big budget video, and other topics.
Creation and Chaos in the Primeval Era and the Eschaton-Hermann Gunkel 2006-10-10 Foreword by Peter Machinist Hermann Gunkel's groundbreaking Schöpfung und Chaos, originally published in German in 1895, is here translated in its entirety into English for the first time. Even though available only in German, this work by

Gunkel has had a profound influence on modern biblical scholarship. Discovering a number of parallels between the biblical creation accounts and a Babylonian creation account, the Enuma Elish, Gunkel argues that ancient Babylonian traditions shaped the Hebrew people's perceptions both of God's creative activity at the beginning of time and of God's re-creative activity at the end of time. Including illuminating introductory pieces by eminent scholar Peter Machinist and by translator K. William Whitney, Gunkel's *Creation and Chaos* will appeal to serious students and scholars in the area of biblical studies.

Male Roles, Masculinities and Violence-Expert Group Meeting on Male Roles and M 2000 This book is based on an expert group meeting entitled 'Male Roles and Masculinities in the Perspective of a Culture of Peace', which was organised by UNESCO in Oslo, Norway in 1997, the first international discussion of the connections between men and masculinity and peace and war. The group consisted of researchers, activists, policy makers and

administrators and the aim of the meeting was to formulate practical suggestions for change. Chapters in the book consist of both regional case studies and social science research on the connections of traditional masculinity and patriarchy to violence and peace building. The Culture of Peace initiatives in this book show how violence is ineffective, and the book contests the views in the socialisation of boy-children that aggressiveness, violence and force are an acceptable means of expression.

A Dictionary of English Synonymes and Synonymous Or Parallel Expressions-Richard Soule 1889

The Big Book of Words You Should Know-David Olsen 2008-12-17 Do you know what "quatrefoil" and "impolitic" mean? What about "halcyon" or "narcolepsy"? This book is a handy, easy-to-read reference guide to the proper parlance for any situation. In this book you will find: Words You Absolutely Should Know (covert, exonerate, perimeter); Words You Should Know But Probably Don't (dour, incendiary, scintilla); Words Most People Don't Know (schlimazel,

thaumaturgy, epergne); Words You Should Know to Sound Overeducated (ad infinitum, nugatory, garrulity); Words You Probably Shouldn't Know (priapic, damnatory, labia majora); and more. Whether writing an essay, studying for a test, or trying to impress friends, family, and fellow cocktail party guests with their prolixity, you will achieve magniloquence, ebullience, and flights of rhetorical brilliance.

Robert B. Parker's Wonderland-Ace Atkins 2013-05-07 SOON TO BE A NETFLIX FILM STARRING MARK WAHLBERG AS SPENSER! Old friends. Small favors. Bitter rivals. Stirred together, it all makes for one explosive cocktail in this New York Times bestselling thriller that has Spenser feeling the heat... Henry Cimoli and Spenser have been friends for years, yet the old boxing trainer has never asked the private eye for a favor. Until now. A developer is trying to buy up Henry's condo on Revere Beach—with a push from local thugs. Soon Spenser and his

apprentice, Zebulon Sixkill, are on the trail of a mysterious woman, a megalomaniacal Las Vegas kingpin, and a shady plan to turn a chunk of land north of Boston into a sprawling casino. As alliances shift and twisted dreams surface, the Boston political machine looks to end Spenser's investigation one way or another—and once and for all.

The American Racing Pigeon News- 1978

The Severed Head-Julia Kristeva 2012 Julia Kristeva turns her famed critical eye to a study of the human head as symbol and metaphor, as religious object and physical fact, further developing a critical theme in her work--the power of horror--and expanding the potential for the face to provide an experience of the sacred. Kristeva's study stretches far back in time to 6,000 B.C.E. with humans' early decoration and worship of skulls, and follows with an examination of the Medusa myth; the mandylion of Laon (a holy relic in which the face of a saint appears on a piece of cloth); the biblical stories of John the Baptist and Salome; tales of the

guillotine; modern murder mysteries; and the rhetoric surrounding the fight for and against capital punishment. Drawing numerous connections between these "capital visions" and their experience, Kristeva affirms the possibility of the sacred, even in an era of "faceless" interaction.

Refiguring the Archive-Carolyn Hamilton
2012-12-06 Refiguring the Archive at once expresses cutting-edge debates on 'the archive' in South Africa and internationally, and pushes the boundaries of those debates. It brings together prominent thinkers from a range of disciplines, mainly South Africans but a number from other countries. Traditionally archives have been seen as preserving memory and as holding the past. The contributors to this book question this orthodoxy, unfolding the ways in which archives construct, sanctify, and bury pasts. In his contribution, Jacques Derrida (an instantly recognisable name in intellectual discourse worldwide) shows how remembering can never be separated from forgetting, and argues that the archive is about the future rather than the past.

Collectively the contributors demonstrate the degree to which thinking about archives is embracing new realities and new possibilities. The book expresses a confidence in claiming for archival discourse previously unentered terrains. It serves as an early manual for a time that has already begun.

Talking it Through-Miranda Forsyth 2015-05-05
Sorcery and witchcraft practices and beliefs are pervasive across Melanesia. They are in part created by, and give rise to, a wide variety of poor social and developmental outcomes. These include uneven economic development, low public health, lack of social cohesion, crime, fear and insecurity. A further very visible problem is the attacks on men and women who are accused of being practitioners of witchcraft or sorcery, which can lead to serious bodily harm, banishment and sometimes death. Today, many communities, individuals, church organisations and policymakers in Melanesia and internationally are exploring ways to overcome the negative social outcomes associated with witchcraft and sorcery practices and beliefs. This

book brings together a collection of chapters written by a diverse range of authors, both Melanesian and non-Melanesian, providing crucial insights both into how these practices and beliefs are playing out in contemporary Melanesia, and also the types of interventions that are being trialled or debated to address the problems associated with them.

Deconstructing Development Discourse-Andrea Cornwall 2010 Writing from diverse locations, contributors critically examine some of the key terms in current development discourse. The reflections included here raise major questions about how we think about development itself. Book World- 1967

Noncanonical Amino Acids-Edward A. Lemke 2019-06-04 This volume covers some of the most widely used protocols on nanocanonical amino acids, providing details and advice for users to get each method up and running for their chosen application. Chapters have been divided into three parts describing methods for protein production in the test tube, in prokaryotes, and in eukaryotes. Written in the highly successful

Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, Noncanonical Amino Acids: Methods and Protocols aims to provide readers with techniques that enable them to design new experiments and create new areas of research. Shadow of the Conqueror-Shad M. Brooks 2019-07 Who better to fight back the darkness of the world than the one responsible for most of it? Daylen, once known as the Great Bastard, the Scourge of Nations, Dayless the Conqueror, has lived in hiding since his presumed death. Burdened by age and tremendous guilt, he thinks his life is coming to an end. Unbeknownst to him he's about to embark on a journey towards redemption where his ruthless abilities might save the world. Many battles await with friends to be made and a past filled with countless

crimes to confront, all the while trying to keep his true identity a secret. Indeed, it might be too much if not for the fabled power awaiting him. Everfall is a world of perpetual day where the continents float in an endless sky. If one jumps from the continent they will fall for many hours before returning to the same place from which they fell. Skyships rule the air powered by shining sunstone and industrial darkstone. A legendary order of knights bears mystical powers which they use to hunt out the dreaded Shade, monsters that regular people turn into if trapped in darkness for the length of a fall. It is a world of enchanted swords, merciless monsters, mystical knights and hard magic, filled with tales of wonder and adventure.

Ethics for A-Level-Mark Dimmock 2017-07-31
What does pleasure have to do with morality? What role, if any, should intuition have in the formation of moral theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these questions and many more. Key ideas in the fields of normative ethics, metaethics and applied

ethics are explained rigorously and systematically, with a vivid writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the complexities of different ethical approaches while conveying their modern-day relevance. This concise and highly engaging resource is tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical use for those teaching Philosophy as part of the International Baccalaureate. Ethics for A-Level is of particular value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics.

Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies.

Wealth And Poverty Of Nations-David S. Landes
2015-04-20 The history of nations is a history of haves and have-nots, and as we approach the millennium, the gap between rich and poor countries is widening. In this engrossing and important new work, eminent historian David Landes explores the complex, fascinating and often startling causes of the wealth and poverty of nations. The answers are found not only in the large forces at work in economies: geography, religion, the broad swings of politics, but also in the small surprising details. In Europe, the invention of spectacles doubled the working life of skilled craftsmen, and played a prominent role in the creation of articulated machines, and in China, the failure to adopt the clock fundamentally hindered economic development. The relief of poverty is vital to the survival of us all. As David Landes brilliantly shows, the key to future success lies in understanding the lessons the past has to teach us - lessons uniquely imparted in this groundbreaking and vital book

which exemplifies narrative history at its best.

The Death Penalty-Ernest Van den Haag
2013-06-29 From 1965 until 1980, there was a virtual moratorium on executions for capital offenses in the United States. This was due primarily to protracted legal proceedings challenging the death penalty on constitutional grounds. After much Sturm und Drang, the Supreme Court of the United States, by a divided vote, finally decided that "the death penalty does not invariably violate the Cruel and Unusual Punishment Clause of the Eighth Amendment." The Court's decisions, however, do not moot the controversy about the death penalty or render this excellent book irrelevant. The ball is now in the court of the Legislature and the Executive. Legislatures, federal and state, can impose or abolish the death penalty, within the guidelines prescribed by the Supreme Court. A Chief Executive can commute a death sentence. And even the Supreme Court can change its mind, as it has done on many occasions and did, with respect to various aspects of the death penalty itself, during the moratorium period. Also, the

people can change their minds. Some time ago, a majority, according to reliable polls, favored abolition. Today, a substantial majority favors imposition of the death penalty. The pendulum can swing again, as it has done in the past.

Vocabulary 4000-Jeff Kolby 2021-01-15 Other vocabulary books list difficult, esoteric words that readers quickly forget or feel self-conscious about using. Here there is a bounty of choice words, between the common and the esoteric, that will flow forth, once learned. Brief Description: English offers perhaps the richest vocabulary of all languages, in part because its words are culled from so many languages. It is a shame that we do not tap this rich source more often in our daily conversation to express ourselves more clearly and precisely. Many a vocabulary book lists esoteric words we quickly forget or feel self-conscious using. However, there is a bounty of choice words between the common and the esoteric that often seem to be just on the tip of our tongue. Vocabulary 4000 brings these words to the fore. All the words you need for success in business, school, and life! Features:

* Word Analysis section* Idiom and Usage section* 200 Prefixes, Roots, and Suffixes* Concise, practical definitions* Great for the SAT, GRE and other entrance exams.

We Are Legion (We Are Bob)-Dennis E. Taylor 2017-04-14 Bobiverse fans: a signed limited edition of all three books in a boxed set, signed by the author, is now available on Amazon. Look for The Bobiverse [Signed Limited Edition] on Amazon Bob Johansson has just sold his software company and is looking forward to a life of leisure. There are places to go, books to read, and movies to watch. So it's a little unfair when he gets himself killed crossing the street. Bob wakes up a century later to find that corpsicles have been declared to be without rights, and he is now the property of the state. He has been uploaded into computer hardware and is slated to be the controlling AI in an interstellar probe looking for habitable planets. The stakes are high: no less than the first claim to entire worlds. If he declines the honor, he'll be switched off, and they'll try again with someone else. If he accepts, he becomes a prime target. There are at

least three other countries trying to get their own probes launched first, and they play dirty. The safest place for Bob is in space, heading away from Earth at top speed. Or so he thinks. Because the universe is full of nasties, and trespassers make them mad - very mad.

Who Buries the Dead-C. S. Harris 2016-03

London, 1813. The decapitation of a wealthy plantation owner draws Sebastian St. Cyr into a macabre and perilous investigation filled with connections to seventeenth-century monarchs, the Home Secretary and a brilliantly observant spinster named Jane Austen. But as one murder follows another, it is the connection between the victims and a ruthless former army officer, Lord Oliphant, that raises the stakes. Once, Oliphant nearly destroyed Sebastian in a horrific act of betrayal. Now he poses a threat to Sebastian and everyone he holds dear.

Stiff: The Curious Lives of Human Cadavers-Mary Roach 2004-05-17 "One of the funniest and most unusual books of the year....Gross, educational, and unexpectedly sidesplitting."—Entertainment Weekly Stiff is an oddly compelling, often hilarious exploration of the strange lives of our bodies postmortem. For two thousand years, cadavers—some willingly, some unwittingly—have been involved in science's boldest strides and weirdest undertakings. In this fascinating account, Mary Roach visits the good deeds of cadavers over the centuries and tells the engrossing story of our bodies when we are no longer with them.

The War of a Million Cuts-Manfred Gerstenfeld 2015-05-06 For the first time ever, a book unravels the complex process of the tremendous delegitimization efforts directed toward Israel. "The War of a Million Cuts" explains how these attempts at the delegitimization of Israel, as well as anti-Semitism can be fought. The book describes the hateful messages of those who defame Israel and the Jews, details why anti-Semitism and anti-Israelism have the same core

motifs, and discusses the main groups of inciters, including Muslim states, Muslims in the Western world, politicians, media, NGOs, church leaders, those on the extreme left and the extreme right, Jewish self-haters, academics, social democrats and many others. It explains how the hate messages are effectively transmitted to the public at large, and discusses what impact the delegitimization has already made on Israel and the Jews.

A History of Modern Psychology-Duane Schultz 2013-10-02 A History of Modern Psychology, 3rd Edition discusses the development and decline of schools of thought in modern psychology. The book presents the continuing refinement of the tools, techniques, and methods of psychology in order to achieve increased precision and objectivity. Chapters focus on relevant topics such as the role of history in understanding the diversity and divisiveness of contemporary psychology; the impact of physics on the cognitive revolution and humanistic psychology; the influence of mechanism on Descartes's thinking; and the evolution of the third force,

humanistic psychology. Undergraduate students of psychology and related fields will find the book invaluable in their pursuit of knowledge.

Opening Skinner's Box: Great Psychological Experiments of the Twentieth Century-Lauren Slater 2005-02-17 Through ten examples of ingenious experiments by some of psychology's most innovative thinkers, Lauren Slater traces the evolution of the century's most pressing concerns—free will, authoritarianism, conformity, and morality. Beginning with B. F. Skinner and the legend of a child raised in a box, Slater takes us from a deep empathy with Stanley Milgram's obedience subjects to a funny and disturbing re-creation of an experiment questioning the validity of psychiatric diagnosis. Previously described only in academic journals and textbooks, these often daring experiments have never before been narrated as stories, chock-full of plot, wit, personality, and theme.

Dark Ecology-Timothy Morton 2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip,

twisted to have only one side. Deckard travels this oedipal path in Blade Runner (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us

rediscover the playfulness and joy that can brighten the dark, strange loop we traverse. 1100 Words You Need to Know-Murray Bromberg 1993 Contains over two hundred lesson plans that introduce students to new vocabulary words, each with a list of words with pronunciation keys, a paragraph that uses the words in context, sample sentences, definitions, and a daily idiom.

Perverse Subsidies-Norman Myers 2001
US Defense Politics-Harvey M. Sapolsky 2013-12-04 This textbook provides an accessible overview of US defense politics for upper-level students. This new edition has been fully updated and revised, with a new chapter on intelligence and new material on unmanned drones, women in the military, the Tea Party, and other key issues. Analyzing the ways in which the United States prepares for war, the authors demonstrate how political and organizational interests determine US defense policy and warn against over-emphasis on planning, centralization, and technocracy. Emphasizing the process of defense policy-making rather than just the outcomes of that process, US Defense Politics departs from the traditional style of many existing textbooks. Designed to help students understand the practical side of American national security

policy, the book examines the following key themes: US grand strategy; who joins America's military; how and why weapons are bought; the management of defense; public attitudes toward the military and casualties; the roles of the President and the Congress in controlling the military; the effects of 9/11 and the Global War on Terror on security policy, homeland security, government reorganizations, and intra- and inter-service relations. The textbook will be essential reading for students of US defense politics, US national security policy and homeland security, and highly recommended for students of US foreign policy, US public policy and public administration.

Black Garden-Thomas De Waal 2003 "In Black Garden, Thomas de Waal tells the full story of this tragic quarrel and its aftermath for the first time. He travels the length and breadth of Armenia and Azerbaijan, talking to veterans, refugees and the inhabitants of ruined towns and villages. He recreates the story of the descent into conflict of two former Soviet neighbors, its disastrous consequences and the confused efforts

of the "Great Powers" - Russia, France and the United States - to bring peace to the Caucasus."--

Never Too Fast--Paul Ferriss 2001 The true story of the most dangerous racecar driver on the circuit ... Paul Tracy was just a youngster when he discovered fast cars. Growing up in West Hill, Ontario, Paul dreamt of his hero Gilles Villeneuve, and when his father left him at the local go-kart track with a full tank of gas each morning, he retrieved Paul -- and the empty tank -- at night. Tracy rose quickly through racing's minor leagues, setting and breaking records as he went. At 17 he was racing cars with twice the horsepower of the family cars his friends were just learning to drive. Veteran team managers and drivers knew they were seeing someone special on the track: a quiet kid with the looks of a boy scout and the desire of a champion. Soon Tracy dominated kart racing, won at Can-Am racing, and ruled Indy Lights. He then stormed into the Championship Auto Racing Team circuit, racing wheel to wheel with Emerson Fittipaldi and Mario Andretti. In those early races, even

driving an underpowered car, Tracy proved he could run with the big boys. But Paul Tracy's success has come with its share of hardships. His aggressive driving style on the cart circuit has made almost as many enemies as fans. He's been criticized, penalized, and vilified both on and off the track. Nevertheless, two things remain consistent -- his desire to drive fast, and his desire to win. When you live in a world of speed and danger, a world where success is measured in tenths of seconds and inches can separate winners from losers, one thing is certain: you can never be too fast.

Paradoxes of Gender--Judith Lorber 1994 In this pathbreaking book, a well-known feminist and sociologist--who is also the Founding Editor of Gender & Society--challenges our most basic assumptions about gender. Judith Lorber views gender as wholly a product of socialization subject to human agency, organization, and interpretation. In her new paradigm, gender is an institution comparable to the economy, the family, and religion in its significance and consequences. Drawing on many schools of

feminist scholarship and on research from anthropology, history, sociology, social psychology, sociolinguistics, and cultural studies, Lorber explores different paradoxes of gender: -- why we speak of only two "opposite sexes" when there is such a variety of sexual behaviors and relationships; --why transvestites, transsexuals, and hermaphrodites do not affect the conceptualization of two genders and two sexes in Western societies; --why most of our cultural images of women are the way men see them and not the way women see themselves; --why all women in modern society are expected to have children and be the primary caretaker; --why domestic work is almost always the sole responsibility of wives, even when they earn more than half the family income; --why there are so few women in positions of authority, when women can be found in substantial numbers in many occupations and professions; --why women have not benefited from major social revolutions. Lorber argues that the whole point of the gender system today is to maintain structured gender inequality--to produce a subordinate class

(women) that can be exploited as workers, sexual partners, childbearers, and emotional nurturers. Calling into question the inevitability and necessity of gender, she envisions a society structured for equality, where no gender, racial ethnic, or social class group is allowed to monopolize economic, educational, and cultural resources or the positions of power. Structure and Function of the Bacterial Genome- Charles J. Dorman 2020-04-28 Presents an integrated view of the expression of bacterial genetic information, genome architecture and function, and bacterial physiology and pathogenesis This book blends information from the very latest research on bacterial chromosome and nucleoid architecture, whole-genome analysis, cell signaling, and gene expression control with well-known gene regulation paradigms from model organisms (including pathogens) to give readers a picture of how information flows from the environment to the gene, modulating its expression and influencing the competitive fitness of the microbe. Structure and Function of the Bacterial Genome explores

the governance of the expression of the genes that make a bacterium what it is, and updates the basics of gene expression control with information about transcription promoter structure and function, the role of DNA as a regulatory factor (in addition to its role as a carrier of genetic information), small RNAs, RNAs that sense chemical signals, ribosomes and translation, posttranslational modification of proteins, and protein secretion. It looks at the forces driving the conservation and the evolution of the dynamic genome and offers chapters that cover DNA replication, DNA repair, plasmid biology, recombination, transposition, the roles of repetitive DNA sequences, horizontal gene transfer, the defense of the genome by CRISPR-Cas, restriction enzymes, Argonaute proteins and BREX systems. The book finishes with a chapter that gives an integrated overview of genome structure and function. Blends knowledge of gene regulatory mechanisms with a consideration of nucleoid structure and dynamics Offers a 'DNA-centric' approach to considering transcription control Views horizontal gene

transfer from a gene regulation perspective Assesses the opportunities and limitations of designing synthetic microbes or rewiring existing ones Structure and Function of the Bacterial Genome is an ideal book for graduate and undergraduate students studying microbial cell biology, bacterial pathogenesis, gene regulation, and molecular microbiology. It will also appeal to principal investigators conducting research on these and related topics and researchers in synthetic biology and other arms of biotechnology.

Steven Spielberg and Philosophy-Dean A. Kowalski 2008-11-21 Without question, few directors have had such a powerful influence on the film industry and the moviegoing public as Steven Spielberg. Often referred to as the most successful American filmmaker of all time, Spielberg has been nominated for the Academy Award for Best Director six times, winning twice -- for Schindler's List in 1994 and Saving Private Ryan in 1999. Seven of his films have received the Best Picture Oscar nomination. He has brought to life some of the most popular heroes

of all time, such as Indiana Jones, as well as some of the most despised villains, including Amon Goeth from Schindler's List and the killer shark from Jaws. Whatever the subject -- dinosaurs, war, extra-terrestrials, slavery, the Holocaust, or terrorism -- one clear and consistent touchstone is present in all of Spielberg's films: an interest in the human condition. In Steven Spielberg and Philosophy, Dean A. Kowalski and some of the nation's most respected philosophers investigate Spielberg's art to illuminate the nature of humanity. The book explores rich themes such as cinematic realism, fictional belief, terrorism, family ethics, consciousness, virtue and moral character, human rights, and religion in Spielberg's work. Avid moviegoers and deep thinkers will discover plenty of common ground in this collection.

The Divine Province: Birthing New Earth-Ed Rychkun 2013-01-07 In The Divine Province, Jaemes McBride and Ed Rychkun answer a 26,000 year old question of how we manifest and maintain the Golden Age. They bring into reality the New Earth consciousness unfolding during

the End Times. Taking readers on a 6000 year journey of Old Earth, they expose how Earthlings have been ruled by Elite powers and how their means of conquest has been religion and commerce under a corporate model of PLANET EARTH INC. Learn how the silent dominion has separated the Earthlings from spirit, accepting the physical slavery of the body vessel, disguising the truth of who they are. Now at the end of a 26,000 year cycle, a new consciousness has awakened multitudes of sleeping imprisoned souls to bring a New Earth into awareness, threatening the Rulers dominion and their business plan of the New World Order. It is about an awakening of who we are. Learn how the Divine Province has rapidly evolved as an expression of the new consciousness. See how it is now manifesting the physical birthing of New Earth, bringing the means from above in 5D consciousness to below into 3D reality, embodying the manifestation of peace, love, abundance and prosperity upon Old Earth. Divine Province is rapidly being populated by Divine beings of Light expressing themselves through

Divine physical vessels who know who they are.
In this book, the authors reveal how through
rising above polarity and fear, one can choose

the path leading to the alchemical gold of the
Golden Age under Divine Province
