Entertaining Elephants-Susan Nance 2013-01-14 Consider the career of an enduring if controversial icon of American entertainment: the genial circus elephant. In Entertaining Elephants Susan Nance examines elephant behavior—drawing on the scientific literature of animal cognition, learning, and communications—to offer a study of elephants as actors (rather than objects) in American circus entertainment between 1800 and 1940. By developing a deeper understanding of animal behavior, Nance asserts, we can more fully explain the common history of all species. Entertaining Elephants is the first account that uses research on animal welfare, health, and cognition to interpret the historical record, examining how both circus people and elephants struggled behind the scenes to meet the profit necessities of the entertainment business. The book does not claim that elephants understood, endorsed, or resisted the world of show business as a human cultural or business practice, but it does speak of elephants rejecting the conditions of their experience. They lived in a kind of parallel reality in the circus, one that was defined by their interactions with people, other elephants, horses, bull hooks, hay, and the weather. Nance's study informs

and complicates contemporary debates over human interactions with animals in entertainment and beyond, questioning the idea of human control over animals and people's claims to speak for them. As sentient beings, these elephants exercised agency, but they had no way of understanding the human cultures that created their captivity, and they obviously had no claim on (human) social and political power. They often lived lives of apparent desperation. -- Etienne Benson, author of *Wired Wilderness*

Sacred Cows and Rogue Elephants-John Lochiel Robson 1987 The author was Assistant Secretary and then Deputy Head of the New Zealand Department of Justice in the 1950's and 1960's. After a brief autobiographical introduction, Dr Robson traces justice policy developments and changes. He places special emphasis on the 1960's, a period of impressive legislative achievement, including the abolition of capital punishment, a comprehensive review and improvement of penal policy (including the introduction of the periodic detention sentence) and the creation of the ombudsman system. The author describes frankly the tensions, struggles and occasional battles which take place within and between government departments. He also discusses the relationship between a Minister and his Permanent Head, and outlines developments in education, staff training, management and administration.

The Elephant Whisperer-Lawrence Anthony 2009-11-10 When South African conservationist Lawrence Anthony was asked to accept a herd of "rogue" wild elephants on his Thula Thula game reserve in Zululand, his common sense told him to refuse. But he was the herd's last chance of survival: they would be killed if he wouldn't take them. In order to save their lives, Anthony took them in. In the years that followed he became a part of their family. And as he battled to create a bond with the elephants, he came to realize that they had a great deal to teach him about life, loyalty, and freedom. *The Elephant Whisperer* is a heartwarming, exciting, funny, and sometimes sad account of Anthony's experiences with these huge yet sympathetic creatures. Set against the background of life on an African game reserve, with unforgettable characters and exotic wildlife, it is a delightful book that will appeal to animal lovers and adventurous souls everywhere.

Hunter for Hire-Rex Forrester 1965 New Zealand hasn't yet made up her mind on what's to be done about her game animals. Total extermination is the soil conservationist's advice. Control say the sportsmen ... While the argument goes on, more and more overseas hunters come to New Zealand for shooting opportunities second to none in all the world. Who are these sportsmen? What do they expect? What luck do they have? Rex Forrester, bushman and hunter since the early age of twelve, went into the safari business in 1956-after fourteen years' experience as Government employed and independent deer hunter - and has since been conducting sporting tours for scores of shooters and fishermen from Australia, Britain, Europe, and the United States. One of his most notable experiences was the organisation of the deer-shooting end of the American Ted Williams's 1964 sporting marathon, in which - within the space of ten and a half hours - Williams caught a 587lb thresher shark and four good trout, and shot three deer. Rex's visions of an easy and profitable life as safari-leader were rapidly dispelled by reality. With some magnificent exceptions, for whom he has unqualified respect, his clients, have been hard to satisfy and the going has been tough. At the end of one peculiarly exasperating trip two fit and healthy overseas clients demanded that Rex and his mate carry them piggy-

back through a river. What happened next is only one of the dozens of hilarious stories in this book. These whirlwind sporting tours left Rex with little time for writing, so he teamed up with journalist Neil Illingworth, and the partnership is a particularly happy one. Roughly half the book deals with Rex Forrester's hunting apprenticeship, his professional shooting for skins, and as a Government culler; the latter half describes the safari business from the inside. It gives a new angle on hunting in New Zealand and makes a book that will be enjoyed by all who love the outdoors as well as by the hunting fraternity.

His contribution to the Peterson Field Guide Series made him one of the most influential American herpetologists of the twentieth century. This in-depth autobiography is as much a history of American Zoos and North American Herpetology as it is an account of the diverse and exciting life of Roger Conant. Details included in this book make it a hidden treasure for twentieth century folklore as well. Conant also studied extensively in Mexico and offers detailed accounts of his several excursions which were spread throughout much of the twentieth century.
