You may not be perplexed to enjoy every ebook collections la responsabilité sociale de l'entreprise laquo que saisje raquo ndeg that we will agreed offer. It is not on the costs. Its about what you craving currently. This la responsabilité sociale de l'entreprise laquo que saisje raquo ndeg, as one of the most keen sellers here will agreed be along with the best options to review.

Social Responsibility in Labour Relations-Frans Pennings 2008-01-01 Since 1945, socially moderated market economies have formed the cornerstone of the European socioeconomic model. Now, however due to powerful global economic, political and demographic tendencies tensions between social and economic interests and values are increasing. These developments create an urgent need for answers, actions and measures on the European level. This wide-ranging but focused collection of essays approaches this important trend from multiple perspectives. Compiled in honour of the major European labour law scholar Teun Jaspers, it encompasses a broad spectrum of analyses and insights by forty-one distinguished contributors from seven countries. Four major tensions are identified: between the European and national level, between fundamental rights and economic freedoms, between workers and employers, and between soft and hard law instruments. Throughout, a comparative approach is emphasized, not only within the EU but also between the EU and China and South Africa. Among the many topics covered are the following: relocation of labour to low-wage countries both within and outside the EU; conditions for tempering the excesses of the free labour market; the legal weight of voluntary standards such as codes of conduct; extending the scope of application of corporate social responsibility norms to transnational enterprises; pressure on national social law due to flexibilization, deregulation and individualization; contract termination protection; employability and training of employees; fixed-term work in the wake of the Mangold ruling; adjustment of working conditions for ill and disabled workers; right to strike; and restructuring of enterprises. In light of the Lisbon strategy, the authors address how the various tensions should be reconciled, especially in the context of the flexicurity approach. The book will be of great interest to academics and practitioners for its clear categorization of the issues which must be overcome when regulating employment and social policy in the context of today's EU multilevel legal order. It pays detailed attention to the legal questions raised by emerging European labour and employment policies in respect of their specific materialization, the opportunities they offer, their feasibility, and the threats they pose to traditional worker's protection and, more generally, to traditional concepts of labour law.

Spirituality and Business: A Christian Viewpoint-Philippe de Woot 2017-09-08 Are the demands placed on 21st-century business leaders compatible with Christian values? Is it possible to act ethically and be socially responsible within a global system driven by economic demands? This important book explores the current conflict between spirituality and corporate leadership and asks challenging questions of business leaders and decision-makers.

Core and Contingent Work in the European Union-Edoardo Ales 2017-02-23 Labour and social security law studies have addressed the topic of the decline of the standard employment relationship mainly from the point of view of the growing number of atypical relationships. Only a limited number of studies have examined the issue from the perspective of the differentiation between core and contingent work. Such an examination is necessary as the increase in contingent work leads to complicated legal questions which vary between European states depending on the type of contingent arrangements that have become most prevalent. This book analyses, using a comparative approach, these different types of contingency from a national and EU perspective touching on the work relationship from a labour as well as a social security point of view. The aim of the book is to identify and analyse those questions adopting an innovative approach and to put forward proposals for safeguarding social cohesion within undertakings and European society.

Effective Management of Social Enterprises-Loretta Serrano 2006-01-01

The core purpose of social enterprise is to create value for the betterment of society. This aim lies at the center of the framework and is the end toward which all other elements in the framework must contribute. Greater alignment of these elements with the central purpose produces higher organizational coherence which contributes to superior performance.

IFRS in a Global World-Didier Bensadon 2016-05-13 This book, dedicated to Prof. Jacques Richard, is about the economic, political, social and even environmental consequences of setting accounting standards, with emphasis on those that are alleged to be precipitated by the adoption and implementation of IFRS. The authors offer their reasoned critiques of the effectiveness of IFRS in promoting genuine global comparability of financial reporting. The editors of this collection have invited authors from 17 countries, so that a great variety of accounting, auditing and regulatory cultures, and educational perspectives, is amply on display in their essays.

Enterprising Empires-Matthew P. Romaniello 2019-02-14 Focuses on the British Russia Company, revealing how commercial competition between the British and Russian empires became entangled.

Law and the "Sharing Economy"-Derek McKee 2018-11-27 Controversy shrouds sharing economy platforms. It stems partially from the platforms' economic impact, which is felt most acutely in certain sectors: Uber drivers compete with taxi drivers; Airbnb hosts compete with hotels. Other consequences lie elsewhere: Uber is associated with a trend toward low-paying, precarious work, whereas Airbnb is accused of exacerbating real estate speculation and raising the cost of long-term rental housing. While governments in some jurisdictions have attempted to rein in the platforms, technology has enabled such companies to bypass conventional regulatory categories, generating accusations of "unfair competition" as well as debates about the merits of existing regulatory regimes. Indeed, the platforms blur a number of familiar distinctions, including personal versus commercial activity; infrastructure versus content; contractual autonomy versus hierarchical control. These ambiguities can stymie legal regimes that rely on these distinctions as organizing principles, including those relating to labour, competition, tax, insurance, information, the prohibition of discrimination, as well as specialized sectoral regulation. This book is organized around five themes: technologies of regulation; regulating technology; the sites of regulation (local to global); regulating markets; and regulating labour. Together, the chapters offer a rich variety of insights on the regulation of the sharing economy, both in terms of the traditional areas of law they bring to bear, and the theoretical perspectives that inform their analysis. This book is published in English. - La controverse entoure les

plateformes d'économie de partage, partiellement en raison de leur impact économique. Certains secteurs subissent des contrecoups de manière plus aigüe : les chauffeurs d'Uber font concurrence aux chauffeurs de taxi, ou les hôtes Airbnb rivalisent avec les hôtels. Par ailleurs, Uber exacerberait l'emploi précaire et mal rémunéré tandis qu'Airbnb amplifierait la spéculation immobilière et entraînerait, à terme, une hausse du coût de location. On a tenté de réglementer ce type de plateformes, mais la technologie est telle qu'elle permet aux entreprises d'aisément contourner la réglementation conventionnelle, si bien que les accusations de « concurrence déloyale » fusent de toutes parts, provoquant une remise en question du cadre réglementaire. En effet, de telles plateformes viennent brouiller les cartes, confondant les distinctions convenues entre personnel et commercial, infrastructure et contenu, autonomie contractuelle et contrôle hiérarchique. Cette ambiguïté peut avoir d'importantes répercussions sur le bon fonctionnement de l'appareil réglementaire qui encadre les principes organisateurs du travail, de la concurrence, de l'impôt, de l'assurance, de l'information et de l'interdiction de la discrimination, sans parler de la réglementation sectorielle spécialisée. Cinq thématiques sont abordées dans cet ouvrage : les technologies de la réglementation; la réglementation de la technologie; les lieux de la réglementation (du local au mondial); la réglementation des marchés; et la réglementation du travail. Les chapitres se conjuguent pour offrir une réflexion d'une gamme d'experts sur la jurisprudence traditionnelle que sur les approches théoriques qui informent et façonnent la réglementation de l'économie du partage. Ce livre est publié en anglais.

Corporate Social Responsibility in the Post-Financial Crisis Era-Anastasios Theofilou 2016-12-10 Bringing together normative and instrumental CSR conceptualizations, practice based examples and international case studies, this edited volume brings together important contributions on the conceptualizations of CSR post financial crisis. Including coverage of a variety of practices in developing and developed contexts, industry-specific activities, business ethics and sustainable development issues, Corporate Social Responsibility in the Post-Financial Crisis brings together a variety of perspectives to provide knowledge and understanding across contexts.

Science and Empires-P. Petitjean 2012-12-06 SCIENCE AND EMPIRES: FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium "Science and Empires - Historical Studies about Scientific Development and European Expansion" is the product of an International Colloquium, "Sciences and Empires - A Comparative History of Scientific Exchanges: European Expansion and Scientific Development in Asian, African, American and Oceanian Countries". Organized by the REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed "Sciences and Empires" as one of the main research programmes for the The project to organize such a colloquium was a bit REHSEIS group. of a gamble. Its subject, reflected in the title "Sciences and Empires", is not a currently-accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. The terminology was strongly debated by the participants and, as is frequently suggested in this book, awaits fuller clarification.

Health Care and Government Policy-Laurinda Abreu 2019-06-19

Government policy refers primarily to the actions planned and implemented by the executive branch of a state to meet its society's needs. One of the most demanding areas both for policy makers and in terms of people's expectations is health, which social analysts and historians place among the most dynamic sectors over the last century. This is the focus of this book. It includes examinations of two of the most pressing issues facing national healthcare services today - 'Health systems at the stage of complexity: the need for collaborative intelligence' by Constantino Sakellariades et al. and 'Longer and better lives: the European fountain of youth' by Patrice Bourdelais - alongside historical analyses covering both earlier periods - 'Not just one countryside: life chances in pre-industrial Sweden' by Jan Sundin and 'Health care and poor relief in Portugal: an historical perspective' by Laurinda Abreu - and more recent times - 'The roots of the health reform in Spain' by Enrique Perdiguero-Gil e Josep M. Comelles. As the authors in this volume show in detail, population growth and increased quality of life have been among the greatest achievements of the second half of the twentieth century, but they should not be taken for granted. The fragility of these gains has been demonstrated statistically. The state has to invest in the public policies that best protect its citizens, particularly at times of low economic growth such as we are now experiencing, and take preventive action to preclude major social and economic costs. Civil society plays no less important a role in protecting the greater good of social cohesion. In short, both state and civil society need to consider future health policy in such a way as to overcome the inefficiencies of the past and make full use of the opportunities offered by science and technology to improve people's quality of life.

Ties that Bind-Thomas Donaldson 1999 Ties That Bind, written by two leading thinkers in the field of business ethics, offers a new approach to resolving today's most pressing debates about business behavior among diverse groups of people. Drawing from classic political philosophy and leading-edge social contract theory, Donaldson and Dunfee present a much-needed framework for making sensitive ethical judgments about economic and business behavior.

Entrepreneurship in Transition Economies-Arnis Sauka 2017-06-28 This book presents a state-of-the-art portrait of entrepreneurship in the transition economies of Central and Eastern Europe (CEE) and the Commonwealth of Independent States (CIS) as well as Georgia and Ukraine. Based on new empirical evidence, it highlights major trends in, characteristics and forms of entrepreneurship common to countries in transition. The contributions cover topics such as levels of opportunity-based entrepreneurship, incentives for innovation, dominance of large-scale international corporations, the role of family businesses, and opportunities for grass-roots entrepreneurship. The first part of the book focuses on theoretical considerations regarding the establishment of sustainable entrepreneurial ecosystems and private business. In turn, the second part offers cross-border studies of entrepreneurial environments and activities, while the third and fourth present case studies on the current state and unique characteristics of entrepreneurship in various countries of the CEE and CIS as well as Georgia and Ukraine. Finally, the last parts discuss the role of institutions and policy recommendations.
