Choosing and Using a Refracting Telescope-Neil English 2010-09-28 Choosing and Using a Refracting Telescope has been written for the many amateur astronomers who already own, or are intending to purchase, a refracting telescope – perhaps to complement their existing arsenal of larger reflecting telescopes – or for the specialist who requires a particular refractor for serious astronomical applications or nature studies. Four hundred year ago, during the winter of 1609, a relatively unknown Italian scientist, Galileo Galilei designed a spyglass with two crude lenses and turned it skyward. Since then, refractors have retained their dominance over all types of reflector in studies of the Moon, planets and double stars because of the precision of their optics and lack of a central obstruction in the optical path, which causes diffraction effects in all commercially-made reflectors. Most mature amateur astronomers got started with a 60mm refractor, or something similar. Thirty years ago, there was little choice available to the hobbyist, but in the last decade long focus crown-flint achromats have moved aside for some exquisitely crafted apochromatic designs offered by leading commercial manufacturers. There has been a huge increase in the popularity of these telescopes in the last few years, led by a significant increase in the number of companies (particularly, William Optics, Orion USA, StellarVue, SkyWatcher and AstroTech) who are now heavily marketing refractors in the amateur astronomical magazines. In Choosing and Using a Refracting Telescope, well-known observer and astronomy writer Neil English celebrates the remarkable history and evolution of the refracting telescope and looks in detail at the instruments, their development and their use. A major feature of this book is the way it compares not only different classes of refractor, but also telescopes of each class that are sold by various commercial manufacturers. The author is perhaps uniquely placed to do this, having used and tested literally hundreds of different refracting telescopes over three decades. Because it includes many diverse subjects such as imaging with consumer-level digital cameras, imaging with webcams, and imaging with astronomical CCD cameras – that are not covered together in equal depth in any other single volume – Choosing and Using a Refracting Telescope could become the ‘refractor bible’ for amateur astronomers at all levels, especially those who are interested in imaging astronomical objects of every class.
The Spotter's Guide to the Male Species-Juliette Wills 2006 Forget the spotted owl or the Vancouver Island marmot; there is an elusive specimen out there that is trickier to find and more worthy of the effort-The Ideal Man.Small enough to fit in a handbag, but sufficiently comprehensive to be invaluable when analyzing his appearance, habitat, feeding habits, job, mating techniques and behaviour patterns, The Spotter's Guide to the Male Species shows women how to pinpoint a man's good and bad aspects within seconds. The book has a casebound hardcover with foil stamping-reminiscent of a diminutive, old-fashioned reference book. Written in a charming (but snarky) British tone, the text is laugh-out-loud funny while remaining highbrow and authoritative. The Spotter's Guide to the Male Species is an essential reference for the avid or amateur male-watcher.
The Noble Lie-Gary Greenberg 2008-09-16 Is drug addiction really a disease? Is sexuality inborn and fixed or mutable? Science is where we often turn when we can't achieve moral clarity. In The Noble Lie, acclaimed and controversial science writer Gary Greenberg shows how scientists try to use their findings to resolve the dilemmas raised by some of the most hotly contested issues of our time, from gay rights to euthanasia and the drug war. He reveals how their answers often turn out to be more fiction than science—and explores whether they cause more harm than good.

A Very, Very Bad Thing-Jeffery Self 2017-10-31 Marley is one of the only gay kids in his North Carolina town -- and he feels like he might as well be one of the only gay kids in the universe. Or at least that's true until Christopher shows up in the halls of his high school. Christopher's great to talk to, great to look at, great to be with-and he seems to feel the same way about Marley. It's almost too good to be true. There's a hitch (of course): Christopher's parents are super conservative, and super not okay with him being gay. That doesn't stop Marley and Christopher from falling in love. Marley is determined to be with Christopher through ups and downs-until an insurmountable down is thrown their way. Suddenly, Marley finds himself lying in order to get to the truth-and seeing the suffocating consequences this can bring. In A Very, Very Bad Thing, Jeffery Self unforgettably shows how love can make us do all the wrong things for all the right reasons-especially if we see them as the only way to make love survive.

Kinglake-350-Adrian Hyland 2011-08-01 Shortlisted Prime Minister's Award and Age Book of the Year Awards, 2012 Black Saturday. February 7, 2009. Roger Wood is the cop on duty at Kinglake when the most devastating fire in the nation's history roars through the ranges onto his beat. His task is to defend his town against the colossus that threatens to destroy it. And, over the course of one nightmarish day, that is what he will do. Even at the risk of his own life. Even after he receives the dreadful phone call telling him his own wife and kids are caught on the front line of the inferno. Adrian Hyland is the award-winning author of Diamond Dove and Gunshot Road. He lives in St Andrews, north-east of Melbourne, and teaches at LaTrobe University. 'A masterpiece of storytelling...The central characters in this special book emerge as Victoria Cross heroes in the heart of a bush community.' Kerry O'Brien 'What sets Kinglake-350 apart is its strong, agile storytelling - particularly Hyland's skill for weaving together small, telling details with big-picture concerns like climate change, weather pattern complexity, the failings of fire management policy and Australia's historical relationship with fire...' Meg Mundell, Readings 'Every Australian, both rural and urban, should read this book. Adrian Hyland pulls no punches in describing the harrowing consequences of living on the planet's driest and most fire-prone continent, and his account of the disastrous Black Saturday fires is a story of courage, dread and fallibility that will never leave you.' Cate Kennedy 'I've been waiting for a writer to look Black Saturday in the eye ever since the flames died down and, finally, Adrian Hyland's done it. In this compelling and moving book, Hyland has captured the character of a town caught, quite literally, in a fireball.' Anna Krien 'Kinglake-350 is about more than Black Saturday. It's about families and communities, the vital nature of ecology and geology; it's about the genesis of life itself. And while there are too many deaths in this saddest of tales, for the lucky ones the outcome was redemption.' Lincoln Hall 'Adrian Hyland has found a path through the smoke and confusion to produce an informed account that brings tears to the eyes of the reader. He has woven a selection of experiences into a seamless and gripping narrative that shows the courage, uncertainty, tragedy and stupidity of that day. Although the causes and lessons of the fire were explored in the report by the royal commission, this book will be more widely read. And deservedly so.' Age Book of the Year ‘Terrifying and moving... Kinglake-350 leaves us with a visceral sense of a harrowing event.’ Australian ‘Gripping and deeply moving.’ Adelaide Advertiser ‘As in the best fiction these characters will stay with you.’ Daily Telegraph

A Life Like Mine-Shirley Flynn 2008-11-01 As I have recalled my life in order to create this memoir, I've wondered what physical traits and abilities will be passed down to future generations of this family. I've also wondered if my love of the visual arts is a family inheritance I've received through some unknown ancestor in the distant past. We're all part of something larger than our individual lives--although there are clearly more questions than answers as far as that is concerned.

Sports from Hell-Rick Reilly 2010-05-04 The most popular sports columnist in America puts his life (and dignity) on the line in search of the most absurd sporting event on the planet. What is the stupidest sport in the world? Not content to pontificate from the sidelines, Rick Reilly set out on a global journey—with stops in Australia, New Zealand, Finland, Denmark, England, and even a maximum security prison at Angola, Louisiana—to discover the answer to this enduring question. From the physically and mentally taxing sport of chess boxing to the psychological battlefield that is the rock-paper-scissors championship, to the underground world of illegal jart throwing, to several competitions that involve nudity, Reilly, in his valiant quest, subjected himself to both bodily danger and abject humiliation (or, in the case of ferret legging, both). These fringe sports offer their participants a chance to earn a few bucks and achieve the eternal glory that is winning—even when the victory in question might strike some as pointless, like the ability to sit in an oven-hot sauna for the longest time. It's debatable whether these sports push the body or just human idiocy to the outermost limits, but one thing is for sure: Sports in Hell is laugh-out-loud hilarious and will deliver plenty of unabashed fun.
