Bela Bartók Studies in Ethnomusicology-Bála Bartók 1997-01-01 Composer, folklorist, and performer Béla Bartók (1881-1945) is internationally renowned as one of the most important and influential musicians of the twentieth century. Throughout his life he wrote lectures and essays that dealt with virtually every aspect of East European folk music. Many of those essays, previously scattered in specialist journals in four different languages, are collected here for the first time. All are concerned with that branch of musicology within which Bartók was most influential, and for which he is best known: research into folk music, or ethnomusicology. The volume includes a preface by editor Benjamin Suchoff, a leading expert on Bartók's music and writings. Suchoff examines Bartók's developing views on the folk-music traditions of Hungary, Romania, Slovakia, and the Arab world.

Challenges of Policing Democracies-Dilip Das 2012-10-12 In this text, the editors analyze the diverse situations that police forces operate under and the challenges that they face in different kinds of democracies. This cross-cultural comparison of various systems highlights the universal observation that police are an anomaly in a democracy and explores how various influences-for example, large-scale social violence, a zeal for crime fighting, and vulnerability to temptation-often find police incapable of behaving in a democratic manner. Challenges of Policing Democracies goes beyond just showing the similarities and differences of the policing challenges democratic societies face, it also examines the responses and remedies adopted by police in various countries at different levels of democratic achievement and how every society struggles with the challenges of preserving democratic values without sacrificing the effectiveness of policing.

Pipe Flow-Donald C. Rennels 2012-04-02 Pipe Flow provides the information required to design and analyze the piping systems needed to support a broad range of industrial operations, distribution systems, and power plants. Throughout the book, the authors demonstrate how to accurately predict and manage pressure loss while working with a variety of piping systems and piping components. The book draws together and reviews the growing body of experimental and theoretical research, including important loss coefficient data for a wide selection of piping components.

Experimental test data and published formulas are examined, integrated and organized into broadly applicable equations. The results are also presented in straightforward tables and diagrams. Sample problems and their solution are provided throughout the book, demonstrating how core concepts are applied in practice. In addition, references and further reading sections enable the readers to explore all the topics in greater depth. With its clear explanations, Pipe Flow is recommended as a textbook for engineering students and as a reference for professional engineers who need to design, operate, and troubleshoot piping systems. The book employs the English gravitational system as well as the International System (or SI).

Piano music of Béla Bartók-Béla Bartók 1981-01-01 Second in the Archive Edition incorporating composer's corrections, emphasizing Bartók's lifelong work both with East European folk music, and with music for children and student pianists. 85 short pieces: "For Children, " 2 Elegies, Sonatina, other folk-inspired keyboard work.

Handbook of Novel Psychoactive Substances-Ornella Corazza 2018-10-10

Handbook of Novel Psychoactive Substances (NPS) provides a comprehensive overview of the challenges that clinicians face when dealing with NPS and discusses how the profile of patients and their socio-demographic characteristics frame the serious public health concern that NPS pose. It presents various clinical cases, as well as detailed accounts of symptoms, psychopathology, toxicity, and overall clinical management that NPS require. This handbook brings together a unique collection of chapters written by leading experts in the field, who have felt the need to share their knowledge and experience to improve the clinical practice on NPS and the wellbeing of their patients.

egyediek, akik nem rendelkeznek anyanyelvi tudással, ezért nem nemzeti kisebbségként, hanem etnikai kisebbségként határozhatjuk meg őket. Magyarországon hivatalosan az az ember cigány, aki magát a népszámlálás során, a szavazásnál, az iskolában, az önkormányzatnál cigánynak vallja, mivel az 1992-es adatvédelmi törvény alapján az etnikai hovatartozást az érintett részben leegyeztetve nem lehet nyilvánítani. A 2001. évi népszámlálás szerint Magyarországon 190 046 fő volt a cigány lakosság lélekszáma. A népszámlálási adatok ugyanakkor jelentősen eltérnek a szociológusok felmérésének eredményeitől. Egy 1994-es felmérésnél azt vették alapul, hogy a nem cigány környezet kikerültek tekintetében (ez nem feltétlenül jelent valójában cigányszármazást). Eszerint több mint 500 000 fő a magyarországi cigányok lélekszáma (kb. az összlakosság 5%-a). Mivel sok 6-700 000 körüli becslés létezik a magyarországi cigányszámról, még egyes roma értelmiségiek szerint ez a szám az egymilliót is elérheti. (Lásd: Roma szociológiai tanulmányok, 1997.) A népszámlálás szerint Magyarországon 3200 településen élnek cigányok. Vidéken a három székely megyében...
