Bringing Order to Chaos-Peter J Schifferle Editor 2018-10-12 Volume 2, Bringing Order to Chaos: Combined Arms Maneuver in Large Scale Combat Operations, opens a dialogue with the Army. Are we ready for the significantly increased casualties inherent to intensive combat between large formations, the constant paralyzing stress of continual contact with a peer enemy, and the difficult nature of command and control while attempting division and corps combined arms maneuver to destroy that enemy? The chapters in this volume answer these questions for combat operations while spanning military history from 1917 through 2003. These accounts tell the challenges of intense combat, the drain of heavy casualties, the difficulty of commanding and controlling huge formations in contact, the effective use of direct and indirect fires, the need for high quality leadership, thoughtful application of sound doctrine, and logistical sustainment up to the task. No large scale combat engagement, battle, or campaign of the last one hundred years has been successful without being better than the enemy in these critical capabilities. What can we learn from the past to help us make the transition to ready to fight tonight?

Arming without Aiming-Stephen P. Cohen 2013-01-14 India has long been motivated to modernize its military, and it now has the resources. But so far, the drive to rebuild has lacked a critical component—strategic military planning. India's approach of arming without strategic purpose remains viable, however, as it seeks great-power accommodation of its rise and does not want to appear threatening. What should we anticipate from this effort in the future, and what are the likely ramifications? Stephen Cohen and Sunil Dasgupta answer those crucial questions in a book so timely that it reached number two on the nonfiction bestseller list in India. "Two years after the publication of Arming without Aiming, our view is that India's strategic restraint and its consequent institutional arrangement remain in place. We do not want to predict that India's military-strategic restraint will last forever, but we do expect that the deeper problems in Indian defense policy will continue to slow down military modernization."—from the preface to the paperback edition

Strengthening the Military Family Readiness System for a Changing American Society-National Academies of Sciences, Engineering, and Medicine 2019-10-25 The U.S. military has been continuously engaged in foreign conflicts for over two decades. The strains that these deployments, the associated increases in operational tempo,

and the general challenges of military life affect not only service members but also the people who depend on them and who support them as they support the nation — their families. Family members provide support to service members while they serve or when they have difficulties; family problems can interfere with the ability of service members to deploy or remain in theater; and family members are central influences on whether members continue to serve. In addition, rising family diversity and complexity will likely increase the difficulty of creating military policies, programs and practices that adequately support families in the performance of military duties. Strengthening the Military Family Readiness System for a Changing American Society examines the challenges and opportunities facing military families and what is known about effective strategies for supporting and protecting military children and families, as well as lessons to be learned from these experiences. This report offers recommendations regarding what is needed to strengthen the support system for military families.

Surviving the Great War-Aaron Pegram 2019-11-12

Famous, 1914–1918-Victor Piuk 2010-03-10 Famous tells the Great War stories of twenty of Britain's most respected, best known and even notorious celebrities. They include politicians, actors, writers, an explorer, a sculptor and even a murderer. The generation that grew up in the late 19th Century enlisted enthusiastically in the defense of the country. Many would become household names such as Basil Rathbone, the definitive Sherlock Holmes, AA Milne, creator of Winnie the Pooh, and John Laurie and Arnold Ridley who found fame and public affection as the dour Scotsman Fraser, and the gentle and genial Godfrey, in Dad's Army. From politicians such as Harold Macmillan and Winston Churchill to writers includsing JB Priestley, and JRR Tolkein, from sculptors like Henry Moore, to composers such as Ralph Vaughan Williams, their fame and influence continue even into the 21st Century. The authors Richard van Emden and Vic Piuk have discovered the exact locations where these celebrities saw action. They tell the story of how JRR Tolkein led his men over the top on the Somme, where CS Lewis was wounded and invalided home, and how Basil Rathbone won the Military Cross for a trench raid (while dressed as a tree). Each story will be examined in detail with pictures taken of the very spot where the actions took place. There are maps of the area that will guide enterprising readers to walk in the footsteps of their heroes.

A Grand Army of Black Men-Edwin S. Redkey 1992-11-27 The Civil War stands vivid in the collective memory of the American public. There has always been a profound interest in the subject, and specifically the participation of black Americans in and reactions to the war and the war's outcome. Almost 200,000 African-American soldiers fought for the Union in the Civil War. Although most were illiterate ex-slaves, several thousand were well-educated, free black men from the northern states. The 176 letters in this collection were written by black soldiers in the Union army during the Civil War to black and abolitionist newspapers. They provide a unique expression of the black voice that was meant for a public forum. The letters tell of the men's experiences, their fears and their hopes. They describe in detail their army days - the excitement of combat and the drudgery of digging trenches. Some letters give vivid descriptions of battle; others protest against racism; still others call eloquently for civil rights. Many describe their conviction that they are fighting not only to free the slaves but to earn equal rights as citizens. These letters give an extraordinary picture of the war and also reveal the bright expectations, hopes, and ultimately the demands that black soldiers had for the future - for themselves and for their race. As first-person documents of the Civil War, the letters are strong statements of the American dream of justice and equality, and of the human spirit. Expertise, Authority and Control-Alexia Moncrieff 2020-02-11 Expertise, Authority and Control charts the development of Australian military medicine in the First World War in the first major study of the Australian Army Medical Corp in over seventy years. It examines the provision of medical care to Australian soldiers during the Dardanelles campaign and explores the imperial and medical-military hierarchies that were blended and challenged during the campaign. By the end of 1918, the AAMC was a radically different organisation. Using army orders, unit war diaries and memoranda written to disseminate information within the Australian Imperial Forces (AIF) and between British and Australian soldiers, it maps the provision of medical care through casualty clearance and evacuation, rehabilitation, and the prevention and treatment of venereal disease. In doing so, she reassesses Australian military medicine and maps the transition to an infrastructure for the AIF in the field, especially in response to conflicts with traditional imperial, military and medical hierarchies.
