer depends on whether the fashion design drawings are good. Contemporary Fashion Illustration Techniques thoroughly describes the basics of fashion illustration, and covers the latest trends such as vivid images, sprightly movement, and garment material texture. After all, fashion drawing is not simply about sketching a body and face; only when you accurately reproduce the garments and their colors can the designs truly come to life.

Kicking Center-Rachel Allison 2018-08-30 Girls and young women participate in soccer at record levels and the Women's National Team

regularly draws media, corporate, and popular attention. Yet despite increased representation and visibility, gender disparities in opportunity, compensation, training resources, and media airtime persist in soccer, and two professional leagues for women have failed since 2000. In *Kicking Center*, Rachel Allison investigates a women's soccer league seeking to break into the male-dominated center of U.S. professional sport. Through an examination of the challenges and opportunities identified by those working for and with this league, she demonstrates how gender inequality is both constructed and contested in professional sport. Allison details the complex constructions of race, class, gender, and sexuality in the selling and marketing of women's soccer in a half-changed sports landscape characterized by both progress and backlash, and where professional sports are still understood to be men's territory.

*Sport and Society*-Barrie Houlihan 2007-12-20 Praise for the First Edition: "Barrie Houlihan's astonishingly ambitious and skilfully assembled collection examines the relations between sport, social policy and the social context that underlies the two. Organized around such themes as exclusion, commercialism and international comparisons, the book allows the reader to understand not only the centrality of sport to contemporary society, but the often perplexing policies that contrive to encourage or deny participation, promote or deter public sector involvement and support or undermine physical education. Importantly, Houlihan never prioritises the general over the particular, always striving to find detail amid the bigger picture." - Ellis Cashmore, Professor of Culture, Media and Sport, Staffordshire University "The most comprehensive study of contemporary issues in sport by leading international scholars. Houlihan's book is the answer to sports students' prayers, full of information, statistics, tables and figures, extensive guides to further reading and, most important of all, challenging ideas. A weighty vademecum for the early 21st century." - Jim Riordan Honorary Professor of Sports Studies, University of Stirling, Professor Emeritus at University of Surrey, and President of the European Sports History Association Fully updated and revised, the Second Edition of Barrie Houlihan's ground-breaking book provides students and lecturers with a one-stop text that is comprehensive, multi-disciplinary, accessible, international and engaging. *Sport and Society* allows students to: Approach the study of sport from a multi-disciplinary perspective. Understand the importance of social structure, power and inequality in analyzing the nature and significance of sport in society. Address the rapid commercialization

and regulation of sport. Engage in comparative analysis to understand problems clearly and produce sound solutions. Expand their knowledge through chapter summaries, guides to further reading and extensive bibliographies. This Second Edition contains five brand new chapters, which reflect recent concerns with: young athletes and human rights, sport and the city, sport and violence, sport and health, and sport and Islam. A superb teaching text, it will be relished by lecturers seeking an authoritative introduction to sport and society and students who want a relevant, enriching text for their learning and research needs.

*Who Da Man?*-Gamal Abdel-Shehid 2005 This book offers a highly original approach to Black masculinities and sport in Canada. The book will be especially exciting for those interested in decolonisation, culture, and the intersection of identity, sport, and politics. 'Who Da Man' attempts to account for the ways that Black Diasporic identifications intersect with the dominant misogyny and homophobia in contemporary men's sporting cultures. Abdel-Shehid suggests that thinking about Diaspora in the making of contemporary Black sporting cultures provides a more comprehensive framework than that which looks at sport solely within the framework of nations and nationalism. He further argues that Canadian hegemonic ideas and practices typically marginalise blackness and Black peoples. Thus, the author suggests, Black masculinities in sport are often connected to Diasporic locations. These connections can be either empowering or disempowering, requiring careful analysis to achieve full understanding of how things are being perceived, projected, and therefore implemented. 'Who Da Man' offers a feminist and queer reading of Black masculinity, and suggests that thinking about Black sporting masculinities means paying attention to the ways that these larger discourses of racism, exclusion, and Diaspora shape Black masculinities. Moreover, the book asks to what extent homophobia and misogyny within men's sporting cultures influence contemporary understandings of Black masculinity.

*Great Art and Culture for Everyone*-Arts Council of England 2013  
*Women in Sport*-Greta L. Cohen 2001 This second edition provides a broad-based survey of topics relevant to girls and women's participation in sport. The contributing authors are leading authorities in their respective disciplines. The topics directly relate to courses in women in sport, gender issues, women's studies, sport in American society, and twentieth century "herstory." Anyone interested in the women's sports movement and issues related to women's opportunities for sports participation should find this

text a valuable resource.

Sport in Contemporary Society-D. Stanley Eitzen 2005 This text has been renowned and widely used in courses for its accessible articles by scholars and journalists about many controversial dimensions of sport, including overzealous competition, inequalities of gender and race, the role of the media, and the influence of money in both professional and school athletics. Nearly half the articles presented here are new to this edition, reflecting the latest trends and analysis. The seventh edition is essential reading in courses on sociology of sport and on the foundations of physical education.

The Global Politics of Sport-Lincoln Allison 2005 Sport presents one of the most advanced cases of 'globalisation,' arguably because there are fewer cultural and political obstacles to the development of trade and international power in sport than there are in other fields. Thus there has been a change in the nature of the politics of sport since the end of the Cold War; the subject must be rewritten to acknowledge a twenty-first century world in which international sporting organisations and transnational corporations have become far more important than states. The Global Politics of Sport presents a range of essays examining the emerging global political issues in twenty-first century sport including:

- The role, and power of organisations such as FIFA and the IOC
- The influence of US exceptionalism
- The construction of global sports heroes
- Tensions developing within traditionally 'alternative' sports in a global commercial culture

The Global Politics of Sport presents new and fresh exploration of different conceptions of sport as a purely commercial activity and as an activity as embodying 'higher' social and ethical values.

The Politics of Sport-Lincoln Allison 1986

Paradoxes of Youth and Sport-Margaret Gatz 2002-03-28 Highlights the practical benefits and the many problems of youth and sports in the United States.

Defining Landscape Democracy-Shelley Egoz 2018-06-29 This stimulating book explores theories, conceptual frameworks, and cultural approaches with the purpose of uncovering a cross-cultural understanding of landscape democracy, a concept at the intersection of landscape, democracy and spatial justice. The authors of Defining Landscape Democracy address a number of questions that are critical to the contemporary discourse on the right to landscape: Why is democracy relevant to landscape? How do we democratise landscape? How might we achieve landscape and spatial justice?

In the Game-Eric Anderson 2010-03-10 Examines the relationship between gay male athletes, sport, and American masculinity.

Peer Power-Patricia A. Adler 1998 Children's peer culture, as it is nourished in those spaces where grownups cannot penetrate, stands between individual children and the larger adult society. As such, it is a mediator and shaper, influencing the way children collectively interpret their surroundings and deal with the common problems they face.

Taking Sport Seriously-Peter Donnelly 2011-01

Religion and Sports-Rebecca T. Alpert 2015-05-05 Like religion, playing and watching sports is a deeply meaningful, celebratory ritual enjoyed by millions across the world. The first scholarly work designed for use in both religion and sports courses, this collection develops and then applies a theoretically grounded approach to studying sports engagement globally and its relationship to modern-day issues of violence, difference, social protest, and belonging. Case studies explore the place of sports in mainstream faiths, such as Judaism, Islam, Buddhism, and Christianity, and lesser-known religious groups, particularly in Africa. It covers football, baseball, and basketball but also archery, soccer, bullfighting, judo, and track. Essays reflect all skill levels, from amateur to professional, and find surprising affinities among practices and cultures in locations as disparate as Germany and Japan, Spain and Saudi Arabia. Thoroughly examining a range of phenomena, this collection fully captures the unique overlap of two universal institutions and their interplay with human society, politics, and culture.

Title IX-Linda Jean Carpenter 2005 Title IX delivers a complete look at one of sport's critical gender equity issues. It goes beyond intercollegiate athletics to address Title IX in the context of sport, physical activity, recreation, intramurals, and physical education. From its enactment in 1972, Title IX has been often oversimplified or misunderstood by both advocates and critics of the legislation. Knowledgeable in the legal issues of sport and experienced in the administration of sport and physical education programs, the authors of Title IX offer a balanced, comprehensive view of this issue, lending important insights into Title IX's requirements and application both now and when it was enacted. Title IX, the law, prohibits any education program or activity receiving federal financial assistance from discriminating on the basis of sex. Title IX, the text, helps to clarify the law in a three-part progression that is accurate and accessible. In Part I, you will see Title IX's structure and requirements applied in different settings

Downloaded from [liceolefilandiere.it](http://liceolefilandiere.it) on January 18, 2021 by guest

including physical education, intramurals and recreation, and athletics. Part II then provides a historical account of the social, legislative, and judicial environments in which Title IX has grown to maturity over the past three decades. Finally, part III examines Title IX in the 21st century, its impact on sport related programs, and continuing debates. Title IX will also help you gain a solid understanding of the law itself. You will examine the actual wording of the law and related interpretive materials. You'll review significant lawsuits as you explore how the legislation has been interpreted and judicially clarified over the years in changing social and political climates. You'll find further clarifying information in summaries and questions and answers at the end of each chapter. Six appendixes provide pertinent excerpts from Title IX regulations, policy interpretations, letters of clarification, and an annotated list of other print and online resources. Whether you're looking for clarification of Title IX or for information on applying it in your programs, you'll find the information you need in Title IX.

Judaism and Disability-Judith Z. Abrams 1998 Judaism and Disability delves into all of the ancient texts and their explications, including the Tanach, the Hebrew acronym for the Jewish Bible, the Mishnah, considered the foundation of rabbinic literature, and the Bavli, the Babylonian Talmud. Instead of imposing a contemporary consciousness upon these archaic works, this carefully researched book presents their viewpoints as written, in an effort to understand why they expressed the sensibilities that they did.

Sport-- Commerce-- Culture-David L. Andrews 2006 This collection of eight critical sociological essays by David L. Andrews on sport and culture is heavily influenced by the work of C. Wright Mills, which insisted on the need to anchor any examination of social existence within the historical moment and conditions that frame it.

Racism in College Athletics-Dana D. Brooks 2013-01-01 This substantially revised edition retains the rich history and context that made the first two editions so widely acclaimed. Yet this third edition not only expands on the hurdles and triumphs of African American student-athletes, but it also examines the injustices toward and successes of coaches, administrators, and international student-athletes. Editors Dana Brooks and Ronald Althouse have assembled an elite collection of scholars in order to provide readers with the most authoritative text on the topic of racism in intercollegiate athletics. The 17 chapters are broken down into seven sections: Historical Analysis of Racism in College Sports. Recruitment, Retention, and NCAA Rules and Regulations. Gender and Race

Intersections, The African American Student-Athlete and Popular Culture. Race, Gender, and Fan Support. Racism, Media Exposure, and Stereotyping. Diversity Beyond Black and White. Instructors will find the text equally useful in sport management and sport sociology courses focusing on racism and diversity.

Muslim Women and Sport-Tansin Benn 2010-07-12 Examining the global experiences, challenges and achievements of Muslim women participating in physical activities and sport, this important new study makes a profound contribution to our understanding of both contemporary Islam and the complexity and diversity of women's lives in the modern world. The book presents an overview of current research into constructs of gender, the role of religion and the importance of situation, and looks closely at what Islam has to say about women's participation in sport and what Muslim women themselves have to say about their participation in sport. It highlights the challenges and opportunities for women in sport in both Muslim and non-Muslim countries, utilizing a series of extensive case-studies in various countries which invite the readers to conduct cross-cultural comparisons. Material on Iraq, Palestine and Bosnia and Herzegovina provides rare insights into the impact of war on sporting activities for women. The book also seeks to make important recommendations for improving access to sport for girls and women from Muslim communities. Muslim Women and Sport confronts many deeply held stereotypes and crosses those commonly quoted boundaries between 'Islam and the West' and between 'East and West'. It makes fascinating reading for anyone with an interest in the interrelationships between sport, religion, gender, culture and policy.

Out in Sport-Eric Anderson 2016-02-12 Research has shown that since the turn of the millennia, matters have rapidly improved for gays and lesbians in sport. Where gay and lesbian athletes were merely tolerated a decade ago, today they are celebrated. This book represents the most comprehensive examination of the experiences of gays and lesbians in sport ever produced. Drawing on interviews with openly gay and lesbian athletes in the US and the UK, as well as media accounts, the book examines the experiences of 'out' men and women, at recreational, high school, university and professional levels, in addition to those competing in gay sports leagues. Offering a new approach to understanding this important topic, Out in Sport is essential reading for students and scholars of sport studies, LGBT studies and sociology, as well as sports practitioners and trainers.

Sport and Postcolonialism-John Bale 2020-05-27 Compared with modes of

representation such as literature, drama, poetry and dance, the world of sport has been largely neglected in postcolonial studies. At both local and global levels, however, sport has been profoundly affected by the colonial legacy. How are individual nations and different sporting cultures coping with this legacy? What does the end of colonialism mean within particular states and sports? How is postcolonialism linked with struggles of race and identity? Sport was a major tool of colonial power and postcolonialism manifests itself in the modern sporting world in several ways, including the huge number of world class athletes from former European empires and the exploitation of child-workers in postcolonial nations by the sporting goods industries. Many former colonial states place considerable importance on elite sport as a form of representation, yet a small number of such states oppose sport in its western form. This book explores the wealth of issues and experiences that comprise the postcolonial sporting world and questions whether sport can act as a form of resistance in postcolonial states and, if so, how such resistance might manifest itself in the rule-bound culture of sport. Its novel approach and topical focus makes this book essential reading for anyone interested in contemporary sports, postcolonialism, race and ethnic studies.

*Game Day and God*-Eric Bain-Selbo 2009 This book tells about the religion of Southeastern Conference football. "Game Day and God: Football, Faith, and Politics in the American South" takes seriously the often-stated assertion that college football in the South is a religion. To this end, Eric Bain-Selbo draws upon a wide range of theoretical approaches in religious studies and cultural criticism. He also relies upon field research on several campuses in the Southeastern Conference where he interviewed fans and experienced 'game day'. Consequently, the author is able to make the case that college football does function religiously for many people in the South. In addition, the author introduces key concepts and theories of religion and culture to a general audience. "Game Day and God" also recounts the role that college football has played in Southern history and culture. Going back as far as the Civil War, the work explains the cultural meaning of college football in the South, delivering a much-needed critical perspective to the subject. Scholars of religion will find the work a compelling extension of key concepts and theories to an otherwise 'secular' activity. Scholars of American culture and sports will find the work to be an interesting case study, one that - unlike much work in the area - focuses our attention on the religious dimension of the phenomenon of sport in American culture. And

general readers will find that college football or any sport can be much more than they imagined as well as discover important theories with which to make sense of the complexity of our daily lives.

*Athletes and Acquaintance Rape*-Jeff Benedict 1998-03-09 This book takes a provocative look at specific aspects of professional athletic life that contribute to a climate favourable to athletes sexually assaulting women - a climate which also protects offenders from conviction and punishment. The book focuses on three high-profile incidents, and concludes that the problem is generated more by celebrity than athletic prowess: jurors are unable to reach an unbiased verdict because the athletes are held in such high esteem by the public.

*Playing on the Periphery*-Tara Brabazon 2006-04-18 Part of the Sport in the Global Society series, this innovative and creative text explores collective history, memory, and sport culture, tracking the passage of sports away from England. The author investigates why 'elite' English sports - such as rugby and cricket - became national sports in New Zealand and Australia, and asks why 'working class' English sports - such as football - have travelled less well to these areas. Focusing on these sports, the author tracks narratives and myths, tracing the passage of colonial truths, behaviours and practices. Clearly defined sections in the book focus on: \* sport and tourism \* sport and history \* sport and memory. Using a refreshingly broad range of sources to analyze differences between popular culture and sporting memory, this book offers new perspectives on sport and makes an interesting reference for masters and postgraduate readers in sport and cultural studies.

*Gender Politics and the Olympic Industry*-H. Lenskjy 2016-01-12 This book explores how the Olympic industry has shaped hegemonic concepts of sporting masculinities and femininities for its own profit and image-making ends, examining its continuing marginalization of athletes on account of their race, ethnicity, gender, sexuality and class.

*Diversity and Inclusion in Libraries*-Shannon D. Jones 2019-07-24 This book explores some of the challenges that libraries and librarians face due to diversity and inclusion issues among library staff, as well as the patrons that they serve. Its goal is to increase awareness of and sensitivity to the social, cultural, and educational needs of everyone involved.

*Men and Masculinities*-Eric Anderson 2019-04-08 Eric Anderson is Professor of Sport, Masculinities, and Sexualities at the University of Winchester. He is an interdisciplinary scholar who studies men's changing

masculinities and sexualities. Professor Anderson is the architect of Inclusive Masculinity Theory and has published nineteen books and over seventy research articles. Rory Magrath is Senior Lecturer in the School of Sport, Health and Social Sciences at Southampton Solent University. His research focuses on decreasing homophobia and the changing nature of contemporary masculinities, with a specific focus on professional football.

He is the author of Inclusive Masculinities in Contemporary Football: Men in the Beautiful Game (2016) and coauthor of Out in Sport: The Experiences of Openly Gay and Lesbian Athletes in Competitive Sport (2016).
