Libraries: A Design Manual-Nolan Lushington 2016-04-25 Libraries as a building type have been subjected to substantial changes in particular in the past ten years. Milestones such as Rem Koolhaas' Seattle Central Library from 2004 reinvented the typology completely and reflected a development from elitist temple of learning to a public living room. Hybrids between library and department store or theater were conceived. Today, the ubiquity of electronic devices and media needs to be taken into account by the designer: every new library has areas without any books now. This work of reference explains systematically all technological and planning requirements of library design. Special features such as RFID, signage, acoustics or specific structural load issues are explained in texts by experts from the fields of architecture and library science. Finally, approximately 40 best-practice case studies of contemporary library design are documented extensively. They are organized in four categories - national libraries, large public libraries, small public libraries, university libraries - and comprise high-profile examples such as Jo Coenen's Openbare Bibliotheek Amsterdam, Alvaro Siza's Public Library Viana do Castelo in Portugal or Mecanoo's Library of Birmingham from 2013.

The City of Yes-Peter Oliva 2001 Alive with history, myth, and wonder, The City of Yes is a luminous novel of parallel journeys through old and present-day Japan. In Saitama to teach English, the narrator is confronted by unlikely visions of home as he gradually enters the world of contemporary Japan, with its floating stories, enigmas, and contradictions. His own story is deftly interwoven with that of a real-life nineteenth-century Canadian adventurer, whose strange confinement in a Japanese prison, beginning in 1848, is so vividly imagined by the narrator. Full of delightful tales and eccentric characters, and written with the delicacy of a brushstroke artist, The City of Yes is suffused with warm humour, and with the intelligence and curiosity of a keen observer of life's riches and eccentricities.

Environmental Nanotechnology Volume 4-Nandita Dasgupta 2020-01-01 This book presents comprehensive reviews on the latest developments of nanotechnologies to detect and remove pollutants in water, air and food. Polymer nanocomposites, nanoparticles from microbes and application of nanotechnologies for desalination and agriculture are also addressed. Pollution of water and air by contaminants and diseases is a major health issue leading globally to millions of deaths yearly, according to the World Health Organization, and such an issue requires advanced methods to clean environmental media.

Certification - Trust, Accountability, Liability-Peter Rott 2019-03-12 This book offers an in-depth analysis of the function of certification in general and of certification systems in a range of different sectors. The authors examine certification from both a theoretical and a practical standpoint and from the perspectives of different disciplines, including law, economics, management, and the social sciences. They also discuss instruments that help ensure the quality of certification, which can range from public law measures such as accreditation, to private law incentives, to deterrents, such as liability towards victims. Further, they assess the role of competition between certification bodies. Readers will learn the commonalities as well as the necessary distinctions between certification bodies in various fields, which may stem from the different functions they serve. These similarities and differences may also be the result of different types of damage that the certified producer or service provider could potentially cause to individuals or to the public at large. Often, companies use certification bodies as an argument to assure the general public, e.g. regarding the safety of medical products. Closer inspection reveals, however, that sometimes certification bodies themselves lack credibility. The book offers essential information on the benefits and pitfalls associated with certification.
