Critical Perspectives on Veganism-Jodey Castricano 2016-09-13 This book examines the ethics, politics and aesthetics of veganism in contemporary culture and thought. Traditionally a lifestyle located on the margins of western culture, veganism has now been propelled into the mainstream, and as agribusiness grows animal issues are inextricably linked to environmental impact as well as to existing ethical concerns. This collection connects veganism to a range of topics including gender, sexuality, race, the law and popular culture. It explores how something as basic as one's food choices continue to impact on the cultural, political, and philosophical discourse of the modern day, and asks whether the normalization of veganism strengthens or detracts from the radical impetus of its politics. With a Foreword by Melanie Joy and Jens Tuidor, this book analyzes the mounting prevalence of veganism as it appears in different cultural shifts and asks how veganism might be rethought and re-practised in the twenty-first century.

Aroma-Constance Classen 2002-11-01 Smell is a social phenomenon, given particular meanings and values by different cultures. Odours form the building blocks of cosmologies, class hierarchies, and political odours. They can enforce social structures or transgress them, unite people or divide them, empower or disempower. The authors argue that the sociology of smell is repressed in the modern West, and its social history ignored. This book breaks the "olfactory silence" of modernity. It offers the first comprehensive exploration of the cultural role of odours in Western history - from antiquity to the present. It also covers a wide variety of non-Western societies. Its topics range from the medieval concept of the "odour of sanctity", to the aromatherapies of South America, and from olfactory stereotypes of gender and ethnicity in the modern West to the role of smell in postmodernity. Its subject matter will fascinate anyone who likes to nose around in the inner workings of culture.

African Yearbook of International Law / Annuaire Africain de Droit International, Volume 12 (2004)-A. A. Yusuf 2005-11-01 Founded in 1993, the African Yearbook, now published under the auspices of the African Foundation for International Law, is the only scholarly publication devoted exclusively to the study, development, dissemination and wider appreciation of international law in Africa as a whole. Through the scholarly analysis of international legal issues of particular relevance to the African continent, it also contributes to the acceptance of, and respect for the rule of law in intra-African relations, and for the principles of international law in general. Its uniqueness however goes beyond this, for through its special themes and general articles, it has succeeded over the years to serve as an intellectual forum where the development of international law is viewed as being integral to Africa's own development. Through the study and analysis of emerging legal issues of particular relevance to Africa, such as the creation of viable continental institutions capable of promoting unity and security for the peoples of the continent, the effective protection of human rights, the need for accountability for mass killings and massive violations of the rule of law, the promotion of a rule-based democratic culture, the role of African countries in a globalizing world economy and in international trade relations, the Yearbook strives to be responsive to the intellectual needs of African countries in the area of international law, and to the continuing struggle for creating an environment conducive to the rule of law throughout the continent. The Yearbook also provides ready access to the basic documents of African international organizations by regularly publishing the resolutions and decisions of regional and sub-regional organizations as well as the conventions, protocols and declarations adopted by pan-african agencies.

The Making of an Enterprise-Dauril Alden 1996 Based on more than two decades of research conducted on five continents, this monumental work focuses on the activities of members of the Society of Jesus from its foundation to the eve of its expulsion from the Portuguese world. A second volume will examine the Order's expulsion, the fate of its members, and the disposition of its assets in Portugal and her empire from 1750 to 1808. The present volume begins with the Society's introduction to Portugal and traces its expansion throughout what the Society defined as the Portuguese Assistancy, a vast complex of administrative units that included the kingdom of Portugal and her empire plus portions of the Indian subcontinent, Japan, China, the Indonesian archipelago, and Ethiopia. Though it fully describes the evangelical and educational activities of the Jesuits, the book emphasizes their political relations with Portuguese and indigenous leaders, the founding of their major training facilities, the development of their economic infrastructure, their activities as governmental administrators for the Portuguese in India and China, and their role in Portugal's unsuccessful attempts to preserve her eastern empire and to revive Brazil after the Dutch occupation (1630-1654). Throughout, the author makes insightful comparisons between the Jesuits and their peers in various parts of the Portuguese Assistancy and between the Jesuits and their monastic predecessors in various parts of Europe, notably France and England.

The Haitian Trilogy-Derek Walcott 2014-09-09 Plays by the Nobel-laureate, brought together for the first time In the history plays that comprise The Haitian Trilogy--Henri Christophe, Drums and Colours and The Haytian Earth--Derek Walcott, recipient of the Nobel Prize in Literature, uses verse to tell the story of his native West Indies as a four-hundred-year cycle of war, conquest and rebellion. In Henri Christophe and The Haytian Earth, Walcott re-casts the legacy of Haiti's violent revolutionaries--led by Toussaint L'Ouverture, Jean Jacques Dessalines and Henri Christophe--whose rebellion established the first black state in the Americas, but whose cruelty becomes a parable of racial pride and corruption. Drums and Colours, commissioned in 1958 to celebrate the first parliament in Trinidad, is a grand pageant linking the lives of complex, ambiguous heroes: Columbus and Raleigh; Toussaint; and George William Gordon, a martyr of the constitutional era. From Henri Christophe's high style to the bracing vernacular of The Haytian Earth, to the epic scale and scope of Drums and Colours, in these plays Walcott, one of our most celebrated poets, carved a place in the modern theater for the history of the West Indies, and a sounding room for his own maturing voice.

Alexander of Aphrodisias: Quaestiones 2.16-3.15-R.W. Sharples 2014-04-10 This volume completes the translation in this series of Quaestiones attributed to Alexander of Aphrodisias, the leading ancient commentator on Aristotle. The Quaestiones are concerned with physics and metaphysics, psychology and divine providence. They exemplify the process whereby Aristotle's thought came to be organised into 'Aristotelianism' and show how interpretations were influenced by doctrines of Hellenistic philosophy. Some, translated into Arabic and thence into Latin, played a part in the transmission of ancient Greek philosophy to the medieval world. Those interested in Aristotle's psychological views will find this half of Quaestiones particularly valuable. Ten of the problems discussed explicitly involve issues raised in On the Soul, including the unity of apperception and the transition from first to second actuality in the act of contemplation. A further dozen concern problems in physical theory, including infinity, necessity and potentiality. Quaestio 2.21 concerns divine providence and helps supplement our knowledge of Alexander's position based on surviving Arabic fragments of his On Providence.

The Key Of The Mysteries-Eliphas Levi 2014-05-26 This volume represents the high-water mark of the thought of Eliphas Levi. It may be regarded as written by him as his Thesis for the Grade of Exempt Adept, just as his "Ritual and Dogma" was his Thesis for the grade of a Major Adept. He is, in fact, no longer talking of things as if their sense was fixed and universal. He is beginning to see something of the contradiction inherent in the nature of things, or at any rate, he constantly illustrates the fact that the planes are to be kept separate for practical purposes, although in the final analysis they turn out to be one. This, and the extraordinarily subtle and delicate irony of which Eliphas Levi is one of the greatest masters that has ever lived, have baffled the pedantry and stupidity of such commentators as Waite.

The Sociology of the State-Bertrand Badie 1983-05-15 Too often we think of the modern political state as a universal institution, the inevitable product of History rather than a specific creation of a very particular history. Bertrand Badie and Pierre Birnbaum here persuasively argue that the origin of the state is a social fact, arising out of the peculiar sociohistorical context of Western Europe. Drawing on historical materials and bringing sociological insights to bear on a field long abandoned to jurists and political scientists, the authors lay the foundations for a strikingly original theory of the birth and subsequent diffusion of the state. The book opens with a review of the principal evolutionary theories concerning the origin of the institution proposed by such thinkers as Marx, Durkheim, and Weber. Rejecting these views, the authors set forward and defend their thesis that the state was an "invention" rather than a necessary consequence of any other process. Once invented, the state was disseminated outside its Western European birthplace either through imposition or imitation. The study concludes with concrete analyses of the differences in actual state institutions in France, Prussia, Great Britain, the United States, and Switzerland.

The Abbé Tigrane-Ferdinand Fabre 1988 Ferdinand Fabre was at one time regarded as the founder of the French

regional novel yet his best book, The Abbe Tigrane, was never available in English until this translation appeared. A dramatic and shadowy novel, full of Name of the Rose-like intrigue, Fabre's extraordinary novel describes bitter Episcopal rivalries in 19th century France.

The Foul and the Fragrant-Alain Corbin 1986 At once encyclopedic and impressionistic, The Foul and the Fragrant is a masterful exposition of odors and the perception of odors from 1750 to the 'Pasteurian revolution' of the late nineteenth century. It is an important and, at times, fascinating voyage... Exploring with imagination and audacity the changing role of smell in the anxieties and antagonisms of the modern world, Corbin reminds us that social history, too long sanitized and too often abstract, must make room for the senses.

The Bishop of Rome-Jean-Marie-Roger Tillard 1983

Social Movement Dynamics-Federico M. Rossi 2016-03-03 This book presents an overview of new approaches to the study of social movements emerging out of Latin America, based on original and innovative analyses of the recent changes in collective action across the region. Over the past decade, new repertoires of contention have emerged in parallel to changes in the configuration of actors, in previously established patterns of relationship between social movements and political institutions, and in the shapes of collaborative networks, both domestic and transnational. The authors analyze a broad set of countries and social movements, while focusing on three key theoretical debates: the interactions between routine and contentious politics, the relationship between protest and context, and the organizational configurations of social movements. The research agenda put forward by this book is neither defined nor restricted by geographical boundaries, even though the chapters are based on field research undertaken in Latin America. In doing so, this volume contributes to a still underdeveloped dialogue in theory-building in social movement studies, among scholars from the South and from the North, as well as among scholars specialized in different regions.

Homo Hierarchicus-Louis Dumont 1980 The French anthropologist rejects the ethnocentric concepts underlying Western sociology to provide a new analysis of the roots, function, and social organization of India's caste system Citizens without Sovereignty-Daniel Gordon 2017-03-14 In a wide-ranging interpretation of French thought in the years 1670-1789, Daniel Gordon takes us through the literature of manners and moral philosophy, theology and political theory, universal history and economics to show how French thinkers sustained a sense of liberty and dignity within an authoritarian regime. A penetrating critique of those who exaggerate either the radicalism of the Enlightenment or the hegemony of the absolutist state, his book documents the invention of an ethos that was neither democratic nor absolutist, an ethos that idealized communication and private life. The key to this ethos was "sociability," and Gordon offers the first detailed study of the language and ideas that gave this concept its meaning in the Old Regime. Citizens without Sovereignty provides a wealth of information about the origins and usage of key words, such as société and sociabilité, in French thought. From semantic fields of meaning, Gordon goes on to consider institutional fields of action. Focusing on the ubiquitous idea of "society" as a depoliticized sphere of equality, virtue, and aesthetic cultivation, he marks out the philosophical space that lies between the idea of democracy and the idea of the royal police state. Within this space, Gordon reveals the channels of creative action that are open to citizens without sovereignty--citizens who have no right to self-government. His work is thus a contribution to general historical sociology as well as French intellectual history. Originally published in 1994. On Theoretical Sociology-Robert K. Merton 1967-10

Figurative Language and Thought-Albert N. Katz 1998-09-10 Our understanding of the nature and processing of figurative language is central to several important issues in cognitive science, including the relationship of language and thought, how we process language, and how we comprehend abstract meaning. Over the past fifteen years, traditional approaches to these issues have been challenged by experimental psychologists, linguists, and other cognitive scientists interested in the structures of the mind and the processes that operate on them. In Figurative Language and Thought, internationally recognized experts in the field of figurative language, Albert Katz, Mark Turner, Raymond W. Gibbs Jr., and Cristina Cacciari, provide a coherent and focused debate on the subject. The book's authors discuss a variety of fundamental questions, including: What can figures of speech tell us about the structure of the conceptual system? If and how should we distinguish the literal from the nonliteral in our theories of language and thought? Are we primarily figurative thinkers and consequently figurative language users or the other way around? Why do we prefer to speak metaphorically in everyday conversation, when literal options may be available for use? Is metaphor the only vehicle through which we can understand abstract concepts? What role do cultural and social factors play in our comprehension of figurative language? These and related questions are raised and argued in an integrative look at the role of nonliteral language in cognition. This volume, a part of Counterpoints series, will be thought-provoking reading for a wide range of cognitive psychologists, linguists, and philosophers.

A History of Slavery and Serfdom-John Kells Ingram 1895

The Mind Club-Daniel M. Wegner 2016-03-22 "Compelling, and so beautifully written... 'The Mind Club' deftly brings the most up-to-date research about other minds to readers of all backgrounds. It may cause you to think differently about crime and punishment, about business transactions and health care, and even about the upcoming elections. Things might just start looking up."--The Wall Street Journal From dogs to gods, the science of understanding mysterious minds—including your own. Nothing seems more real than the minds of other people. When you consider what your boss is thinking or whether your spouse is happy, you are admitting them into the "mind club." It's easy to assume other humans can think and feel, but what about a cow, a computer, a corporation? What kinds of mind do they have? Daniel M. Wegner and Kurt Gray are award-winning psychologists who have discovered that minds—while incredibly important—are a matter of perception. Their research opens a trove of new findings, with insights into human behavior that are fascinating, frightening and funny. The Mind Club explains why we love some animals and eat others, why people debate the existence of God so intensely, how good people can be so cruel, and why robots make such poor lovers. By investigating the mind perception of extraordinary targets—animals, machines, comatose people, god—Wegner and Gray explain what it means to have a mind, and why it matters so much. Fusing cutting-edge research and personal anecdotes, The Mind Club explores the moral dimensions of mind perception with wit and compassion, revealing the surprisingly simple basis for what compels us to love and hate, to harm and to protect. From the Hardcover edition.

The Moral Complexities of Eating Meat-Ben Bramble 2015-09-30 This volume collects twelve new essays by leading moral philosophers on a vitally important topic: the ethics of eating meat. Some of the key questions examined include: Are animals harmed or benefited by our practice of raising and killing them for food? Do the realities of the marketplace entail that we have no power as individuals to improve the lives of any animals by becoming vegetarian, and if so, have we any reason to stop eating meat? Suppose it is morally wrong to eat meat--should we be blamed for doing so? If we should be vegetarians, what sort should we be?

Sourcebook of Paleolithic Transitions-Marta Camps 2009-09-01 As the study of Palaeolithic technologies moves towards a more analytical approach, it is necessary to determine a consistent procedural framework. The contributions to this timely and comprehensive volume do just that. This volume incorporates a broad chronological and geographical range of Palaeolithic material from the Lower to Upper Palaeolithic. The focus of this volume is to provide an analysis of Palaeolithic technologies from a quantitative, empirical perspective. As new techniques, particularly quantitative methods, for analyzing Palaeolithic technologies gain popularity, this work provides case studies particularly showcasing these new techniques. Employing diverse case studies, and utilizing multivariate approaches, morphometrics, model-based approaches, phylogenetics, cultural transmission studies, and experimentation, this volume provides insights from international contributors at the forefront of

recent methodological advances.

The View from the Ground-Martha Gellhorn 2014-12-09 An anthology spanning six decades of on-the-scene journalism from "one of the most eloquent witnesses of the twentieth century" (Bill Buford, Granta). For nearly sixty years, Martha Gellhorn traveled the globe to report on the tumult and extremity of life in the twentieth century. The View from the Ground, as Gellhorn explains, "is a selection of articles written during six decades; peace-time reporting. That is to say, the countries in the background were at peace at the moment of writing; not that there was peace on earth." Included here are accounts of America during the Depression, Israel and Palestine in the 1950s, post-Franco Spain, protests at the White House, domestic life in Africa, and Gellhorn's return to Cuba after a forty-one-year absence—among many other topics. Informed by the horrors of fascism in Spain and Germany, the modern terror in Central America, and by the courage of those who stand up to the thugs both in an out of government, The View from the Ground is a singular act of testimony that, like its companion volume, The Face of War, is "an eloquent, unforgettable history of a chaotic century" (San Francisco Chronicle).

Glamorous Sorcery-David Rollo 2000 "David Rollo considers a series of texts produced in England and the

Angevin Empire to reassess the value and nature of literacy in the High Middle Ages. He does this by scrutinizing metaphors that represent writing as a form of sorcery or magic in Latin texts and in the work of the Old French

writer Benoit de Sainte-Maure. Rollo then examines the ambiguous representation of literacy as a skill that can be

exploited as a commodity."

Wine and Conversation-Adrienne Lehrer 2009-04-09 The world of wine vocabulary is growing alongside the

current popularity of wine itself. The question is, what do these words mean? Can they actually reflect the

objective characteristics of wine, and can two drinkers really use and understand these words in the same way?

The Vegetarian Crusade-Adam D. Shprintzen 2013-10-07 Vegetarianism has been practiced in the United States

since the country's founding, yet the early years of the movement have been woefully misunderstood and understudied. Through the Civil War, the vegetarian movement focused on social and political reform, but by the late nineteenth century, the movement became a path for personal strength and success in a newly individualistic, consumption-driven economy. This development led to greater expansion and acceptance of vegetarianism in mainstream society. So argues Adam D. Shprintzen in his lively history of early American vegetarianism and social reform. From Bible Christians to Grahamites, the American Vegetarian Society to the Battle Creek Sanitarium, Shprintzen explores the diverse proponents of reform-motivated vegetarianism and explains how each of these groups used diet as a response to changing social and political conditions. By examining the advocates of vegetarianism, including institutions, organizations, activists, and publications, Shprintzen explores how an idea grew into a nationwide community united not only by diet but also by broader goals of social reform.

A Pack of Lies-J. A. Barnes 1994-06-09 Defining lies as statements that are intended to deceive, this book considers the contexts in which people tell lies, how they are detected and sometimes exposed, and the consequences for the liars themselves, their dupes, and the wider society. The author provides examples from a number of cultures with distinctive religious and ethical traditions, and delineates domains where lying is the norm, domains that are ambiguous and the one domain (science) that requires truth-telling. He refers to experimental studies on children that show how, at an early age, they acquire the capacity to lie and learn when it is appropriate to do so. He reviews how lying has been evaluated by moralists, examines why we do not regard novels as lies and relates the human capacity to lie to deceit among other animal species. He concludes that although there are, in all societies, good pragmatic reasons for not lying all the time, there are also strong reasons for lying some of the time.

Dignity for Africa-Mobutu Sese Seko 1989

America's Tyrant-Sean Kelly 1993 Details the 30-year relationship between the US and Mobutu.
