El sueño eterno (Philip Marlowe 1)-Raymond Chandler 2013-09-05 ¿Serías capaz de resolver un misterioso caso de amenaza de muerte entre la alta sociedad de Hollywood?. Acompaña al detective Philip Marlowe, el detective más célebre del siglo XX, en este complejo caso. El detective Philip Marlowe se enfrenta a un caso que promete ser sencillo: el viejo general Sternwood, parálítico y extremadamente rico, ha recibido una nota de chantaje que concierne a su hija menor, la salvaje Carmen. Recorriendo la ciudad desde su despacho en Hollywood Boulevard hasta las mansiones de los barrios residenciales, Marlowe deberá adentrarse en un laberinto de perversidad cada vez más oscuro. Esta edición reúne también los dos relatos pulp, publicados en la revista Black Mask, que Chandler canibalizó para escribir la novela: Asesino bajo la lluvia (1935) y El telón (1936). Reseña: «Raymond Chandler inventó una nueva forma de hablar sobre Estados Unidos y desde entonces ha logrado transformar nuestra mirada.» Paul Auster

Production and Consumption in the Low Countries, 13th-16th Centuries-Raymond van Uytven 2001 The subject of this volume is the relationship between production and consumption, considered not only as the supply and demand sides of economic life, but within the broader context of the societies of the Low Countries between the 12th and the 16th centuries. Amongst the topics covered are the reality of the so-called 'late medieval depression', comparisons between the great merchant cities of Bruges and Antwerp, and the actual importance of the trade in art and luxury goods. One group of articles then looks in detail at the cloth industry, which remained the mainstay of the region's wealth, and the effects upon it of changes in technology and in fashion, while the volume concludes with two studies specially translated from Dutch, on wine and beer consumption. Renegade at Heart-Lorenzo Lamas 2014-12-09 Meet the real Lorenzo Lamas. Lorenzo Lamas has played many roles over the course of his roller coaster career. Star of two major television shows, five-time husband, and reality show star, Lamas has been tabloid fodder for decades. Fans can easily believe they have seen every side of Lamas. But the truth is far more interesting-and surprising. Son of film stars Fernando Lamas and Arlene Dahl, and stepson of swimmer and actress Esther Williams, Lorenzo was born into Hollywood royalty. But his path was not easy. Overweight and aimless as a child, he found it hard to live up to the expectations of his famous father, whose exploits made him the inspiration for the "most interesting man in the world." But Lorenzo surprised everyone, shaping up and ultimately winning countless black belts in tae kwon do and karate.

Despite his father's early discouragement, he pursued acting, starring in Falcon Crest and Renegade. In Renegade at Heart, the Emmy- and Golden Globe-nominated actor pulls back the curtain to share his startling and explosive story-the money and notoriety, the fights and falling outs, his years of battling abandonment and attachment issues after his parents' divorce, his epic romances and tabloid-making marriages to his four ex-wives. He delves deep into his relationships with his six children and with his famous father, whose penetrating words of wisdom have guided him through turbulent times and to a sense of renewal and new beginnings. Featuring 50 rare, never-before-shared family and personal photographs from his private collection, Renegade at Heart is everything Lamas's millions of fans have been waiting for-the unvarnished truth and his side of his remarkable journey and fully fleshed rumination of the highs and lows of an extraordinary life and survival of an extraordinary man and actor.

An Introduction to Astrobiology-David A. Rothery 2018-03-01 How did life on Earth begin? How common is it elsewhere in the Universe? Written and edited by planetary scientists and astrobiologists, this undergraduate-level textbook provides an introduction to the origin and nature of life, the habitable environments in our solar system and the techniques most successfully used for discovery and characterisation of exoplanets. This third edition has been thoroughly revised to embrace the latest developments in this field. Updated topics include the origins of water on Earth, the exploration of habitable environments on Mars, Europa and Enceladus, and the burgeoning discoveries in exoplanetary systems. Ideal for introductory courses on the subject, the textbook is also well-suited for self-study. It highlights important concepts and techniques in boxed summaries, with questions and exercises throughout the text, with full

solutions provided. Online resources, hosted at [www.cambridge.org/features/planets](http://www.cambridge.org/features/planets), include selected figures from the book, self-assessment questions and sample tutor assignments.

The Athenaeum-

Planets and Life-Woodruff T. Sullivan, III 2007-09-13 Astrobiology involves the study of the origin and history of life on Earth, planets and moons where life may have arisen, and the search for extraterrestrial life. It combines the sciences of biology, chemistry, palaeontology, geology, planetary physics and astronomy. This textbook brings together world experts in each of these disciplines to provide the most comprehensive coverage of the field currently available. Topics cover the origin and evolution of life on Earth, the geological, physical and chemical conditions in which life might arise and the detection of extraterrestrial life on other planets and moons. The book also covers the history of our ideas on extraterrestrial life and the origin of life, as well as the ethical, philosophical and educational issues raised by astrobiology. Written to be accessible to students from diverse backgrounds, this text will be welcomed by advanced undergraduates and graduates who are taking astrobiology courses.

Nature Conservation-Dan Gafta 2007-02-15 This book provides a multi-disciplinary coverage of the broad fields of species, community and landscape conservation. The panel of contributors consider a range of topics in vegetation and biodiversity assessment, planning and management of conservation zones and protected areas, together with historical and social/legal issues of the environment and nature conservation. The book celebrates the life's work of Professor Franco Pedrotti.

Soil and Culture-Edward R. Landa 2010-01-28 SOIL: beneath our feet / food and fiber / ashes to ashes, dust to dust / dirt! Soil has been called the final frontier of environmental research. The critical role of soil in biogeochemical processes is tied to its properties and place—porous, structured, and spatially variable, it serves as a conduit, buffer, and transformer of water, solutes and gases. Yet what is complex, life-giving, and sacred to some, is ordinary, even ugly, to others. This is the enigma that is soil. Soil and Culture explores the perception of soil in ancient, traditional, and modern societies. It looks at the visual arts (painting, textiles, sculpture, architecture, film, comics and stamps), prose & poetry, religion, philosophy, anthropology, archaeology, wine production, health & diet, and disease & warfare. Soil and Culture explores high culture and popular culture—from the paintings of Hieronymus Bosch to the films of Steve McQueen. It looks at ancient societies and contemporary artists. Contributors from a variety of disciplines delve into the mind of Carl Jung and the bellies of soil eaters, and explore Chinese paintings, African mud cloths, Mayan rituals, Japanese films, French comic strips, and Russian poetry.
