The Epic History of Biology–Anthony Serafini 2013-11-11 The search for our elusive human origins and an understanding of the mysteries of the human body have challenged the most inquisitive and imaginative thinkers from Egyptian times through the twentieth century. In The Epic History of Biology, Anthony Serafini - a distinguished philosopher and historian of science - regales the reader with the triumphs and failures of the geniuses of the life sciences. The subtleties of the animal kingdom - anatomy, zoology, and reproduction - along with the complexities of the plant kingdom, have fascinated humanity as far back as 5000 years ago. Astounding ancient knowledge of the arcane curing powers of herbs as well as early experimentation with different chemical combinations for such purposes as mummification led to today's biological technology. Innovative pioneers such as Aristotle, Galen, Hippocrates, and Vesalius challenged the limits of knowledge and single-mindedly pursued their work, often in the face of blind superstition. In superb, lyrical prose Serafini recreates the ideas and theories of these revolutionaries from ancient times through today, against the backdrop of the dogma and prejudices of their time. He explores the inspired revelations that gave birth to such discoveries as the controversial theory of evolution, the humble origins of genetics, the fantastic predictions of quantum mechanics, and the infinite promise of computer technology. Even today the biological sciences are undergoing rapid and kaleidoscopic changes. Every new insight gives rise to a myriad of new ethical questions and responsibilities. The Epic History of Biology confronts these issues head on and predicts the wondrous new directions biology will follow.

The Roman Wall–John Collingwood Bruce 1851 The Phoenician Origin of Britons Scots and Anglo-Saxons - Discovered by Phoenician and Sumerian Inscriptions in Britain, by Preroman Briton Coins and-L. A. Waddell 2016-08-26 The long-lost origin and early history of our ancestors, the Britons, Scots and Anglo-Saxons, in the "Prehistoric" and Pre-Roman periods, back to about 3000 b.c., are now recovered to a great extent in this present work, by means of newly discovered historical evidence.' This book contains Waddell's historic interpretation of the inscription of the Newton Stone found in Aberdeenshire, Scotland. Laurence Austine Waddell was born in Scotland on 29 May 1854. He became a well known explorer and archaeologist, but his reputation as a Sumerologist gained no recognition and his various works on the history of civilization have caused much controversy.

The Secret of Fame–Gabriel Zaid 2008 "Gabriel Zaid is a marvelously elegant and playful writer—a cosmopolitan critic with sound judgment and a light touch. He is a jewel of Latin American letters, which is no small thing to be. Read him—you'll see."—Paul Berman "Mr. Zaid's goal is to capture the variety of anxieties that beset literary fame-seekers, and he does so with a mocking cleverness. A serious theme, though, runs through his book—that with the possible exception of a few agonized painters and musicians, no one can quite touch the exquisite torment of the literary artist as he faces the hazards of fate."—Wall Street Journal In So Many Books, Gabriel Zaid explored the predicament in which all "unrepentant readers" find themselves today, when "the human race publishes a book every thirty seconds"—more books than any of us can even contemplate, much less read. Now, in The Secret of Fame, this "playful celebrant of literary proliferation" (New Yorker) examines the methods and motivations of literary fame-seekers from ancient times to the present day. He shines a critical, yet humorous, light on today's book world, whose denizens often find it "more interesting to talk about writers than to read them," and he takes a serious look at the desire for fame and the disillusionment that can engulf those who achieve it. Along the way, Zaid pokes fun at literary and scholarly traditions, including the unwritten rules of quoting other authors, the ascendancy of the footnote, and the practice of publishing "foolishly complete works." More important to Zaid than the fame of a piece of writing or of its writer is the miracle of great writing. "Fame concentrates society's attention on a few names. This can be a good thing. It keeps us reading the great books, keeps us revisiting the great works of art. But fame can also be a bad thing. It keeps us focused on names, not the living experiences of great works," which "focus our minds, speak to the best in us, and spark our imagination." Though the hunger for fame is not going away, the deeper quest on the part of the maker (as writer, artist, actor, etc.) is to make us "feel more alive, more engaged in meaningful conversation with life." He concludes, "Nobody knows where masterpieces come from. Miracles are miracles. They catch us before we catch them. But we're not trapped by them—we're set free." Gabriel Zaid's poetry, essays, social and cultural criticism, and business writings have been widely published throughout the Spanish-speaking world. Zaid is the founder and manager of a consulting firm in Mexico City involved with the publishing business. Natasha Wimmer is an editor and a translator in New York City. Her recent translations include The Savage Detectives and 2666 by Roberto Bolano and The Way to Paradise by Mario Vargas Llosa.

Neighbors With Benefits–Marissa Clarke 2015-06-30 Sure, it might not be completely unfair to call Michael Anderson a "control freak". It's helped him in business—he's the CEO of Anderson Enterprises, after all. But he's trying to learn to let loose just a tiny bit. Still, he's not quite sure why his therapist thinks dogstimming will fix anything? Especially since Michael and this particular canine share a kind of mutual loathing. To make matters worse, his new next door neighbor keeps disrupting his peace—and his dates—by blasting the worst possible music at the worst possible times. Artist and free spirit Mia Argopolis just landed the perfect gig to complement her career as an art therapist and her preference for living a nomadic life: housesitting in the Upper West Side. Too bad the guy next door is an arrogant stick in the mud with a penchant for calling security whenever she tries to drown out the noises coming from his side of the wall. Suddenly, all in one day, Mia finds herself fighting for survival in unbearable situations. First, her dinner rolls go apocalyptic and try to take out the whole kitchen. Then her douchebag ex shows up out of the blue, her bathtub overflows, and she's attacked by a Shih Tzu with the personality of Godzilla. When Mia's uptight neighbor steps in as her unlikely hero and unplanned fiancé (wait, what?), she's not sure how much stranger this day could get. Each book in the Anderson Brothers series is a standalone, full-length story that can be enjoyed out of order. Living Archaeology–Philip Rahtz 2001 This is the life-story of one of Britain's most influential and colourful archaeologists, whose career has spanned the second half of the twentieth century. After earlier short-lived careers in accountancy, the Royal Air Force, photography and school-teaching, Philip Rahtz stumbled into archaeology after the Second World War - and never looked back. Having started as a freelance field archaeologist, he was appointed to a lectureship in the University of Birmingham in 1963, and in 1978 he founded a new department at the University of York. Over the years he has excavated many important sites of all periods in England such as the Saxon and medieval palaces at Cheddar, the Cistercian Bordesley Abbey and several Dark Age sites in Somerset, including Glastonbury Tor and the 500-grave cemetery at Cannington. He has also dug in Yugoslavia, Greece, Spain and Ghana. But Professor Rahtz's story is much more than a catalogue of remarkable excavations. We learn about his family, childhood and adolescence; the progression from backward boy to professor; his philosophy, political stance, his musical and other tastes - and his strongly held views on sexuality. His easy, anecdotal style, spiced with some fairly scandalous stories, will ensure that this is a life-story that will appeal to anyone in archaeology.

Contagious Ideas–Ben Sandford Cullen 2000 Neo-Darwinism is becoming an increasingly important influence on archaeological theory, as a number of recently edited books on `Darwinian archaeologies' make clear. However, many of these volumes are internationally inconsistent and reflect the muddled understanding many archaeologists have of the potential of Darwin's thought for interpreting material culture. Ben Cullen's book starts by critiquing some recent neo-Darwinist approaches, including cultural evolutionism and cultural sociobiology. He then presents a neo-Darwinian paradigm of extreme power, which he has termed the Cultural Virus Theory (CVT). This focuses on explaining the transmission of ideas by comparing cultural memes wit natural genes. In the final section he takes the important step of applying this theory to real materials; demonstrating how CVT can be used to understand the spread of megalithic monuments in prehistoric North-West Europe, the diffusion of the renaissance in medieval Europe and the basis of stylistic change in pottery. Tragically this collection of brilliant thoughts is published posthumously. Ben Cullen was close to finishing a major book when he died suddenly in 1995 and his writings have been gathered into a consistent whole by James Steele, Richard Cullen and Christopher Chippendale.

Woodstown-Ian Russell 2014-10-01 In 2003, archaeologists investigating the proposed route of the Waterford City Bypass on behalf of Ireland's National Roads Authority discovered the remains of a 9th century Viking settlement on the southern bank of the River Suir at Woodstown, County Waterford. The discovery has been hailed as one of the most significant made by Irish archaeologists in modern times. This book is the definitive report on the archaeological excavations undertaken at Woodstown, as it draws together all the existing evidence from the site and places it in its national and international context. About the excavation: the site has significant implications for the understanding of the earliest phases of Viking raiding in Ireland and the establishment of their settlements on the island * it contains one of the most richly furnished Viking warrior burials in Ireland or Britain * Woodstown was an important center for trade and exchange: materials recovered from the site include amber from the Baltic, silver coins from the Near East, and weapons from Scandinavia - reflecting the range of the Viking trading networks in the 9th century * the origins of the vibrant and distinctive Hiberno-Norse culture that developed in Ireland in the following centuries may be traced back to Woodstown and similar sites. Supernatural Transportation–Michael Van Vlymen 2016-06-05 If the book ("Translation by Faith") is the "how to" of moving in the spiritual realms, then this book would be the "why." Supernatural Transportation is my personal testimony of the adventures God is taking me on as He teaches me about this reality of moving through space, time and dimension for His purposes and His Kingdom. It is my sincere prayer that as you read this book it inspires you to say "Yes Lord" I will do what you ask me to do and go where you tell me to go. I pray that you believe that God is still the God of the Bible and does the same things He has always done, and that you will let Him prove it to you. He will not disappoint you! I do my best to share every part of the journey so that there are no missing pieces. It is my desire to see that all those who are willing, learn how to see and go into the spirit and walk in the will and the power of God. We ALL have an important role in God's plan. Embrace who you are and begin to live from that HEAVENLY place!

Twelve-year-old William Eng, a Chinese American boy, has lived at Seattle's Sacred Heart Orphanage ever since his mother's listless body was carried away from their small apartment five years ago. On his birthday—or rather, the day the nuns designate as his birthday—William and the other orphans are taken to the historical Moore Theatre, where William glimpses an actress on the silver screen who goes by the name of Willow Frost. Struck by her features, William is convinced that the movie star is his mother, Liu Song. Determined to find Willow and prove that his mother is still alive, William escapes from Sacred Heart with his friend Charlotte. The pair navigate the streets of Seattle, where they must not only survive but confront the mysteries of William's past and his connection to the exotic film star. The story of Willow Frost, however, is far more complicated than the Hollywood fantasy William sees onscreen.
