ICWIM6-Bernard Jacob 2013-01-29 After Zurich (1995), Lisbon (1998),
Orlando (2002), Taipei (2005) and Paris (2008), the International
Conference on Weigh-In-Motion (ICWIM6) returns to North America to join
with the North American Travel Monitoring Exhibition and Conference
(NATMEC 2012). International WIM conferences are organized by the
International Society for Weigh-In-Motion (ISWIM). The conference
addresses the broad range of technical issues related to weighing sensors
and systems, weight data management and quality assurance, enforcement,
road operation and infrastructure related issues. It provides access to
current research and best practices, in an international forum for WIM
technology, standards, research, policy and applications. Heavy vehicle
mass monitoring, assessment and enforcement are key actions to ensure
road safety and fair competition in freight transport, facilitating the inter-
modality, and to design and maintain reliable and durable road
infrastructures, with a better compliance of weights and dimensions. WIM is
becoming part of a global ITS for heavy traffic management, contributing to
reduce the environmental impact of freight transport and to a better use of
the existing road networks.

Life to Those Shadows-Noël Burch 1990-11-21 Noël Burch's singularly
perceptive view of film and its origins will interest all who care about film
theory and history. Life to Those Shadows presents a critique of "classical"
approaches to film: the assumptions that what we call the language of film
was a natural, organic development, and that it lay latent from the outset in

the basic technology of the camera, waiting for the prescient pioneers to bring it into being. The view that film language was a universal, neutral medium, innocent of any social or historical meaning in itself, is also challenged here. Burch's major thesis is that, on the contrary, film language has a social and economic history, that it evolved in the way it did because of when and where it was constructed—in the capitalist and imperialist West between 1892 and 1929. From this perspective, the book examines the emergence of what it defines as cinema's Institutional Mode of Representation and the sociohistorical circumstances in which it took place. Central to the Institutional Mode are the principles of visualization—camera placement and movement, lighting, editing, mise-en-scène—that filmmakers and audiences came to internalize over the first three decades. Special emphasis is laid on the all-important change that occurred in the placing of the spectator, from a position of exteriority to the film image—implicit in both film-form and viewing conditions during the primitive era (pre-1909)—to the imaginary centering of the spectator-subject—completed only with the generalization of lip-synch sound after 1929. Burch contends that this imaginary centering of a sensorially isolated spectator is the keystone of the cinematic illusion of reality, still achieved today by the same means as it was sixty years ago.

The Saints of Salvation-Peter F. Hamilton 2020-11-17 With refreshing determination and hopeful grit, humanity activates a bold endgame against an alien invasion in the finale of a series heralded as "a modern classic" (Stephen Baxter) from "one of the finest writers the genre has produced" (Gareth L. Powell). Humanity is struggling to hold out against a hostile takeover by an alien race that claims to be on a religious mission to bring all sentient life to its God at the End of Time. But while billions of cocooned humans fill the holds of the Olyix's deadly arkships, humankind is playing an even longer game than the aliens may have anticipated. From an ultra-secret spy mission to one of the grandest battles ever seen, no strategy is off the table. Will a plan millennia in the making finally be enough to defeat this seemingly unstoppable enemy? And what secrets are the Olyix truly hiding in their most zealously protected stronghold? With his trademark optimism about humanity's tenacity and capacity for greatness, Peter F. Hamilton wraps up this brilliant saga with a bang—and reminds us why freedom of choice is the most important freedom there is.

The Anomaly-Michael Rutger 2018-06-19 INDIANA JONES MEETS THE X-FILES IN THIS "TAKE NO PRISONERS' (PRESTON & CHILD) SURVIVAL THRILLER OF A ROGUE ARCHAEOLOGIST TRAPPED IN A GRAND CANYON CAVE THAT'S A CONSPIRACY THEORY COME TO LIFE. Not all secrets are meant to be found. If Indiana Jones lived in the X-Files era, he might bear at least a passing resemblance to Nolan Moore -- a rogue archaeologist hosting a documentary series derisively dismissed by the "real" experts, but beloved of conspiracy theorists. Nolan sets out to retrace the steps of an explorer from 1909 who claimed to have discovered a mysterious cavern high up in the ancient rock of the Grand Canyon. And, for once, he may have actually

found what he seeks. Then the trip takes a nasty turn, and the cave begins turning against them in mysterious ways. Nolan's story becomes one of survival against seemingly impossible odds. The only way out is to answer a series of intriguing questions: What is this strange cave? How has it remained hidden for so long? And what secret does it conceal that made its last visitors attempt to seal it forever?

Dada-Leah Dickerman 2005 Dada includes many of the key figures in the history of modernism, such as Hans Arp, Marcel Duchamp, Max Ernst, Hannah Hoch, John Heartfield, Francis Picabia, Kurt Schwitters, and Sophie Taeuber, and introduces artists who are less well known. This book explores the variety of art-making practices that emerged between 1916 and 1924 in the movement's primary centers: Zurich, Berlin, Hannover, Cologne, New York, and Paris. Six city essays by scholars of the movement; an illustrated chronology; more than forty artists' biographies; period photographs; and extensive plate sections document a provocative and influential artistic era.

This illustrated book accompanies Dada, the most comprehensive museum exhibition of Dada art ever mounted in the United States, on view in 2006 at the National Gallery of Art, Washington, and The Museum of Modern Art, New York. The exhibition was on view at the Musee national d'art moderne-Centre Pompidou in Paris in 2005.
