Europe's Invisible Migrants-Andrea L. Smith 2003 "Until now, these migrations have been overlooked as scholars have highlighted instead the parallel migrations of former "colonized" peoples. This multidisciplinary volume presents essays by prominent sociologists, historians, and anthropologists on their research with the "invisible" migrant communities. Their work explores the experiences of colonists returning to France, Portugal and the Netherlands, the ways national and colonial ideologies of race and citizenship have assisted in or impeded their assimilation and the roles history and memory have played in this process, and the ways these migrations reflect the return of the "colonial" to Europe."--BOOK JACKET.

The Global Casino, Fifth Edition-Nick Middleton 2013-07-18 The Global Casino is an introduction to environmental issues which deals both with the workings of the physical environment and the political, economic and social frameworks in which the issues occur. Using examples from all over the world, the book highlights the underlying causes behind environmental problems, the human actions which have made them issues, and the hopes for solutions. It is a book about the human impact on the environment and the ways in which the natural environment impacts human society. The fifth edition has been fully revised and updated throughout, with new case studies, figures, and online resources such as downloadable figures and tables from the text and multiple choice questions for students, accessible at: www.routledge.com/cw/middleton. New topics covered in extended boxed case studies include payment for environmental services, ocean acidification, biofuels in Brazil, waste reduction through industrial symbiosis, and the long-term impact of natural disasters on vulnerable groups. Other approaches and concepts covered for the first time in this new edition include traditional ecological knowledge, environmental justice, the 'resource curse', and urban biodiversity. Eighteen chapters on key issues follow three initial chapters which outline the background contexts of the physical and human environments and the concept of sustainable development. Each chapter provides historical context for key issues, outlines why they have arisen, and highlights areas of controversy and uncertainty to appraise how issues can be resolved both technically and in political and economic frameworks. Each chapter also contains an updated critical guide to further reading and websites, as well as discussion points and essay questions. The text can be read in its entirety or individual chapters adopted as standalone reading. The Global Casino is an essential resource for students of the environment, geography, earth sciences and development studies. It provides comprehensive and inspirational coverage of all the major global environmental issues of the day in a style that is clear and critical.

Parody and Decadence-Michele Hannoosh 2015-12-18 Laforgue's collection of stories, the "Moralites legendaires," freely modernizes established stories of literary tradition according to the stereotypical preoccupations of 1880s Decadence. In this first complete study of the "Moralites" in any language, Laforgue's stories emerge as brilliant examples of parody in its most creative form, among the most original prose creations of the late nineteenth century. Laforgue is known to most English-speaking readers as an influence on T. S. Eliot. In France he is considered a major writer, alongside Symbolist writers such as Baudelaire, Rimbaud, and Mallarme. Laforgue's stories fully exploit the creative possibilities of parody, and thus make a particularly illuminating contribution, resolving many long-standing theoretical questions. The stories provide a rich source for investigating the procedures of parody and for formulating a sufficiently general and flexible theory to account for the diversity of its form over time. Hannoosh examines the 1880s notion of Decadence with which Laforgue's "Moralites" plays and attempts to revise the prevailing view of the movement to reflect the importance of parody therein. She provides close readings of the six stories: "Hamlet, Le Miracle des Roses, Lohengrin, Salome, Persee et Andromede," and "Pan et la Syrinx." Using an intertextual model of literary theory, Michele Hannoosh derives a theory of the genre overall and addresses the issues raised by metafictional theories of parody from the Russian Formalists onward. Michele Hannoosh is Assistant Professor of French and Comparative Literature at the University of California, Davis. She has written many articles on nineteenth-century French literature and art."

Literature of the Low Countries-Reinder Meijer 2012-12-06 In any definition of terms, Dutch literature must be taken to mean all literature written in Dutch, thus excluding literature in Frisian, even though Friesland is part of the Kingdom of the Netherlands, in the same way as literature in Welsh would be excluded from a history of English literature. Simi larly, literature in Afrikaans (South African Dutch) falls outside the scope of this book, as Afrikaans from the moment of its birth out of seventeenth-century Dutch grew up independently and must be regarded as a language in its own right. . Dutc:h literature, then, is the literature written in Dutch as spoken in the Kingdom of the Netherlands and the so-called Flemish part of the Kingdom of Belgium, that is the area north of the linguistic frontier which runs east-west through Belgium passing slightly south of Brussels. For the modern period this definition is clear enough, but for former times it needs some explanation. What do we mean, for example, when we use the term 'Dutch' for the medieval period? In the Middle Ages there was no standard Dutch language, and when the term 'Dutch' is used in a medieval context it is a kind of collective word indicating a number of different but closely related Frankish dialects. The most important of those were the dialects of the duchies of Limburg and Brabant, and of the counties of Flanders and Holland.

The Napoleonic Wars (1)-Todd Fisher 2014-06-06 While Napoleon prepared his army, on the coast of France, for an invasion of England that would never come, Russia and Austria prepared to move against his rear. Napoleon turned on the allies and crushed them in one of history's greatest campaigns. The following year, he met the legendary army of Frederick the Great and annihilated it completely. The year after it was Russia's turn again, and though the northern winter was the major foe, it could not save the Tsar. The world, and warfare, would never be the same again. The Empires of Russia, Austria, Prussia and Britain were not weak. How had Napoleon done this? Why were his methods, and his army, different?

The Emerald Planet-David Beerling 2017-05-12 Plants have profoundly moulded the Earth's climate and the evolutionary trajectory of life. Far from being 'silent witnesses to the passage of time', plants are dynamic components of our world, shaping the environment throughout history as much as that environment has shaped them. In The Emerald Planet, David Beerling puts plants centre stage, revealing the crucial role they have played in driving global changes in the environment, in recording hidden facets of Earth's history, and in helping us to predict its future. His account draws together evidence from fossil plants, from experiments with their living counterparts, and from computer models of the 'Earth System', to illuminate the history of our planet and its biodiversity. This new approach reveals how plummeting carbon dioxide levels removed a barrier to the evolution of the leaf; how plants played a starring role in pushing oxygen levels upwards, allowing spectacular giant insects to thrive in the Carboniferous; and it strengthens fascinating and contentious fossil evidence for an ancient hole in the ozone layer. Along the way, Beerling introduces a lively cast of pioneering scientists from Victorian times onwards whose discoveries provided the crucial background to these and the other puzzles. This understanding of our planet's past sheds a sobering light on our own climate-changing activities, and offers clues to what our climatic and ecological futures might look like. There could be no more important time to take a close look at plants, and to understand the history of the world through the stories they tell. Oxford Landmark Science books are 'must-read' classics of modern science writing which have crystallized big ideas, and shaped the way we think.

The Light Gray People-Nancy McGown Minor 2009-10-05 Although Lipan Apache culture was studied by one of the most eminent anthropologists of the twentieth century, many important questions remain. What is the meaning of the tribal name Lipan? Did Morris Opler's 1935 study of historical Lipan culture conform to practices seen by eighteenth century Spaniards? Only four in situ observations of Lipan Apache culture survive - observations made by a Spanish priest, a Spanish military officer, a Swiss botanist and an Anglo captive. Each source reveals fascinating insights into a hitherto unseen world of Lipan beliefs and practices. The sources reported, for example, that the Lipans were able to predict both solar and lunar eclipses, a practice which went far beyond the vision quest posited by Opler. The Light Gray People seeks to complete a comparative analysis of traditional Lipan Apache culture, as seen through the eyes of four eighteenth and nineteenth century observers and Morris Opler's theories.

Science, Museums and Collecting the Indigenous Dead in Colonial Australia-Paul Turnbull 2017-11-29 This book draws on over twenty years' investigation of scientific archives in Europe, Australia, and other former British settler colonies. It explains how and why skulls and other bodily structures of Indigenous Australians became the focus of scientific curiosity about the nature and origins of human diversity from the early years of colonisation in the late eighteenth century to Australia achieving nationhood at the turn of the twentieth century. The last thirty years have seen the world's indigenous peoples seek the return of their ancestors' bodily remains from museums and medical schools throughout the western world. Turnbull reveals how the remains of the continent's first inhabitants were collected during the long nineteenth century by the plundering of their traditional burial places. He also explores the question of whether museums also acquired the bones of men and women who were killed in Australian frontier regions by military, armed police and settlers.
