Religions in Play-Philippe Bornet 2012-01-01 Often dismissed as "not serious", the notion of play has nevertheless been at the centre of classical theories of religion and ritual (Huizinga, Caillois, Turner, Staal, etc.). What can be retained of those theories for the contemporary study of religions? Can a study of "play" or "game" bring new perspectives for the study of religions? The book deals with the history of games and their relation to religions, the links between divination and games, the relations between sport and ritual, the pedagogical functions of games in religious education, and the interaction between games, media and religions. Richly illustrated, the book contributes to the study of religions, to ritual, game and media studies, and addresses an academic as well as a general public. Philippe Bornet, Dr. Phil., born in 1977, is Lecturer in the Study of Religion at the Faculty of Lettres of the University of Lausanne, with focus on the history of interrelations between India and Europe. Maya Burger is Professor of Indian Studies and History of Religions at the Faculty of Arts of the University of Lausanne, Department of South Asian Languages and Civilizations.

Defining Harm-Lori G. Beaman 2008-07-01 A powerful examination of the governance of a religious citizen and of the limits of religious freedom, this book demonstrates that the stakes in debates on religious freedom are not just about beliefs and practices but also have implications for the construction of citizenship in a diverse nation. Lori Beaman looks at the case of Jehovah's Witness Bethany Hughes who was denied her right to refuse treatment on the basis of her religious conviction, reflecting a particular moment in the socio-legal treatment of religious freedom and reveals the specific intersection of religious, medical, legal, and other discourses in the governance of the religious citizen.

Religion and Women in Britain, c. 1660–1760-Sarah Apetrei 2016-04-08 The essays contained in this volume examine the particular religious experiences of women within a remarkably vibrant and formative era in British religious history. Scholars from the disciplines of history, literary studies and theology assess women's contributions to renewal, change and reform; and consider the ways in which women negotiated institutional and intellectual boundaries. The focus on women's various religious roles and responses helps us to understand better a world of religious commitment which was not separate from, but also not exclusively shaped by, the political, intellectual and ecclesiastical disputes of a clerical elite. As well as deepening our understanding of both popular and elite religious cultures in this period, and the links between them, the volume re-focuses scholarly approaches to the history of gender and especially the history of feminism by setting the British writers often characterised as 'early feminists' firmly in their theological and spiritual traditions.

The Oxford Handbook of Atheism-Stephen Bullivant 2013-11-21 Recent books by, among others, Sam Harris, Richard Dawkins, and Christopher Hitchens have thrust atheism firmly into the popular, media, and academic spotlight. This so-called New Atheism is arguably the most striking development in western socio-religious culture of the past decade or more. As such, it has spurred fertile (and often heated) discussions both within, and between, a diverse range of disciplines. Yet atheism, and the New Atheism, are by no means co-extensive. Interesting though it indeed is, the New Atheism is a single, historically and culturally specific manifestation of positive atheism (the that there is/are no God/s), which is itself but one form of a far deeper, broader, and more significant global phenomenon. The Oxford Handbook of Atheism is a pioneering edited volume, exploring atheism—understood in the broad sense of 'an absence of belief in the existence of a God or gods'—in all the richness and diversity of its historical and contemporary expressions. Bringing together an international team of established and emerging scholars, it probes the varied manifestations and implications of unbelief from an array of disciplinary perspectives (philosophy, history, sociology, anthropology, demography, psychology, natural sciences, gender and sexuality studies, literary criticism, film studies, musicology) and in a range of global contexts (Western Europe, North America, post-communist Europe, the Islamic world, Japan, India). Both surveying and synthesizing previous work, and presenting the major fruits of innovative recent research, the handbook is set to be a landmark text for the study of atheism.

Psychoanalysis and Religion-Erich Fromm 2013-03-26 An exploration of what religion and spirituality mean to us as humans, by the New York Times–bestselling author and social psychologist. In 1950, Erich Fromm attempted to free religion from its social function and to develop a new understanding of religious phenomena. Rather than analyzing what people believe in—whether they're monotheistic, polytheistic, or atheistic—Fromm presents an idea of what religion means in secular terms. In his timeless and straightforward style, Fromm unmasks the alienating effects of any authoritarian religion. He reveals how a humanistic religion is conducive to one's own humanity, and explains why psychoanalysis does not threaten religion. Whether you're a believer or a long-time atheist, Fromm's erudite analysis of religion is sure to reshape your concept of spirituality. This ebook features an illustrated biography of Erich Fromm including rare images and never-before-seen documents from the author's estate.

Benjamin Elijah Mays, Schoolmaster of the Movement-Randal Maurice Jelks 2012-05-15 In this first full-length biography of Benjamin Mays (1894-1984), Randal Maurice Jelks chronicles the life of the man Martin Luther King Jr. called his "spiritual and intellectual father." Dean of the Howard University School of Religion, president of Morehouse College, and mentor to influential black leaders, Mays had a profound impact on the education of the leadership of the black church and of a generation of activists, policymakers, and educators. Jelks argues that Mays's ability to connect the message of Christianity with the responsibility to challenge injustice prepared the black church for its pivotal role in the civil rights movement. From Mays's humble origins in Epworth, South Carolina, through his doctoral education, his work with institutions such as the National Urban League, the NAACP, and the national YMCA movement, and his significant career in academia, Jelks creates a rich portrait of the man, the teacher, and the scholar. Benjamin Elijah Mays, Schoolmaster of the Movement is a powerful portrayal of one man's faith, thought, and mentorship in bringing American apartheid to an end.

Talking with My Mouth Full-Bonny Wolf 2013-12-10 What does America really eat? Which recipes do real home cooks turn to again and again? More often than not, they are dishes handed down from great aunts and painstakingly copied out of smudged recipe boxes rather than the creations of celebrity chefs. Bonny Wolf, food commentator for NPR's "Weekend Edition", writes about the great regional and family food traditions in this country—birthday cake and dinner party food, hearty American breakfasts and Fourth of July picnic dishes. In Talking with My Mouth Full, she writes stories about food, and also about the people who eat it. This book gives a snapshot of the American traditions that have contributed to what and how we eat. Food trends come and go, but many delightful national treasures—bundt

cake, barbecue, roast chicken, fair food—are timeless. Each of Bonny Wolf's chapters, whether she's writing about true regional specialties like Minnesota's wild rice, Texas' Blue Bell ice cream or Maryland's famous crab cakes or about family favorites like noodle pudding or Irish raisin soda bread, ends with a perfectly chosen group of recipes, tantalizing and time-tested. In the tradition of Laurie Colwin's Home Cooking, Talking with My Mouth Full is a book you will turn to over and over for wonderful food writing and recipes for comfort food, a great nosh, or the ideal covered dish to take to a potluck supper.

An Introduction to Hegel's Philosophy of Religion-Raymond Keith Williamson 1984-01-01 For Hegel, thought is not philosophical if it is not also religious. Both religion and philosophy have a common object and share the same content, for both are concerned with the inherent unity of all things. Hegel's doctrine of God provides the means for understanding this fundamental relationship. Although Hegel stated that God is absolute Spirit and Christianity is the absolute religion, the compatibility of Hegel's doctrine of God with Christian theology has been a matter of continuing and closely argued debate. Williamson's book provides a significant contribution to this ongoing discussion through a systematic study of Hegel's concept of God. The book proceeds by investigating theism, atheism, pantheism, and panentheism as descriptions of Hegel's concept. It rejects the view that Hegel's doctrine so differs from Christian theology so as to be empty of religious content and thereby highlights some important considerations in contemporary theology.

Kierkegaard, Religion, and Existence-Abraham Sagi 2000 This book is an original philosophic exploration of the meaning of Kierkegaard's life, his thought, and his works. It makes a bold case for Kierkegaard's recognition of the concrete existence of the individual, including Kierkegaard himself, as crucial to the spiritual life. Written with delicate insight, and beautifully translated from Hebrew, this work offers valuable new turns to understanding the puzzling life-work of a modern giant of spiritual reflection.

The Religion and Philosophy of the Veda and Upanishads-Arthur Berriedale Keith 1925

Christian Theology and Religious Pluralism-David S. Nah 2012-04-18 The question of religious pluralism is the most significant yet thorniest of issues in theology today, and John Hick (1922-2012) has long been recognized as its most important scholar. However, while much has been written analyzing the philosophical basis of Hick's pluralism, very little attention has been devoted to the theological foundations of his argument. Filling this gap, this book examines Hick's theological attempts to systematically deconstruct the church's traditional incarnational Christology. Special attention is given to evaluating Hick's foundational theses "that Jesus himself did not teach what was to become the orthodox Christian understanding of him" and "that the dogma of Jesus' two natures . . . has proved to be incapable of being explicated in any satisfactory way." By elucidating the ways in which Hick's arguments fail, David Nah demonstrates that Hick was unwarranted in breaking away from the church's incarnational Christology that has been at the core of Christianity for almost two thousand years.

Beyond the Firmament-Gordon J. Glover 2007 As debates within the Church over the scientific details of creation become more frequent, the experts seem to grow more entrenched while the rest of us only become more confused. Somewhere between the endless arguments over distant starlight and Carbon-14 dating, calculating the mathematical improbabilities of things that already exist, and parsing ancient Hebrew and Greek, somebody needs to ask the simple question, If 3,500 years of scientific progress can't help modern Christians figure out Genesis, then how could the ancient Israelities possibly have understood it so well? What secret did this newly liberated gaggle of Hebrew nomads take with them out of Egypt that holds the key to understanding God's telling of His own creation story? Beyond the Firmament challenges all creationist camps --whether Young-Earth, Old-Earth, or Theistic Evolutionist -- to step outside of traditional paradigms and recognize how our modern, Western, post-Enlightenment scientific worldview actually blinds us from seeing the simple truth of Creation as it was originally intended, and how our failure to grasp the theological significance of the Biblical creation model puts science and faith on a collision course.

Twentieth-Century Philosophy of Religion-Graham Oppy 2014-09-11 The twentieth century saw religion challenged by the rise of science and secularism, a

confrontation which resulted in an astonishingly diverse range of philosophical views about religion and religious belief. Many of the major philosophers of the twentieth century - James, Bergson, Russell, Wittgenstein, Ayer, Heidegger, and Derrida - significantly engaged with religious thought. Idiosyncratic thinkers, such as Whitehead, Levinas and Weil, further contributed to the extraordinary diversity of philosophical investigation of religion across the century. In their turn, leading theologians and religious philosophers - notably Buber, Tillich and Barth - directly engaged with the philosophy of religion. Later, philosophy of religion became a distinct field of study, led by the work of Hick, Alston, Plantinga, and Swinburne. "Twentieth-Century Philosophy of Religion" provides an accessible overview of the major strands in the rich tapestry of twentieth-century thought about religion and will be an indispensable resource for any interested in contemporary philosophy of religion.

Religion and the Rise of History-Leonard S. Smith 2009-04-01 As a historical inquiry and synthesis, this intellectual history is the first study to apply the ideal-type or model-building methodology of Otto Hintze (1861-1940) to Western historical thought or to what R. G. Collingwood called "The Idea of History," for it contains succinct and useful models for seeing and teaching classical, Christian, and modern professional historiography. Religion and the Rise of History is also the first work to suggest that, in addition to his well-known paradoxical, simul, and/or "at-the-same-time" way of thinking and viewing life, Martin Luther also held to a way that was deeply

incarnational, dynamic, and/or "in-with-and-under." This dual vision and "a Lutheran ethos" strongly influenced Leibniz, Hamann, and Herder, and was therefore a matter of considerable significance for the rise of a distinctly modern form of historical consciousness (commonly called "historicism") in Protestant Germany. Smith's essay suggests a new time period for the formative age of modern German thought, culture, and education: "The Cultural Revolution in Germany." This age began in the early 1760s and culminated in 1810 with the founding of the University of Berlin, the first fully "modern" and "modernizing" university. This university first became the recognized center for the study of history, however, through the work of Leopold von Ranke (1795-1886). Here the story shows how a young Ranke derived his individualizing way of thinking and viewing life mainly from Luther, how his life-work is the best example in Western literature of the rise of history from a calling to a profession, and how the three-way discussion between Troeltsch, Meinecke, and Hintze concerning the nature of modern historical thought was of central importance for the reorientation of Western social-historical thought in the twentieth century.

The Religion of Reality-Didier Maleuvre 2006 The book first argues that religious feeling persists in the secular western mind; that it has taken refuge in the unlikeliest of camps, indeed with the supposed debunker of religious creed: the rationalist existential ego.
