Building the New Man-
Francesco Cassata
2011-01-01 Based on previously unexplored archival documentation, this book offers the first general overview of the history of Italian eugenics, not limited to the decades of Fascist regime, but instead ranging from the beginning of the 1900s to the first half of the 1970s. The Author discusses several fundamental themes of the comparative history of eugenics: the importance of the Latin eugenic model; the relationship between eugenics and fascism; the influence of Catholicism on the eugenic discourse and the complex links between genetics and

eugenics. It examines the Liberal pre-fascist period and the post-WW2 transition from fascist and racial eugenics to medical and human genetics. As far as fascist eugenics is concerned, the book provides a refreshing analysis, considering Italian eugenics as the most important case-study in order to define Latin eugenics as an alternative model to its Anglo-American, German and Scandinavian counterparts. Analyses in detail the nature-nurture debate during the State racist campaign in fascist Italy (1938-1943) as a boundary tool in the contraposition between the different institutional, political and ideological currents of fascist racism.

The Ethical Dimensions of

School Leadership-P.T. Begley

2003-04-30 This book about

valuation processes in

educational administration

has a particular focus on the

notions community and

professionalism. The topic is

addressed comprehensively

bringing together in one

volume the work of some of

the best-known and most

respected philosophers,

theorists and researchers

working in this field. The work of several promising young academics is also featured. Values have traditionally been considered an important influence on administrative practices. Chester Barnard's seminal work, "The Functions of the Executive", proposes a definition of leadership, dating back to 1938, that highlights the moral dimension of leadership as essential to administration. More recent works by Herbert Simon, Christopher Hodgkinson, Thomas Greenfield, Don Willower, Jerry Starratt and Paul Begley have reinforced the relevance of values as influences on administration and promoted active international debate on the subject. This book will be of special interest to university faculty, graduate students and educational administrators working in schools, district offices, senior departmental roles and administrators working in closely related fields. O futuro de uma ilusão-Carlos Magno Nazareth Cerqueira 2001 A obra é uma coletânea de textos publicados por Carlos Magno Nazareth

Cerqueira entre 1983 e 1999, que encerra a coleção 'Polícia amanhã - Textos fundamentais de polícia', idealizada pelo próprio autor. Seu assassinato, em 14 de setembro de 1999, confere à presente coletânea o caráter de uma homenagem póstuma, fato ressaltado na primeira parte do livro, composta por depoimentos de colaboradores e admiradores. Para além da homenagem, porém, a publicação oferece ao leitor um panorama das preocupações de um dos principais atores no cenário da segurança pública do Rio de Janeiro nas últimas duas décadas. As such it is an excellent preparatory and interdisciplinary academic tool intended for university students, scholars, professionals, and anyone who would like to know more on the matter.

Bioethics Education in a Global Perspective-Henk A.M.J. ten Have 2014-09-25
This book critically analyses experiences with bioethics education in various countries across the world and identifies common challenges and interests. It presents ethics teaching experiences in nine different countries and the basic question of the goals of bioethics education. It addresses bioethics education in resource-poor countries, as the conditions and facilities are widely different and set limits and provide challenges to bioethics educators.

Further, the question of how bioethics education can be improved is explored by the contributors. Despite the volume of journal publications agreement on bioethics education is rather limited. There are only few examples of core curricula, demonstrating consensus on the contents, goals, methods and assessment of teaching programs. We need ask: How can agreement on the best modalities of bioethics education be promoted?.

Eudemian Ethics-Aristotle 2015-09-01 The Eudemian Ethics and the De Virtutibus et Vitiis have not received much attention from scholars. Mr. Ross's suggestions have been of the greatest use to me; Fritzsche's commentary I have sometimes referred to

with advantage, and also to some notes printed by Prof. Henry Jackson and kindly sent me by him some years ago. Prof. Jackson is also the author of an article in the Journal of Philology, xxxii, which has shed a flood of light on the corrupt passage, Bk. VII, chs. 13, 14. Of course the principal help to the understanding of the two treatises is the Nicomachean Ethics, their resemblances to and differences from which work are of great interest.
