The essays include historiographical studies of the treatment of the topic by French and other historians as well as important case studies on the political vocabularies characteristic of the ancien régime and the revolutionary periods. The result is a substantial and unified set of studies on one of the central themes in modern European history.

Stomping the Blues-Albert Murray 2017-10-17 In this classic work of American music writing, renowned critic Albert Murray argues beautifully and authoritatively that "the blues as such are synonymous with low spirits. Not only is its express purpose to make people feel good, which is to say in high spirits, but in the process of doing so it is actually expected to generate a disposition that is both elegantly playful and heroic in its nonchalance." In Stomping the Blues Murray explores its history, influences, development, and meaning as only he can. More than two hundred vintage photographs capture the ambiance Murray evokes in lyrical prose. Only the sounds are missing from this lyrical, sensual tribute to the blues.

The Science Of Political Economy-Henry George 2020-06-24 Henry George died fighting one of the most corrupt political organizations of the civilized world — a sufficient epitaph for any worthy man. But he has larger claims to respect and consideration. He made a creditable attempt to solve the root-problem of material life — poverty, — and his just-published posthumous book, " The Science of Political Economy," excites that pathetic interest which attaches to the memory of one who tried to aid his fellowman. He was eloquent, but he was free from the hysteria of demagoguery. His sympathies, born of bitter vicissitude, were acute, but they were tempered with reason. He believed in the equality of opportunity ; but he believed also (as an American and an individualist) in the natural inequality of capacity. When he saw the industrial evils of the Old World reappear in one of the richest and fairest parts of the New — commercial depression, involuntary idleness, wasting capital, pecuniary distress, want, suffering, anxiety, — he was startled, and he set about to discover the cause. We value him for what he tried to do. "Progress and Poverty " was an immensely interesting and attractive book on a seemingly sapless science. It struck fire from flint, and lifted the author from obscurity to world-wide celebrity. Emerson says that every man is eloquent in that which he understands. It would be, perhaps,

truer to say that every man is eloquent in that in which he fervently believes, and George believed that he had given a message. To quote his own words: " On the night on which I finished the final chapter of 'Progress and Poverty,' I felt that the talent entrusted to me had been accounted for — was more fully satisfied, more deeply grateful, than if all the Kingdoms of the earth had been laid at my feet." No one doubts his sincerity, his intellectual integrity, the cleanliness of his soul. His expectations were infinite, his faith simple. The poverty of the world lay not in Nature but in a vicious economic system ; and he thought that he had found a "sovereign remedy" which would "raise wages, increase the earnings of capital, extirpate pauperism, abolish poverty, give remunerative employment to whoever wishes it, afford free scope to human powers, lessen crime, elevate morals and taste and intelligence, purify government, and carry civilization to yet nobler heights."

New Confucianism: A Critical Examination-J. Makeham 2003-02-21 This collection of essays explores the development of the New Confucianism movement during the twentieth-century and questions whether it is, in fact, a distinctly new intellectual movement or one that has been mostly retrospectively created. The questions that contributors to this book seek to answer about this neo-conservative philosophical movement include: 'What has been the cross-fertilization between Chinese scholars in China and overseas made possible by the shared discourse of Confucianism?'; 'To what extent does this discourse transcend geographical, political, cultural, and ideological divides?'; 'Why do so many Chinese intellectuals equate Confucianism with Chinese cultural identity?'; and 'Does the Confucian revival of the 1990s in China and Taiwan represent a genuine philosophical renaissance or a resurgence in interest based on political and cultural factors?'

Feynman's Thesis-Richard Phillips Feynman 1942 Richard Feynman's never previously published doctoral thesis formed the heart of much of his

brilliant and profound work in theoretical physics. Entitled "The Principle of Least Action in Quantum Mechanics," its original motive was to quantize the classical action-at-a-distance electrodynamics. Because that theory adopted an overall space-time viewpoint, the classical Hamiltonian approach used in the conventional formulations of quantum theory could not be used, so Feynman turned to the Lagrangian function and the principle of least action as his points of departure. The result was the path integral approach, which satisfied and transcended its original motivation, and has enjoyed great success in renormalized quantum field theory, including the derivation of the ubiquitous Feynman diagrams for elementary particles. Path integrals have many other applications, including atomic, molecular, and nuclear scattering, statistical mechanics, quantum liquids and solids, Brownian motion, and noise theory. It also sheds new light on fundamental issues like the interpretation of quantum theory because of its new overall space-time viewpoint. The present volume includes Feynman's Princeton thesis, the related review article "Space-Time Approach to Non-Relativistic Quantum Mechanics" [Reviews of Modern Physics 20 (1948), 367-387], Paul Dirac's seminal paper "The Lagrangian in Quantum Mechanics" [Physikalische Zeitschrift der Sowjetunion, Band 3, Heft 1 (1933)], and an introduction by Laurie M Brown.

Evil Breed-Charles G. West 2003-10-07 A gunslinger must outwit a bad bounty hunter in this western from Charles G. West... Jim Culver has never stayed in one place for too long, but now he's making tracks to save his own life. The U.S. Army doesn't take kindly to civilians killing their officers—even in self-defense. And they've hired the bounty hunter from Hell to catch him. But Jim has two things in his favor: the new .73 Winchester he's carrying—and the ability to use it. If bounty hunters are a breed apart, then Slocum is the most evil of them all. Big, nasty and bullying, he could be an artist's rendering of pure evil. But the Army thinks he's just the man to catch Jim Culver. The only hitch is that he has to bring his quarry back alive—and that's not something Slocum cottons to. But if there's a way around that—he'll find it. So she'll make the best of it until she can get something bigger. In the meantime, she is assigned to host the annual live fundraising telethon for some local animal shelter.
