Roadmap to Success: Inspiring Journeys of Ten Iconic Coptic Leaders-Dr. Shahira Abdel Shahid 2016-05-26 Dr. Shahira Abdel Shahid focused on Copts, or Christian Egyptians, to draw attention to their achievements and contributions to the Egyptian society, and to the world at large. She conducted in-depth interviews with ten iconic Coptic leaders, including an investment banker, a fashion designer, a Coptologist, an emeritus professor of medicine, a renowned priest, and others. Women are equally represented to emphasize the important role played by women in society. The interviews covered various topics such as the interviewees mission, their values, their role models, the impact their Coptic faith had on their success, their definition of leadership, the challenges they have met, the lessons they have learned, their daily schedules, their future projects, and the impact they want to leave on the world. The book will motivate any person facing difficulties or challenges, living in Egypt or in another country, to be positive, proactive, have faith, take action to change his or her circumstances, and fulfill his or her mission. If youre facing any type of challenge, youll be inspired by the message of hope in Roadmap to Success. RECENT RECOGNITION: The Middle East Outreach Council (MEOC) is a US national non-profit organization established in 1981. It is working to increase public knowledge about peoples, places, and cultures of the Middle East. MEOC established the Annual Middle East Book Award in 1999 to recognize books for children and young adults that contribute meaningfully for the understanding of the Middle East. Books that are nominated for the awards are judged on the authenticity of their portrayal of a Middle Eastern subject, as well as, their characterization, plot and appeal for the intended audience. A committee of MEOC members including teachers, librarians, outreach coordinators, and other educators select award winners and (if deemed appropriate honorable mention titles) in three categories: - Picture Book - Youth Fiction - Youth Non-Fiction Results of 2017 Middle East Book Award Winners: -Youth Non Fiction Category 2017 Honorable Mentions Roadmap to Success: Inspiring Journeys of Ten Iconic Coptic Leaders by Shahira Abdel Shahid, (Archway Publishing, 2016) The announcement was made during MEOC Business Meeting that took place at Marriott Wardman Park Hotel, Washington D.C. on 19 November 2017.

Cultural Crossroads-Ann D. Clark, PhD 2016-01-22 Whether you are relocating for a month or a year, moving to Tokyo or Barcelona, going solo or bringing your family of five, Cultural Crossroads has all the information you need to make the most of your expatriate assignment. To be successful abroad, expatriates only need to change one thing EVERYTHING! Dr. Ann Clark Becoming an expatriate can be like starting life over. You effectively have a new job, with an entire new set of co-workers, whose culture and language are extremely different. Youll have to find a new house in a strange city, in a very short period of time. Your family will need to find new schools, friends, sports, day care, language classes and grocery stores. And they may be unhappy about all of this change and blame it on you! Why would anyone take on this seemingly impossible task? Because it is a once-in-a-lifetime opportunity for you and your family to see the world and get paid to do it. Thousands of American families have made the transition to living abroad successfully. Some even choose to stay. Cultural Crossroads will not only give you a roadmap for the expatriate process, but real life examples of people who are living the dream.

Health Equity-K. Bryant Smalley, Ph.D., Psy.D. 2020-08-15 Health Equity: A Solutions-Focused Approach is a comprehensive textbook that illustrates existing conditions of health disparities across a range of populations in the United States, positions those disparities within the broader sociopolitical framework that leads to their existence, and most importantly, presents specific ways in which health equity solutions can be designed and implemented. Presenting current theoretical foundations, cultural context, and evidence-based models and interventions all in one, this textbook provides students with the basis to achieve greater health equity in their communities. Edited by award-winning authors and featuring contributions from diverse experts in public health, sociology, psychology, and medicine, this groundbreaking text goes beyond a traditional approach to risk factors and disparities and emphasizes the central role that health equity initiatives must play in public health research and practice. The book is divided into three sections, with Section I focusing on providing the context of health equity research and practice. Chapters are structured in a way that both new and experienced students in the field will develop a deeper understanding of topics such as prejudice and discrimination; frameworks and theories; and research and collaboration approaches. Section II addresses the current knowledge of specific populations impacted by issues related to health equity, including African American, Latinx and Hispanic, Asian, American Indian and Alaska Native, Native Hawaiian and Pacific Islander, LGBTQ, Veteran, People with Disabilities, and many more. Authored or co-authored by members of the community being discussed, each of these chapters summarizes how health disparities impact the group, ongoing population-specific models of disparities and equity, emerging programs for achieving health equity, coverage of the most relevant aspects of intersectionality, and concluding exercises such as case studies and current events. Section III then highlights the role of cultural humility in achieving health equity. With its solutions-focused and community-affirming approach, Health Equity provides graduate and undergraduate students of public health with evidence-based models to help advance health through diversity, inclusion, and social justice. Key Features: Origins and Theories - Discusses the sociocultural and political origins of health disparities and the major theories that underlie an understanding of health equity Solutions-Focused - Describes emerging models and gives best practices in designing new programs Diverse Population Coverage - Provides historical context, sociocultural dynamics, and population-specific evidence-based programs from the voices of the communities being discussed Intersectionality Perspective - Highlights the role that overlapping and interdependent identities play in promoting health equity and the interventions that build from this perspective Case Studies and Real-World Examples - Demonstrates how to apply health equity improvement approaches in different contexts eBook access -Included with print purchase for use on most mobile devices or computers Instructor’s Packet - With an Instructor’s Manual, PowerPoint slides, Test Bank, and a Sample Syllabus

Intelligent Scene Modelling Information Systems-Georgios Miaoulis 2009-03-06 This book is dedicated to and contains the latest research in intelligent scene modelling information systems. Declarative scene modeling techniques are presented, as well as their implementation in an intelligent information system.

Engaged-Amy Bucher 2020-03-03 Behavior change design creates entrancing—and effective—products and experiences. Whether you’ve studied psychology or are new to the field, you can incorporate behavior change principles into your designs to help people achieve meaningful goals, learn and grow, and connect with one another. Engaged offers practical tips for design professionals to apply the psychology of engagement to their work.

Completing Your Qualitative Dissertation-Linda Dale Bloomberg 2015-11-05 Addressing one of the key challenges facing doctoral students, Completing Your Qualitative Dissertation by Linda Dale Bloomberg and Marie Volpe fills a gap in qualitative literature by offering comprehensive guidance and practical tools for navigating each step in the qualitative dissertation journey, including the planning, research, and writing phases. Blending the conceptual, theoretical, and practical, the book becomes a dissertation in action—a logical and cohesive explanation and illustration of content and process. The Third Edition maintains key features that distinguish its unique approach and has been thoroughly updated and expanded throughout to reflect and address recent developments in the field.

Digital Transformation for the Process Industries-Osvaldo A. Bascur 2020-10-28 Imagine if your process manufacturing plants were running so well that your production, safety, environmental, and profitability targets were being met so that your subject matter experts could focus on data-driven business improvements. Through proper use and analysis of your existing operations data, your company can become an industry leader and reward your stakeholders. Written in an engaging and easily understandable manner, this book demonstrates a step-by-step process of how an organization can effectively utilize technology and make the necessary culture changes to achieve operational excellence. You will see how several industry-leading companies have used an effective real-time data infrastructure for mission-critical business use cases. The book also addresses challenges involved, such as effectively integrating operational (OT) data with business (IT) systems to enable a more proactive, predictive management model for a fleet of process plants. Some of the things you will take away: Learn how a real-time data infrastructure enables transformation of raw sensor data into contextualized information for operational insights and business process improvement. Understand how reusing the same operational data for multiple use cases significantly impacts fleet management, profitability, and asset stewardship. See how a simple digital unit template representing

production flows can be repeatedly used to identify critical inefficiencies in plant operations. Discover best practices of deploying real-time situational awareness alerts and predictive analytics. Realize how to transform your organization into a data-driven culture for continuous sustainable improvement. Find out how leading companies integrate operations data with business intelligence and predictive analytics tools in a corporate on-premises or cloud-enabled environment. Learn how industry-leading companies have imaginatively used a real-time data infrastructure to improve yields, reduce cycle times, and slash operating costs. This book is targeted for process industries production and operations leadership, senior engineers, IT management, CIOs, and service providers to those industries. Academics will benefit from latest data analysis strategies. This book guides readers to use the best, results-proven approaches to ensure operational excellence.

From Dissertation to Book, Second Edition-William Germano 2014-02-27 When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. “You know something!” I would say if it could hear me. “Now tell it to us in language we can understand!” Since its publication in 2005, From Dissertation to Book has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of From Dissertation to Book is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, From Dissertation to Book reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add “author” to their curriculum vitae.

PhD [Alternative] Career Clinic-Jane Y. Chin 2011-04-24 In PhD [alternative] Career Clinic, Jane Y. Chin describes the realities of an academic "business" enterprise and how PhD graduates may know more about the business world than they realize. She offers practical advice on building mental toughness required of PhDs competing in an unforgiving job market and how PhDs can grow a social network that delivers value and results. PhD [alternative] Career Clinic reveals what employers really mean when they say that a PhD applicant is "overqualified," and how PhDs can gain transferable experience no matter where they are in their careers. This concise guide gives PhDs an insider’s look to employers’ thinking process and field-tested advice to help PhDs improve their odds of success when competing for careers outside academia.

Annual Review of Gerontology and Geriatrics, Volume 33, 2013-Jean-Marie Robine, PhD 2013-02-20 Developed countries and certain regions of economically emerging nations have displaying a rapidly growing population of the oldest-oldónonagenarians, centenarians, and supercentenarians. As this trend continues, we must redirect some of our research on aging to the experience of advanced old age and discovering individual and community factors that improve the quality of life during this life stage. This state-of-the science, multidisciplinary Annual provides a comprehensive discussion of the factors promoting healthy survival and/or ensuring a good quality of life for the oldest elderly. It features an international representation that includes Denmark, Finland, France, Italy, the Netherlands, the United Kingdom, Sweden, Japan, and North America. The Annual disseminates the most current research regarding this population and notes gaps in our knowledge. The book addresses ongoing demo-epidemiological changes regarding longevity, estimates of oldest-old populations, and prevalence of chronic and degenerative diseases, frailty, and old-age dependency. The meaning of healthy longevity as a theoretical concept is explored. Grounded in the fundamental issue of whether or not the prevalence of poor health or poor quality of life inevitably increases with age, recent research and ongoing studies from a variety of perspectives are presented from several nations. The book clarifies the known and hypothetical factors favoring healthy longevity, from genes to social integration. Additionally, chapters explore gender differences in age trajectories and changes over time. Special attention is given to the social and cognitive dimensions of healthy longevity. Key Features: Disseminates new scholarly research about a rapidly growing segment of the populationóthe oldest old Offers multidisciplinary and international perspectives about the factors that promote healthy survival and improve quality of life Addresses the social and cognitive dimensions of healthy longevity Provides important information regarding health care costs for this population Includes the research of seasoned and emerging scholars

Beliefs and Policymaking in the Middle East: Analysis of the Israeli-Palestinian Conflict-Linda Marie Saghi Aidan, PhD 2005-09-13 Click here to read an excerpt from the book. I have long tried to understand why the Arab-Israeli Conflict has not been resolved. Despite many attempts at regional and international negotiations since the time of the Mandate, the Conflict has persisted and the Palestinians still do not have a state. The continuation of the Palestinian question within the more general context of this issue places it at the heart of the Conflict and this is the reason why I centered my analysis on the Israelis and just the Palestinians (instead of all the Arab states in the region). Lack of a solution to the Arab-Israeli Conflict may thus be associated with absence of a state for the Palestinians. My case study begins with a brief introduction to trends in negotiations after which I come to my central research question: Why, despite all these attempts at negotiation had the Arab-Israeli Conflict not been resolved? I had a feeling the problem might have to do with beliefs. That is, both sides to the Conflict held (and some still hold) maximalist beliefs about having the whole of what was mandated Palestine for themselves. Both sides have made advances toward peace but the Conflict continues and the Palestinians still do not have a state. I assumed that unless both sides changed their beliefs regarding territory there would be no resolution to the Conflict. In my view, change was not a matter of eliminating a belief but changing the priority of one belief over another, i.e. to believe in peace instead of believing in having all the land of Palestine. Before developing some ideas about beliefs in the next section, I reviewed some of the literature in international relations that dealt with conflict analysis. Two of the more popular ones are the realist approach and organizational theory. Realist theorists Hans Morgenthau and Kenneth Waltz examine conflict in terms of maximizing interests, in particular power. (See Introduction.) Their approaches can explain situations where interests are clear-cut but power cannot always impose itself as is seen by international attempts at negotiation or even Israel’s efforts to impose a solution on the Palestinians. Organizational theory does not necessarily explain situations where state or government bureaucracies don’t exist, e.g. with the Palestinians during the time of the Mandate. I then decided to go ahead and see what beliefs had to offer to conflict analysis. In the section following the realist and organization discussion, I looked at beliefs from the standpoint of belief system theorists in international relations and from the psychological approaches that influenced them. In order to better examine beliefs and be able to use them to explain this Conflict (and perhaps others later), I formulated four questions and then looked at what belief system theorists and psychologists had to say about them: How were beliefs formed, were they consistent with behavior, could they change and if so, how. Two of the major theories in psychology were looked at: Attribution and learning. (See Introduction for more on these approaches.) From these two approaches we can learn much about how beliefs are formed and, in so doing, how they can change. For example, in interpreting incoming information individuals tend to attribute causes to explaining event. This causation process implies some reasoning ability and facilitates learning. One problem with attribution theory is that it indicates what an individual should do but the person is not always so careful in causal analysis. Still, the approach is valuable to understanding beliefs. These theories also highlight the importance of experience, as the past is so often the source of recurrent behavior. For any successful negotiation, communicat

Stuck-Jonathan Hoffman 2012 There are many challenges that children with Asperger’s syndrome (AS) will have to overcome to reach their highest potential. In order to help them progress in constructive ways, those who care for and about these children often need to make changes too, sometimes difficult ones. Stuck provides a roadmap for understanding and addressing the complexities of AS, especially the presence of obsessive-compulsive behaviors (OCBs) that so frequently complicate basic functioning for both the child and others involved in their lives. The more knowledge and skills that caregivers can gain about these issues the better. Whether you are a parent, an educator, or a healthcare professional that wants to increase their awareness about Asperger’s syndrome and obsessive-compulsive behaviors, you can benefit from the useful concepts and practical, action-oriented activities presented throughout this book.

Rhapsodie-Anne Lacheret-Dujour 2019-06-06 This monograph describes the development of Rhapsodie, a 33,000-word syntactic and prosodic treebank of spoken French created with the aim of modeling the interface between prosody, syntax and discourse in spoken French. Theoretical foundations and methodological choices

are presented and discussed, and compared with other contemporary approaches. Why is a data-driven instead of a corpus-based approach necessary when one wants to model and analyze discourse without neglecting the features typical of everyday speech, in order to capture not only what we say but also how we say it? How can one show that verbal exchange operates as a collaborative enterprise and how can the specific syntactic and prosodic markers of this collaboration be merged? The description proposed in this collective book is of interest for specialists of spoken French studies, and also for scholars who would like to extend Rhapsodie-like annotation schemes to other languages.

**Accordionly-Michael Genhart 2020** A boy who enjoys music and fun at his grandparents' homes ends the quiet in his own by persuading his grandfathers, who immigrated from different countries, to get out their accordions and play. Includes author's note about his own immigrant grandparents.

**South Africa's Energy Transition-Tobias Bischof-Niemz 2018-07-11** South Africa's energy transition has become a highly topical, emotive and politically contentious topic. Taking a systems perspective, this book offers an evidence-based roadmap for such a transition and debunks many of the myths raised about the risks of a renewable-energy-led electricity mix. Owing to its formidable solar and wind resources, South Africa has an almost unparalleled opportunity to turn solar photovoltaic and onshore wind generators into the country's power generation workhorses – a role hitherto played by coal. This book shows that a renewables-led mix will not only provide the lowest cost, but will also create more jobs than any of the alternatives currently under consideration. In addition, it offers a glimpse of how South Africa's low-cost and decarbonised electricity system can power a competitive industrial economy, an electric-mobility revolution and, in the long run, create new export opportunities. This book will be of great interest to energy industry practitioners, as well as students and scholars of energy policy and politics, environmental economics and sustainable development.

**Untethered-Carolyn Cooper, RN, PhD 2016** Mark is just four days old when Carolyn's pride shifts to concern. Why doesn't he cry? Where is his appetite? As a worried mother, Carolyn grasps for answers, but in 1960s North Carolina, "autism" is not yet a household word. Untethered traces the extraordinary forty-year evolution of both Mark and Carolyn as they struggle with what was then a baffling new disorder. When Mark further slips within the fortress of autism, Carolyn faces the unthinkable--institutionalizing her son. At the same time, Carolyn's marriage starts to unravel, forcing her to abandon her identity as a people-pleasing housewife and enter the working world as a single woman. Facing a life she never bargained for, Carolyn sets out on a path of self-discovery. Courageous, hopeful, and provocative, Untethered shows the unvarnished reality of one mother's experience with autism. It also teaches us that life's heartbreaks can illuminate the way toward spiritual growth and love.

**The Great Mistake-Christopher Newfield 2018-10-01** A powerful, hopeful critique of the unnecessary death spiral of higher education, The Great Mistake is essential reading for those who wonder why students have been paying more to get less and for everyone who cares about the role the higher education system plays in improving the lives of average Americans.

**Teen Triumph-Johanna Maheshvari Mosca, Ph.d. 2015-11-11** Teen Triumph: 10 Ways to a Winning Life brings the wisdom of ancient Yoga sages to empower teenagers to handle life's ups and downs. The book has an upbeat voice and lots of fun illustrations to demonstrate ten basic Yoga principles for maintaining well-being throughout life's challenges. The principles, shared by wandering sages for thousands of years before Christ, were recorded in Patanjali's Yoga Sutras and have been practiced worldwide for centuries. There are five principles for getting along well with others and five principles for making yourself the best person you can be. The book contains a lively review of each principle with potholes to avoid, tips to follow, reflection questions, and ways to contribute to others. Author, Johanna Mosca, a former, longtime high school English teacher, urges teens to develop inner strength. She guides teens to "think positive," quickly release negativity, stay grateful, practice forgiveness, question their perceptions, contribute good energy, and like themselves every day. Dr. Mosca reminds teens that she is the messenger, bringing ancient wisdom to them, and that she is not telling them how to live their lives but inviting them to go inside and find out.

**China's Fintech Explosion-Sara Hsu 2020-08-04** Financial technology—or fintech—is gaining in popularity globally as a way of making financial services more efficient and accessible. In rapidly developing China, fintech is taking off, catering to markets that state-owned banks and an undersized financial sector do not serve amid a backdrop of growing consumption and a large, tech-savvy millennial generation. It is becoming increasingly likely that some of China's fintech firms will change the way the world does business. In China's Fintech Explosion, Sara Hsu and Jianjun Li explore the transformative potential of China's financial-technology industry, describing the risks and rewards for participants as well as the impact on consumers. They cover fintech's many subsectors, such as digital payment systems, peer-to-peer lending and crowdfunding, credit card issuance, internet banks, blockchain finance and virtual currencies, and online insurance. The book highlights the disruption of traditional banking as well as the risks of fintech and regulatory technology. Hsu and Li describe major companies including Alipay and Tencent, developer of WeChat Pay and a wealth-management business, and other leading fintech firms such as Creditease, Zhong An Insurance, and JD Finance. Offering expert analysis of market potential, risks, and competition, as well as case studies of firms and consumer behavior, China's Fintech Explosion is a must-read for anyone interested in one of the world's breakout sectors.

**Portable Biosensing of Food Toxicants and Environmental Pollutants-Dimitrios P. Nikolelis 2013-10-21** Biosensors are poised to make a large impact in environmental, food, and biomedical applications, as they clearly offer advantages over standard analytical methods, including minimal sample preparation and handling, real-time detection, rapid detection of analytes, and the ability to be used by non-skilled personnel. Covering numerous applications of biosensors used in food and the environment, Portable Biosensing of Food Toxicants and Environmental Pollutants presents basic knowledge on biosensor technology at a postgraduate level and explores the latest advances in chemical sensor technology for researchers. By providing useful, state-of-the-art information on recent developments in biosensing devices, the book offers both newcomers and experts a roadmap to this technology. In the book, distinguished researchers from around the world show how portable and handheld nanosensors, such as dynamic DNA and protein arrays, enable rapid and accurate detection of environmental pollutants and pathogens. The book first introduces the basic principles of biosensing for newcomers to the technology. It then explains how the integration of a "receptor" can provide analytically useful information. It also describes trends in biosensing and examines how a small-sized device can have portability for the in situ determination of toxicants. The book concludes with several examples illustrating how to determine toxicants in food and environmental samples.

**Curing Mental Illness-Len Losik, Ph.d. 2016-11-02** Curing Mental Illness is the results from the research completed by the author for the Canadian Space Agency's Predictive Medicine Program in cooperation with the Russian Cosmonauts in 2012 and 2013 to determine if the author could use his company's technology to predict which astronauts in training would become mentally ill on a deep space mission lasting several years. An edited copy by the CSA of the results of the author's research were published at the 2013 IEEE/AIAA Aerospace Conference held in Big Sky Montana for the CSA's Predictive Medicine Program personnel and subsequently the full results were submitted to NASA Headquarters in 2013 and published on-line for public access in the American Journal of Applied Psychology. Curing Mental Illness provides a complete program for acquiring emotional and mental illnesses as well as recovering from emotional and mental disorders such as depression, anxiety, OCD, through bi-polar or schizophrenia. The author includes the description of why and how these are acquired by people and how they are nothing more than our own

body's defensive process trying to get us safe and keep us safe from our own life threatening decisions and lifestyle. Curing Mental Illness includes two massive reference sections and excerpts in the body of the text from members of the existing and past mental health community members and their professional opinions that the author has refuted with his own research results at the beginning of the book. The author also includes both the authors results to answers to common questions left unanswered by the current mental health community and many sections of current inadequate material published about emotional and mental disorders for comparing with the authors results. The author hopes this book will initiate a new direction in developing faster recovery programs that are quicker than the one proposed by the author as well as a new effort for pharmaceutical companies to develop the drugs to suppress our fight-or-flight response (FOFR) that the author has illustrated is the root cause of both emotional and mental disorders as well as all non-genetic based disorders, diseases and illnesses.

**Digitizing Enlightenment-Simon Burrows 2020-07-31** Digitizing Enlightenment explores how a set of inter-related digital projects are transforming our vision of the Enlightenment. The featured projects are some of the best known, well-funded and longest established research initiatives in the emerging area of 'digital humanities', a field that has, particularly since 2010, been attracting a rising tide of interest from professional academics, the media, funding councils, and the general public worldwide. Advocates and practitioners of the digital humanities argue that computational methods can fundamentally transform our ability to answer some of the 'big questions' that drive humanities research, allowing us to see patterns and relationships that were hitherto hard to discern, and to pinpoint, visualise, and analyse relevant data in efficient and powerful new ways. In the book's opening section, leading scholars outline their own projects' institutional and intellectual histories, the techniques and methodologies they specifically developed, the sometimes-painful lessons learned in the process, future trajectories for their research, and how their findings are revising previous understandings. A second section features chapters from early career scholars working at the intersection of digital methods and Enlightenment studies, an intellectual space largely forged by the projects featured in part one. Highlighting current and future research methods and directions for digital eighteenth-century studies, the book offers a monument to the current state of digital work, an overview of current findings, and a vision statement for future research.

**Geographical and Fingerprinting Data for Positioning and Navigation Systems-Jordi Conesa 2018-10-06** Geographical and Fingerprinting Data for Positioning and Navigation Systems: Challenges, Experiences and Technology Roadmap explores the state-of-the -art software tools and innovative strategies to provide better understanding of positioning and navigation in indoor environments using fingerprinting techniques. The book provides the different problems and challenges of indoor positioning and navigation services and shows how fingerprinting can be used to address such necessities. This advanced publication provides the useful references educational institutions, industry, academic researchers, professionals, developers and practitioners need to apply, evaluate and reproduce this book's contributions. The readers will learn how to apply the necessary infrastructure to provide fingerprinting services and scalable environments to deal with fingerprint data. Provides the current state of fingerprinting for indoor positioning and navigation, along with its challenges and achievements Presents solutions for using WIFI signals to position and navigate in indoor environments Covers solutions for using the magnetic field to position and navigate in indoor environments Contains solutions of a modular positioning system as a solution for seamless positioning Analyzes geographical and fingerprint data in order to provide indoor/outdoor location and navigation systems

**Mapping Out the Research-policy Matrix-Germán Solinis 2011** Social science research provides not only abstract, conceptual knowledge about society but also concrete, instrumental knowledge. It enables us to take action to recompose the world we live in. However, this book rejects narrow and simplistic conceptions of research use and its impact on policy-making, to embrace a more complex approach to seeing and dealing with social science. In the paradigm of "evidence-based policy", "evidence" is understood in its broad sense as information that helps form policies. Nonetheless, within current practices and discourse, it is not clear what "information" is, what is really meant by "evidence", and how it can be obtained objectively. The book draws on papers presented at the International Forum on the Social Science-Policy Nexus, where experts examined current practices and problems in areas such as social policy, migration, urban policies and globalisation. The Forum set a precedent in terms of dialogue between researchers and policy-makers. The authors contribute to enriching and elucidating the most common conceptualisations of the research-policy nexus. They represent a rich diversity of views, although most agree that an effective strategy to enhance social science-policy linkages should be underpinned by a theoretical and methodological framework that takes into account the interplay of different social actors.

**The Covert Sphere-Timothy Melley 2012-11-15** In December 2010 the U.S. Embassy in Kabul acknowledged that it was providing major funding for thirteen episodes of Eagle Four—a new Afghani television melodrama based loosely on the blockbuster U.S. series 24. According to an embassy spokesperson, Eagle Four was part of a strategy aimed at transforming public suspicion of security forces into something like awed respect. Why would a wartime government spend valuable resources on a melodrama of covert operations? The answer, according to Timothy Melley, is not simply that fiction has real political effects but that, since the Cold War, fiction has become integral to the growth of national security as a concept and a transformation of democracy. In The Covert Sphere, Melley links this cultural shift to the birth of the national security state in 1947. As the United States developed a vast infrastructure of clandestine organizations, it shielded policy from the public sphere and gave rise to a new cultural imaginary, "the covert sphere." One of the surprising consequences of state secrecy is that citizens must rely substantially on fiction to "know," or imagine, their nation's foreign policy. The potent combination of institutional secrecy and public fascination with the secret work of the state was instrumental in fostering the culture of suspicion and uncertainty that has plagued American society ever since—and, Melley argues, that would eventually find its fullest expression in postmodernism. The Covert Sphere traces these consequences from the Korean War through the War on Terror, examining how a regime of psychological operations and covert action has made the conflation of reality and fiction a central feature of both U.S. foreign policy and American culture. Melley interweaves Cold War history with political theory and original readings of films, television dramas, and popular entertainments—from The Manchurian Candidate through 24—as well as influential writing by Margaret Atwood, Robert Coover, Don DeLillo, Joan Didion, E. L. Doctorow, Michael Herr, Denis Johnson, Norman Mailer, Tim O'Brien, and many others.
