The trick is that we all have to do exactly the same things as we did the first time—minute by minute, hour by hour, year by year, betting on the wrong horse again, marrying the wrong person again. Why? You'll have to ask the old science fiction writer, Kilgore Trout. This was all his idea. From the Trade Paperback edition.

Explorations in Muscovite History-Samuel H. Baron 1991 The main themes of this volume are the explorations and geographical discoveries, and the economic circumstances that lay behind the establishment of commercial relations between Muscovite Russia and Elizabethan England. It also includes four hitherto unpublished studies, together with additional notes to other articles. In the opening pieces Samuel Baron pursues his researches into socio-economic history, with particular reference to the development of commerce and mercantilism in Russia during the 16th-and 17th-centuries. The following section then deals with the discovery of the sea route round the north of Norway, looking on the one hand at the position of seafaring in Russia and the role the Russians themselves may have played in these explorations, for instance in the discovery of Spitsbergen, and on the other at the English quest for a northeastern passage to China. Other articles examine the spread in the West of geographical knowledge about Muscovy, as revealed by the development of cartography, and finally focus on the work of Herberstein and its importance as a stimulus for the English expedition of 1583 that led to the opening of direct Anglo-Russian relations. Les explorations et les découvertes géographiques, ainsi que les circonstances économiques À la base de la création des rapports commerciaux entre la Russie moscovite et l'Angleterre élisabéthaine forment les thèmes principaux de ce volume. Quatre études jusqu'ici inédites sont aussi incluses, ainsi que des notes supplémentaires. Samuel Baron débute cet ouvrage en poursuivant ses recherches sur l'histoire socio-économique et se réfère en particulier au développement du mercantilisme en Russie durant les 16e et 17e siècles. La section suivante traite de la découverte de la voie maritime passant au Nord de la Norvège; y sont examinés d'une part, le rôle des Russes quant À ces explorations, comme celle, par exemple, qui mena À la découverte de Spitsbergen et, d'autre p

Finding Makoti-Scotty Wang 2019-07-12 A journey and self discovery of defining modern manhood through personal experiences. Thirsting to understand "who stole marriage from us millennials", and how women have defined themselves. The book starts with a walk into Genesis, then through to Revelations and finally concluding in Proverbs. The journey shares archived poems to an unknown future wife, letters and notes to exes. It reveals a man's perspective of love, heartbreak, dating and marriage. The book is very unique as it takes on to challenge literature and storytelling. Almost breaking all the rules, it engages in a conversation style writing. Also a unique feature is that it is written like a twitter thread and the pages are broken into consumable bits. This coming from the insight that a lot of millennials don't read as much. The problem the author wanted to solve was having more

people start reading through this book. A beautiful addition to the book is that it embraces colloquial language that is used by African Millennials. A very daring piece of literature.

Excavating Memory-Maria Theresia Starzmann 2016 The chapters in this volume represent an intriguing, interdisciplinary approach to the study of memory, touching on issues of heritage, storytelling, and reconciliation. The central concern of this volume is not only how we remember the past in the present, but who remembers the past, opening up an engagement with descendant communities and public scholarship.

Tumor Organoids-Shay Soker 2017-10-20 Cancer cell biology research in general, and anti-cancer drug development specifically, still relies on standard cell culture techniques that place the cells in an unnatural environment. As a consequence, growing tumor cells in plastic dishes places a selective pressure that substantially alters their original molecular and phenotypic properties. The emerging field of regenerative medicine has developed bioengineered tissue platforms that can better mimic the structure and cellular heterogeneity of in vivo tissue, and are suitable for tumor bioengineering research. Microengineering technologies have resulted in advanced methods for creating and culturing 3-D human tissue. By encapsulating the respective cell type or combining several cell types to form tissues, these model organs can be viable for longer periods of time and are cultured to develop functional properties similar to native tissues. This approach recapitulates the dynamic role of cell-cell, cell-ECM, and mechanical interactions inside the tumor. Further incorporation of cells representative of the tumor stroma, such as endothelial cells (EC) and tumor fibroblasts, can mimic the in vivo tumor microenvironment. Collectively, bioengineered tumors create an important resource for the in vitro study of tumor growth in 3D including tumor biomechanics and the effects of anti-cancer drugs on 3D tumor tissue. These technologies have the potential to overcome current limitations to genetic and histological tumor classification and development of personalized therapies.

Part II, the Finder, is a reverse dictionary that allows users to start with a meaning or concept to then find word parts that express the meaning. The expanded Part III organizes word parts under 20 convenient categories—like The Body, Fear or Dislike of, Experts and Shapes.

Adam Haberberg-Yasmina Reza 2008-12-10 From the award-winning author of Art and Desolation comes this bitingly funny new novel that follows the absurd adventures of a man struggling with a midlife crisis. Adam Haberberg is losing his sight in his left eye. His new book is a flop. And his marriage isn't doing too well. But while sitting one day on a park bench, he sees an old friend from high school, Marie Thérèse, and suddenly his whole life seems to change. Adam soon finds that his own life has somehow become intertwined with Marie Thérèse's, throwing everything into question. A wry tragicomedy and a nuanced study of a man in the throes of an existential crisis, Adam Haberberg has the same wit and panache that have marked all of Yasmina Reza's work to date.

Reporting Inequality-Sally Lehrman 2019-03-04 Under increasingly intense newsroom demands, reporters often find it difficult to cover the complexity of topics that deal with racial and social inequality. This path-breaking book lays out simple, effective reporting strategies that equip journalists to investigate disparity's root causes. Chapters discuss how racially disparate outcomes in health, education, wealth/income, housing, and the criminal justice system are often the result of inequity in opportunity and also provide theoretical frameworks for understanding the roots of racial inequity. Examples of model reporting from ProPublica, the Center for Public Integrity, and the San Jose Mercury News showcase best practice in writing while emphasizing community-based reporting. Throughout the book, tools and practical techniques such as the Fault Lines framework, the Listening Post and the authors' Opportunity Index and Upstream-Downstream Framework all help journalists improve their awareness and coverage of structural inequity at a practical level. For students and journalists alike, Reporting Inequality is an ideal resource for understanding how to cover structures of injustice with balance and precision.

Spinning Side Kick-Anita Lahey 2011 Anita Lahey's second collection, Spinning Side Kick, is a hard-knuckled look at the other half. These lively poems mix a girl-about-town cockiness with an all-too-rare emotional honesty about men, love, and relationships. Whether the subject is a one-man chimney demolition, the lifelong fidelity of seahorses, a lover at war in Afghanistan or a kickboxing match, Lahey confronts the enduring disconnect between the sexes in a language that is slangy and quick, punctuated with jabs. She eyes those moments-in a day, in a life-when the normal clues we rely on disappear, shifting the line between domesticity and danger. In Spinning Side Kick, a talented poet returns with sharper aim.

Life Energy Process-Stephano Sabetti 2001-01-01 In uniting the Western tradition of psychotherapy with various Eastern methods of healing, Dr. Stephano Sabetti developed a revolutionary process of inquiry called Life Energy Process, based on the concept of life energy as a fundamental force in the universe. In Life Energy Process, Dr. Sabetti presents 12 forms of LEP that he developed to apply specifically to the interpretation of energetic processes as they move through us and express themselves in therapy, music, dance, organizations, art, etc. Each form adds to the general understanding of energy dynamics and benefits from the cross-fertilization with other forms. Dr. Sabetti begins with its history and indicates how the general concepts and principles of LEP are used specifically for this variation. He then discusses the concepts that make the form unique, and he finishes by explaining how he arrives at a diagnosis of the individual or organization in relation to it. This energy-based system in a dynamic, multi-leveled approach to change and lifestyle. Because it views the universality of energy as fundamental to the essence of life, LEP can be applied to comprehend the way all elements of any system interact and influence each other.

Bearing False Witness-Rodney Stark 2016-04-26 As we all know and as many of our well established textbooks have argued for decades, the Inquisition was one of the most frightening and bloody chapters in Western history, Pope Pius XII was anti-Semitic and rightfully called "Hitler's Pope," the Dark Ages were a stunting of the progress of knowledge to be redeemed only by the secular spirit of the Enlightenment, and the religious Crusades were an early example of the rapacious Western thirst for riches and power. But what if these long held beliefs were all wrong? In this stunning, powerful, and ultimately persuasive book, Rodney Stark, one of the most highly regarded sociologists of religion and bestselling author of The Rise of Christianity (HarperSanFrancisco 1997) argues that some of our most firmly held ideas about history, ideas that paint the Catholic Church in the least positive light are, in fact, fiction. Why have we held these wrongheaded ideas so strongly and for so long? And if our beliefs are wrong, what, in fact, is the truth? In each chapter, Stark takes on a well-established anti-Catholic myth, gives a fascinating history of how each myth became the conventional wisdom, and presents a startling picture of the real truth. For example, Instead of the Spanish Inquisition being an anomaly of torture and murder of innocent people persecuted for "imaginary" crimes such as witchcraft and blasphemy, Stark argues that not only did the Spanish Inquisition spill very little blood, but it was a major force in support of moderation and justice. Instead of Pope Pius XII being apathetic or even helpful to the Nazi movement, such as to merit the title, "Hitler's Pope," Stark shows that the campaign to link Pope Pius XII to Hitler was initiated by the Soviet Union, presumably in hopes of neutralizing the Vatican in post-World War II affairs. Pope Pius XII was widely praised for his vigorous and

devoted efforts to saving Jewish lives during the war. Instead of the Dark Ages being understood as a millennium of ignorance and backwardness inspired by the Catholic Church's power, Stark argues that the whole notion of the "Dark Ages" was an act of pride perpetuated by anti-religious intellectuals who were determined to claim that theirs was the era of "Enlightenment." In the end, readers will not only have a more accurate history of the Catholic Church, they will come to understand why it became unfairly maligned for so long. Bearing False Witness is a compelling and sobering account of how egotism and ideology often work together to give us a false truth.

Postcommunist Welfare States-Linda J. Cook 2013-07-02 In the early 1990s, the countries of the former Soviet Bloc faced an urgent need to reform the systems by which they delivered broad, basic social welfare to their citizens. Inherited systems were inefficient and financially unsustainable. Linda J. Cook here explores the politics and policy of social welfare from 1990 to 2004 in the Russian Federation, Poland, Hungary, Belarus, and Kazakhstan. Most of these countries, she shows, tried to institute reforms based on a liberal paradigm of reduced entitlements and subsidies, means-testing, and privatization. But these proposals provoked opposition from pro-welfare interests, and the politics of negotiating change varied substantially from one political arena to another. In Russia, for example, liberalizing reform was blocked for a decade. Only as Vladimir Putin rose to power did the country change its inherited welfare system. Cook finds that the impact of economic pressures on welfare was strongly mediated by domestic political factors, including the level of democratization and balance of pro- and anti-reform political forces. Postcommunist welfare politics throughout Russia and Eastern Europe, she shows, are marked by the large role played by bureaucratic welfare stakeholders who were left over from the communist period and, in weak states, by the development of informal processes in social sectors.
