A Manual of the Detection of Poisons by Medico-chemical Analysis-Friedrich Julius Otto 1857 Dissertation Abstracts International- 2006 Dictionnaire Des Sciences Philosophiques-Adolphe Franck 1844 Dictionnaire des sciences philosophiques, par une société de professeurs de philosophie [ed. by A. Franck].-Dictionnaire 1844 Masters Theses in the Pure and Applied Sciences-W. H. Shafer 2012-12-06 Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) \* at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 25 (thesis year 1980) a total of 10,308 theses titles from 27 Canadian and 214 United States universities. We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work. While Volume 25 reports theses submitted in 1980, on occasion, certain universities do report theses submitted in previous years but not reported at the time. Analyses et dissertations sur les livres de l'ancien testament-Henri François de Vence 1742 A practical treatise on coal, petroleum, and other distilled oils-Abraham GESNER 1861 La dissertation de culture générale à l'examen d'entrée à Sciences Po-Aïda N'Diaye 2012-04-04 La dissertation à l'examen d'entrée à Sciences Po dérouta les candidats aux concours. Car l'exercice est bien différent des pratiques du lycée et mobilise des savoirs empruntés à toutes les disciplines (philosophie, lettres, histoire...). D'où l'intérêt du présent ouvrage qui s'organise autour de trois parties : • une méthode originale et précise, présentée en dix étapes et illustrée d'exemples, • des dissertations rédigées, notamment sur le libéralisme et la guerre, • toutes les annales pour s'exercer, une bibliographie pour compléter ses connaissances. Enfin, rien n'est laissé au hasard : des astuces sont présentées pour prendre en compte la spécificité de chacun des 9 IEP.
