<p>Poemata Arcana-Gregorius, 1997 The first, modern scholarly edition, complete with translation, introduction, and commentary, of the poetic writings of Gregory of Nazianzus, one of the great fathers of the early Christian Church. The poems are important both for the insights they give on Gregory's theology and for their close link to classical literature and philosophy.</p> <p>La Fiera letteraria- 1971</p> <p>Images from the Region of the Pueblo Indians of North America-Aby Warburg 1995 Aby M. Warburg (1866-1929) is recognized not only as one of the century's preeminent art and renaissance historians but also as a founder of twentieth-century methods in iconology and cultural studies in general. Warburg's 1923 lecture, first published in German in 1988 and now available in the first complete English translation, offers at once a window on his career, a formative statement of his cultural history of modernity, and a document in the ethnography of the American Southwest. This edition includes thirty-nine photographs, many of them originally presented as slides with the speech, and a rich interpretive essay by the translator. The presentation grew out of Warburg's 1895 encounter with the Hopi Indians, an experience he claimed generated his theory of the Renaissance. In this powerfully written piece, Warburg investigates the relationships among ethnography, iconography, and cultural studies to develop a multicultural history of modernity. As an independent scholar in Hamburg, Warburg led the intellectual circle that included Erwin Panofsky and Ernst Cassirer, pioneers in the investigation of cultural history through the analysis of visual art and the interpretation of symbols. When Warburg wrote this exposition, however, he was a mental patient in a Kreuzlingen sanatorium. Warburg's vulnerable state of mind lends urgency and passion to his discussion of human rationality and cultural demons.</p> <p>The History of the Second Temple Period-Paolo Sacchi 2004-12-13 This book represents the fruit of a long process of study and reflection, a powerful but subtle synthesis, by one of the most eminent scholars of Second-Temple Judaism. Far from a conventional narrative history, it is organized around themes and seeks to uncover the essence of Hebraic/Jewish religious thinking while confronting the phenomenon of its division into several 'parties' and traditions. Drawing also on recent studies of Christianity as a 'Judaism', Sacchi provides a stimulating perspective on the nature of ancient/Oriental and Occidental thought and the intellectual and spiritual heritage of European civilization.</p> <p>The Wild Swans at Coole-William Butler Yeats 1919 The Wild Swans at Coole by William Butler Yeats, first published in 1919, is a rare manuscript, the original residing in one of the great libraries of the world. Borras The idea of love pervades our society, yet it is nearly impossible to answer the question What is love? especially as we witness the divorce of love from sexuality and of sexuality from procreation. Aware that many people today are skeptical about marriage, Angelo Cardinal Scola nevertheless suggests that only in the category of nuptial mystery do we find a way to adequately describe the phenomenon of love. A bright new leader in the Catholic Church, Cardinal Scola argues that the male-female relationship lies near the heart of what it means to bear the image of God. Scola's book explores the essential sexual differences that both separate and unite men and women, and it shows how men and women can realize their purpose in marriage or celibacy. Conversant with papal teaching and Catholic writers from Aquinas to von Balthasar, Cardinal Scola writes with a deep regard for marriage and the family. His Nuptial Mystery will leave readers with a thoroughly Christian appreciation for incarnate love.</p> <p>Medieval Italy-Marvin B. Becker 1981 Analyse van de overgang van een primitieve naar een modern gestructureerde samenleving in het Italië van de 8e en 9e eeuw</p> <p>Justice in the Church-Carlos José Errázuriz Mackenna 2009</p> <p>The Living and True God-Luis F. Ladaria 2010 This is a New Translation of a Book in which the author affirms that the Trinity -- one God in three persons, Father, Son, and Holy Spirit -- is the central mystery of the Christian faith that enlightens all other mysteries of the faith. An understanding of the Trinity is essential for the protection and defence of the divine/human person of Jesus Christ and his saving work. This book documents the historical development of the doctrine of the Trinity and its significance for the Christian faith. In a broad and systematic way, Ladaria traces the debates within the early Christian church as the concept of the Trinity developed. He also reflects on the great masters of church tradition concerning their understanding of the trinity and is a dialogue with various contemporary theologians on this subject. This book has been written especially for theological students and professors as an aid in grasping the Trinitarian formulation both historically and theologically and to assist in deepening their faith and reflection in the mystery of God.</p> <p>Images of Jesus Christ in Islam-Oddbjørn Leirvik 2010-05-27 Comprehensive and contemporary exploration of the role of Jesus in both Islam and Christianity and issues of dialogue in Christian-Muslim relations.</p> <p>The Life of Jesus-Ernest Renan 1887</p> <p>Alienation and Acceleration-Hartmut Rosa 2010 Modern life is speeding-up, incessantly. This book presents an analytic framework to identify the causes and effects of the various speed-up-processes which define modernity - and it develops A Critical Theory of late-modern temporality.</p> <p>The God Gene-Dean H. Hamer 2005-09-27 The overwhelming majority of Americans believe in God; this conviction has existed since the beginning of recorded time and is shared by billions around the world. In The God Gene, Dr. Dean Hamer reveals that this inclination towards religious faith is in good measure due to our genes and may even offer an evolutionary advantage by helping us get through difficulties, reducing stress, preventing disease, and extending life. Popular science at its best, The God Gene is an in-depth, fully accessible inquiry into cutting-edge research that can change the way we see ourselves and the world around us. Written with balance, integrity, and admirable scientific objectivity, this is a book for readers of science and religion alike. From the Trade Paperback edition.</p> <p>The Symbolic Order of the Mother-Luisa Muraro 2017-12-21 Argues that affirming the irreducible differences between men and women can lead to more transformative politics than the struggle for abstract equality between the sexes. In The Symbolic Order of the Mother Luisa Muraro identifies the bond between mother and child as ontologically fundamental to the development of culture and politics, and therefore as key to achieving truly emancipatory political change. Both corporeal development and language acquisition, which are the sources of all thinking, begin in this relationship. However, Western civilization has been defined by men, and Muraro recalls the admiration and envy she felt for the great philosophers as she strove to become one herself, as well as the desire for independence that opposed her to her mother. This conflict between philosophy and culture on the one hand and the relationship with the mother on the other constitutes the root of patriarchy's symbolic disorder, which blocks women's (and men's) access to genuine freedom. Muraro appeals to the feminist practice of gratitude to the mother and the recognition of her authority as a model of unconditional nurture and support that must be restored. This, she argues, is the symbolic order of the mother that must overcome the disorder of patriarchy. The mediating power of the mother tongue constitutes a symbolic order that comes before all others, for both women and men.</p> <p>The Eyes of Faith-Pierre Rousselot 1990 Pierre Rousselot was a young Jesuit when his article "The Eyes of Faith" was published in the French theological journal Recherches de Science Religieuse in 1910. Though widely acknowledged today as one of the most penetrating and influential analyses of the act of faith in modern Catholic theology, it was perceived by the Neo-Scholastic theologians of the day as a major assault on their own method and doctrine, which they regarded as faithful to St. Thomas and the Thomistic tradition. The most serious critiques were written by the Abbe Hippolyte Ligeard, a specialist in the history of the treatises on faith and apologetics in the Middle Ages, and by Stéphane Harent, Rousselot's former professor in the Jesuit scholasticate at Hastings, who published their criticism, respectively, in Recherches de Science Religieuse and in the Dictionnaire de theologie catholique. Rousselot, defending his thesis, published his "Answer to Two Attacks" soon afterward. The present volume contains the first English translation of "The Eyes of Faith," preceded by a substantial introduction placing Rousselot in the intellectual climate of the day and examining some of the presuppositions of the essay. A translation of Rousselot's "Answer to Two Attacks" is also included, as is an introduction that outlines Abbe Ligeard's and Professor Harent's main criticisms of "The Eyes of Faith." Taken as a whole, the book offers a unique way of viewing the development of a significant aspect of modern Catholic theology.</p> <p>Jesus Beyond Christianity-Gregory A. Barker 2010-01-28 This anthology brings together historic readings on Jesus from Judaism, Islam, Hinduism and Buddhism in one volume. The volume provides fresh translations of important texts, 'Key-Issues' introductions, notes, questions for discussion and guides for further reading. Each set of readings ends with a reflection from a leading scholar in the field.</p> <p>Rivalry and Conflict-Ernst van Veen 2005 The rivalry between the Dutch and Portuguese in Asia is one of the classic themes of the early history of European expansion overseas. Yet it is often forgotten that until the end of the sixteenth century the seafarers and traders of Portugal and The Netherlands were the best of friends and close trading partners in Europe. This collection of essays seeks to explain the abrupt change in the relationship by analyzing the European interaction with the maritime world of Monsoon Asia. Portuguese as well as Dutch interests, political, commercial and personal, became closely interwoven with those of the indigenous rulers, merchants and financiers. The final outcome of the conflict in Asia was mainly determined by the different ways in which both parties were able to cope with the intricacies of Asian politics. 'European Expansion in the Indian Ocean' was far from a one-sided affair and its history can only be understood in terms of the interaction of both Europeans and Asians involved. I was a busboy at Marx's Deli. The year was 1934. The place was Third and Hill, Los Angeles. I was twenty-one years old, living in a world bounded on the west by Bunker Hill, on the east by Los Angeles Street, on the south by Pershing Square, and on the north by Civic Center. I was a busboy nonpareil, with great verve and style for the profession, and though I was dreadfully underpaid (one dollar a day plus meals) I attracted considerable attention as I whirled from table to table, balancing a tray on one hand, and eliciting smiles from my customers. I had something else beside a waiter's skill to offer my patrons, for</p>

The Renaissance-Peter Burke 1997-04-11 Annotation In this study Peter Burke distances himself from the traditional interpretation of the Renaissance as essentially Italian, self-consciously modern and easily separable from the Middle Ages. He emphasises the survival of medieval traditions and the process of the creative adaptation of classical forms and values to their new cultural and social contexts in Italy and elsewhere in Europe. The story is carried down to the seventeenth century and the diffusion and disintegration of what had once been a coherent movement. Illustrated with black and white plates, this edition has been updated throughout to take account of recent scholarship, has a fully revised bibliography and will provide the student with a stimulating introduction to the subject.

Christianity and Classical Culture-Charles Norris Cochrane 2003

Studies in Soviet Thought-J.M. Bochenski 2012-12-06 Early in 1958 a number of research projects on Soviet philosophy were started at the Institute of East-European Studies at the University of Fribourg (Switzerland) under the direction of the undersigned. At present, they are all completed or nearly so and their results are described in 18 different volumes. In spite of the fact that all of them have been already published or soon will be (mostly in German), it has been thought worthwhile to present their main conclusions in the form of short English reports. This book contains in the main these reports. Only the two programmatic papers (my own and that of Dr. Buchholz) and the study of Dr. Dahm are not direct results of the above-mentioned projects. But it will be clear to everyone that they, too, are closely connected with the subject envisaged and are written from a similar point of view. It will, perhaps, be convenient to briefly formulate this standpoint. All the writings included here are concerned with recent (i. e. mainly post Stalinist) developments in Soviet philosophy, where "Soviet" is taken in the wide meaning of the word, covering also Marxism-Leninism in Communist countries other than the Soviet Union. All the authors started with the assumption that there are interesting aspects to these more recent developments. There was also a common assumption that only specialized work on first-hand sources can be of relevance in this field.

Just Love-Margaret Farley 2008-02-15 This long-awaited book by one of American Christianity's foremost ethicists proposes a framework for sexual ethics whereby justice is the criterion for all loving, including love that is related to sexual activity and relationships. It begins with historical and cross-cultural explorations, then addresses the large questions of embodiment, gender, and sexuality, and finally delineates the justice framework for sexual ethics. Though Just Love's particular focus is Christian sexual ethics, Farley's framework is broad enough to have relevance for multiple traditions. Also covered are specific issues in sexual ethics, including same-sex relationships, marriage and family, divorce and second marriage, celibacy, and sex and its negativities.

French Finances 1770-1795-J. F. Boshier 2008-10-30 The monarchy of Louis XVI suffered revolution and then destruction after failing to settle its financial difficulties. What precisely were those difficulties? In this book, Professor Boshier shows that the monarchy was financed by a chaotic system of private enterprise which proved increasingly unmanageable and wasteful. Hundreds of profit-seeking accountants - 'capitalists', in the language of the time - stood in the way of reform and even of clear accounting until governments of the French Revolution eventually nationalized the financial system and changed it 'from capitalism into a bureaucracy'. From his close study of the administrative changes Professor Boshier concludes that the National Assembly planned to guard the public finances by bureaucratic organization. 'With a vision of mechanical efficiency and articulation', he writes, 'systems of clock-like checks and balances such as eighteenth-century Frenchmen found everywhere, even in nature itself, the revolutionary planners hoped to prevent corruption, putting their faith in the virtues of organization to offset the vices of the individual men.'

The Transforming Presence of Mystery-R. Zas Friz de 2019-04-26 Spiritual Theology's journey through these last decades shows an itinerary of development, the fruit of which is an ever more solid identity. This book seeks to present a perspective in that itinerary and in tune with the signs of our times: on one hand, militant secularism and, on the other, a widespread, concrete resurgence of experiences of transcendence. In this sense, I am presenting a path of study organized around five concepts: presence, mystery, transcendence, lived experience, and transformation. In effect, the inner transformation worked by the Presence of Mystery leaves a new knowing, in which the relationship with reality is renewed, since it has expanded and dilated beyond sensible perception, opening the subject up to an unlimited and real horizon of transcendence. The awareness of perceiving a 'greater reality' within reality leaves an emotional resonance that teaches a new way of feeling and reacting in the face of sensibly perceived reality.

The Road to Los Angeles-John Fante 2010-05-18 I had a lot of jobs in Los Angeles Harbor because our family was poor and my father was dead. My first job was ditchdigging a short time after I graduated from high school. Every night I couldn't sleep from the pain in my back. We were digging an excavation in an empty lot, there wasn't any shade, the sun came straight from a cloudless sky, and I was down in that hole digging with two huskies who dug with a love for it, always laughing and telling jokes, laughing and smoking bitter tobacco.

The Iguana-Anna Maria Ortese 1987 In this magical novel a count from Milan stumbles upon a desolate community of lost noblemen on an uncharted island off the coast of Portugal. When he discovers, to his astonishment, that their ill-treated servant is in fact a maiden iguana, and then proceeds to fall in love with her, the reader is given a fantastic tale of tragic love and delusion that ranks among the most affecting in contemporary literature. "The reptilian servant is only the first in a series of fantastic touches that transform the narrative into a satiric fable dense with the echoes of Shakespeare's 'Tempest' and Kafka's 'Metamorphosis.' . . . The Iguana is a superb performance.""E"New York Times Book Review

The Great White Brotherhood-Elizabeth Clare Prophet 2015-08-31 "Throughout the ages, there have been men and women in every race and religion that have mastered time and space, transcended the cycles of karma and rebirth, and returned to the Source of all life. By attaining the goal of life, the ascension, these souls have become ascended masters. In this book, drawn from the author's pivotal spiritual conference held at Mount Shasta in 1975, you will discover how the saints and sages of both East and West work together behind the scenes of life with seekers in every field of human endeavor. Learn about this vast brotherhood of light, known as the Great White Brotherhood (the word "white" refers not to race but to the aura of white light that surrounds these ascended masters), their devotion to humanity, and their tireless efforts to help you and those you love. Contains an easy-to-understand and unique approach to spiritual astrology called the "Cosmic Clock," with diagrams. Also explores key interpretations of the Book of Revelation, America's unique role, and the little-known vision of George Washington and the prophecy of Sir William Hope about the future of America. "

Focus on Jesus-Gerald O'Collins 1996 "Who do you say I am?" Jesus asked his disciples. There has never been a shortage of answers to his question, and the debate has never been more intense than it is today. Each generation produces its own versions of Jesus, some more, some less in keeping with the traditions of the Church. In this book, two eminent Jesuit theologians present some of the fruits of their many years of labor on the question of Jesus and his identity, sometimes in confrontation with other theologians -- notably John Dominic Crossan, John Hick, Hans Kung, and Edward Schillebeeckx, as well as other writers on the wilder shores of speculation. Difficult questions about his incarnation, birth, ministry, crucifixion, resurrection and work of salvation are all debated with scholarship and sensitivity to the mystery of the one who is at the heart of Christian life and thought, Jesus Christ.
