1977 A study of the policies of Great Britain & France in the Near East during & after the First World War, describing the British & French occupation of Syria & Lebanon, & the Emir Faisal's government in Syria from 1918 to 1920. "The work is now a classic study of the World War I relationship between the Allies, notably Britain & the Arabs who were beginning their break from the Ottoman Empire."-choice. Central Life Interests-Robert Dubin 1992-01-01 Individuals in modern societies move among a variety of social encounters each day. Often contradictory behaviors are required to carry out these interactions. If behaviors and values are inconsistent from one setting to another, is a single self capable of adjusting adequately to such inconsistencies? Or is the total self made up of several selves, capable of effective performance in a complex and contradictory society? This volume addresses these fundamental concerns of social psychology and social organization. Dubin concludes that human beings have evolved socially so that there

is an effective match between personality structures of modern persons and the advanced social systems in which they live. Dubin finds that people function competently in most institutions while investing little positive motivation in their performance. They reserve strong motivations for limited, self-chosen central life interests that define their core self. This results in a two-tier structure of living. The first level consists of self-chosen actions and values constituting a central life interest, geared toward self-realization. The second tier encompasses the bulk of social action as required behavior, facilitating institutional functioning, and maintaining social order. In today's modern world the individual occupies a more central position than ever. Modern citizens are freer than in the past to expand their ideas about themselves, encouraged by industrial and commercial institutions, while seeking, in their central life interests, the realization of their creative individualism. For the future, Dubin envisions a social system

expanding opportunities for a broader range of central life interests. At the same time, required behaviors will have a more limited range, but will be enforced more rationally and imperatively in the interests of social order.

"Central Life Interests "is an original and perceptive exploration of the linkages between persons and society.

It will be of interest to sociologists, psychologists, economists, and administrative scientists.

The Culture of Time and Space 1880-1918-Stephen Kern 1983-01-01 THIS

EDITION HAS BEEN REPLACED BY A NEWER EDITION From about 1880 to World War I, sweeping changes in technology and culture created new modes of understanding and experiencing time and space.

Stephen Kern writes about the onrush of technics that reshaped life concretely-- telephone, electric lighting, steamship, skyscraper, bicycle, cinema, plane, x-ray, machine gun--and the cultural innovations that shattered older forms of art and thought--the stream-of-consciousness novel,

psychoanalysis, Cubism, simultaneous poetry, relativity, and the introduction of world standard time. Kern interprets this generation's revolutionized sense of past, present, and future, and of form, distance, and direction. This overview includes such figures as Proust Joyce, Mann, Wells, Gertrude Stein, Strindberg, Freud, Husserl, Apollinaire, Conrad, Picasso, and Einstein, as well as diverse sources of popular culture drawn from journals, newspapers, and magazines. It also treats new developments in personal and social relations including scientific management, assembly lines, urbanism, imperialism, and trench warfare. While exploring transformed spatial-temporal dimensions, the book focuses on the way new sensibilities subverted traditional values. Kern identifies a broad leveling of cultural hierarchies such as the Cubist breakdown of the conventional distinction between the prominent subject and the framing background, and he argues that these levelings parallel

the challenge to aristocratic society, the rise of democracy, and the death of God. This entire reworking of time and space is shown finally to have influenced the conduct of diplomacy during the crisis of July 1914 and to have structured the Cubist war that followed.

Goldick 2001 This unique introduction to physics for readers who are particularly interested in the human body covers a limited number of distinct physics topics (related to mechanics and heat) in great depth and with many examples and problems that relate directly to readers' interests. Each topic is developed quantitatively using high school-level algebra (linear equations, simultaneous equations), trigonometric functions, and vectors. Applications focus on typical situations--e.g., the need for and proper use of a cane; the need for heat transfer from the body to the environment during exercise and the relative contributions of the various mechanisms (convection, radiation, evaporation of sweat); the

relation between energy ingested as food and energy expended during exercise; etc. Motion; Force; Vectors; Newton's Second Law; Momentum And Impulse; Angular Motion; Torque; Shoulder; Knee; Lower Back; FHP; Heat And Energy; Conservation Of Energy; Work; Chemical Energy; Elastic Energy; Nuclear Energy. For premedical students, Physical Therapists, and Occupational Therapists. to a new world of emotions and consciousness and your own involvement and ownership. Have you ever had something to say, but I couldn't find the right words? Was there ever a time when words just didn't do justice to your thoughts or feelings because they were stronger than words? Have you ever wanted to express yourself in a way that transcends all that has been said before? Then *The Thoughts of a Heart* is a reflection of yourself, what you thought no one could express or feel of you. Within these pages you will find that which you wish to share with yourself and that which you wish to share with others. The authors writings have been used to mend, heal, strengthen, and star relationships and sharings of our innermost value with ourselves and with others. What you think and wish to say to yourself and others is said with words from the soul, in *The Thoughts of a Heart*.

Oulipoems 2-Philip Terry 2009 Poetry. Harry Matthews writes: "The title of Philip Terry's brilliant book pays

explicit homage to the Oulipo; but while he uses many of the group's methods, he invariably goes his own way with them, making poems that are full of an original sense of wit and wonder. He has taken the notion that poetry can emerge from arbitrary procedures and transformed it into a sumptuous variety of explosively novel delights." *Handbook of Enemy Ammunition-Naval & Military Press, The 2002-09-01* This pamphlet was issued at the end of the Second World War, particularly to RAOC ammunition technicians, to enable safe identification of all German ammunition for rifles, mortars and cannon. It contains not only a description of the various types of ammunition, but has a series of coloured plates which show in detail main types of shell, particularly anti-tank and anti-aircraft rounds. It includes shell for the famous 88mm Flak and Pak (the same gun but in the ground role as a much respected and feared anti-tank gun. Further plates show ammunition box/case wrappers, and there is a listing of powder components

America's Oldest Corporation and First CEO-Arseny James Melnick 2008-01 This book examines the early principles behind Harvard's success and provides a look at the fascinating origin of two of America's most important institutions: the university and the corporation. Its thesis is that a combination of sacrificial commitment and strong leadership by Harvard's first President, Henry Dunster, was largely responsible for Harvard's survival in its early years. The corporate structure and the principles that he laid down beginning in 1650 played a key role in Harvard's later enormous success as an

institution of higher learning and became a "brand" for intellectual excellence known and respected throughout the world.
