Editor Bennett Cerf planned to publish this "exceptionally fine" novel but when John Steinbeck's *The Grapes of Wrath* swept the nation, Cerf explained that the market could not support two books on the subject.

Something Rising-Haven Kimmel 2010-05-11 In her first two books, Haven Kimmel claimed her spot on the literary scene- surprising readers with her memoir, A Girl Named Zippy, and winning an outpouring of critical acclaim for her first novel, The Solace of Leaving Early. Now, in her second novel, she brings to the page a heroine's tireless quest for truth, love, justice, and the perfect game of 9-ball. Cassie Claiborne's world is riddled with problems beyond her control: her hard- living, pool-shooting father has another wife; her stoic, long-suffering mother is incapable of moving herself mentally away from the kitchen window; her sister Belle is a tempest of fragility and brilliance; her closest friends, Puck and Emmy, are adolescent harbingers of their own doomed futures. Frustrated by her inability to care deeply enough for so many troubled souls, Cassie finds in the local pool hall an oasis of green felt where she can master objects and restrain her emotions. As Cassie grows from a quietly complex girl into a headstrong young woman, she takes on the

thankless role of family provider by working odd jobs and hustling pool. All the while, she keeps her eye on the ultimate prize: wringing suitable justice out of past wrongs and freeing herself from the inertia that is her life. In this ultimately uplifting story, Haven Kimmel reaches deep into the hamstrung souls of her fictional corner of Indiana. Remarkable for its tough tenderness, *Something Rising* (Light and Swift) is an astonishing work of pure heartbreak.

On Writing Fiction-David Jauss 2011-06-02 The pieces of a satisfying novel or story seem to fit together so effortlessly, so seamlessly, that it's easy to find yourself wondering, "How on earth did the author do this?" The answer is simple: He sat alone at his desk, considered an array of options, and made smart, careful choices. In On Writing Fiction, award-winning author and respected creative writing professor David Jauss offers practical information and advice that will help you make smart creative and technical decisions about such topics as:

- Writing prose with syntax and rhythm to create a "soundtrack" for the narrative
- Choosing the right point of view to create the appropriate degree of "distance" between your characters and the reader
- Harnessing the power of contradiction in the creative process

In one thought-provoking

essay after another, Jauss sorts through unique fiction-writing conundrums, including how to create those exquisite intersections between truth and fabrication that make all great works of fiction so much more resonant than fiction that follows the "write what you know" approach that's so often used.

Psychos-John Skipp 2012-09-25 This collection of thirty-eight terrifying tales of serial killers at large, written by the great masters of the genre, plumbs the horrifying depths of a deranged mind and the forces of evil that compel a human being to murder, gruesomely and methodically, over and over again. From Hannibal Lecter (The Silence of the Lambs) to Patrick Bateman (American Psycho), stories of serial killers and psychos loom large and menacing in our collective psyche. Tales of their grisly conquests have kept us cowering under the covers, but still turning the pages. Psychos is the first book to collect in a single volume the scariest and most well-crafted fictional works about these deranged killers. Some of the stories are classics, the best that the genre has to offer, by renowned writers

such as Neil Gaiman, Amelia Beamer, Robert Bloch, and Thomas Harris. Other selections are from the latest and most promising crop of new authors. John Skipp, who is also the editor of *Zombies, Demons and Werewolves and Shapeshifters*, provides fascinating insight, through two nonfiction essays, into our insatiable obsession with serial killers and how these madmen are portrayed in popular culture. Resources at the end of the book includes lists of the genre's best long-form fiction, movies, websites, and writers.

Pr!-Stuart Ewen 1998-10-23 The early years of the twentieth century were a difficult period for Big Business. Corporate monopolies, the brutal

exploitation of labor, and unscrupulous business practices were the target of blistering attacks from a muckraking press and an increasingly resentful public. Corporate giants were no longer able to operate free from the scrutiny of the masses. "The crowd is now in the saddle," warned Ivy Lee, one of America's first corporate public relations men. "The people now rule. We have substituted for the divine right of kings, the divine right of the multitude." Unless corporations developed means for counteracting public disapproval, he cautioned, their future would be in peril. Lee's words heralded the dawn of an era in which corporate image management was to become a paramount feature of American society. Some corporations, such as AT&T, responded inventively to the emergency. Others, like Standard Oil of New Jersey (known today as Exxon), continued to fumble the PR ball for decades. The Age of Public Relations had begun. In this long-awaited, pathbreaking book, Stuart Ewen tells the story of the Age unfolding: the social conditions that brought it about; the ideas that inspired the strategies of public

relations specialists; the growing use of images as tools of persuasion; and, finally, the ways that the rise of public relations interacted with the changing dynamics of public life itself. He takes us on a vivid journey into the thinking of PR practitioners—from Edward Bernays to George Gallup—exploring some of the most significant campaigns to mold the public mind, and revealing disturbing trends that have persisted to the present day. Using previously confidential sources, and with the aid of dozens of illustrations from the past hundred years, Ewen sheds unsparing light on the contours and contradictions of American democracy on the threshold of a new millennium.

Understanding Risk-Matthias Beck 2013-01-01
The book is divided into three sections. The first section examines issues in relation to corporate governance in the private sector, with emphasis being placed on issues such as Board Decision-Making; Earnings Management and Audit Committee Effectiveness; and Corporate Governance Failures. These contributions are complemented by the second section, which

looks at governance and risk issues affecting the public sector, with a focus being placed on Public-Private Sector Partnering and the impact of regulatory reform on the life sciences. Section three focuses on societal risk management in relation to health safety and the environment. In this context, contributions are presented in relation to major debates surrounding the 'Rising Trends in Cancer Cases' throughout the world; the dilemmas surrounding 'Medical Self Help; 'Mental Health Policy;' and the use of 'Information Technology in Health Care.' I hope readers will find this edited volume useful and stimulating.

Eye Gaze in Intelligent User Interfaces-Yukiko I. Nakano 2013-01-04 Remarkable progress in eye-tracking technologies opened the way to design novel attention-based intelligent user interfaces, and highlighted the importance of better understanding of eye-gaze in human-computer interaction and human-human communication. For instance, a user's focus of attention is useful in interpreting the user's intentions, their understanding of the conversation, and their

attitude towards the conversation. In human face-to-face communication, eye gaze plays an important role in floor management, grounding, and engagement in conversation. Eye Gaze in Intelligent User Interfaces draws on ideas from a number of contributors working on how attentional information can be applied to novel intelligent interfaces. Part I focuses on analyzing human eye gaze behaviors to reveal characteristics of human communication and cognition; Part II addresses estimation and prediction of the cognitive state of the users using gaze information; and Part III presents proposals of novel gaze-aware interfaces which integrate eye-trackers as a system component. The contributions highlight a direction for the future of human-computer interaction, and discuss issues in human attentional behaviors and face-to-face communication which are essential in designing gaze aware interactive interfaces.

Pragmatism and the Reflective Life-Stuart Rosenbaum 2009-07-16 Pragmatism and the Reflective Life explains the moral perspective

embedded in the American pragmatist tradition and offers pragmatist moral thought as an alternative to analytic moral theory. Following the lead of John Dewey, Rosenbaum explores what it means to make the ideal of the reflective life implicit in pragmatism central to an understanding of morality. The discussion illuminates how this ideal of the reflective life captures the value of both individual autonomy and communal ideals and encourages commitment to a radically idealistic and ecumenical hope in the power of inclusive democracy and global egalitarianism.

A Force Profonde-Edward A. Kolodziej 2003-07-14 Presenting detailed portraits by leading authorities of the politics of human rights across the major regions of the globe, A Force Profonde: The Power, Politics, and Promise of Human Rights reveals human rights to be a force as powerful as capitalist markets and technological innovation in shaping global governance. Human rights issues mobilize populations regardless of their national, ethnic,

cultural, or religious differences. Yet progress in advancing human rights globally, as Edward A. Kolodziej and the other contributors to the volume contend, depends decisively on the local support and the efforts of the diverse and divided peoples of the world--a prerequisite that remains problematic in many parts of the globe. A Force Profonde explores conceptions of human rights from Western as well as other major world traditions in an attempt to dispel the notion that tyranny, culture, and religion are the only challenges to human rights. Focusing on regional patterns of conflict, the authors point out that violations often have to do with disputes over class, social status, economic privilege, and personal power. In addition, they contend that conflicts over identity are more prevalent in the West than commonly thought. Sharply conflicting views are to be found between the European Union and the United States over issues like the death penalty. Splits within the West between rival Christian sects and between religious adherents and partisans of secularization are no less profound than those in other regions.

A Panorama of Modern Operator Theory and Related Topics-Harry Dym 2012-02-01 This book is dedicated to the memory of Israel Gohberg (1928-2009) - one of the great mathematicians of our time - who inspired innumerable fellow mathematicians and directed many students. The volume reflects the wide spectrum of Gohberg's mathematical interests. It consists of more than 25 invited and peer-reviewed original research papers written by his former students, co-authors and friends. Included are contributions to single and multivariable operator theory, commutative and non-commutative Banach algebra theory, the theory of matrix polynomials and analytic vector-valued functions, several variable complex function theory, and the theory of structured matrices and operators. Also treated are canonical differential systems, interpolation, completion and extension problems, numerical linear algebra and mathematical systems theory. Mechanisms of Plant Defense Responses-B. Fritig 2012-12-06 Research on the mechanisms of plant defense responses to stress and pathogen attack has attracted much attention in recent years.

This increasing interest stems from the fact that the tools of molecular biology now enable us to study the molecular basis of old biological concepts such as host-pathogen recognition (and particularly the gene for-gene relationship), hypersensitive cell death and systemic acquired resistance. Our knowledge about avirulence and resistance genes, elicitors, signal transduction and genes involved in plant defense is rapidly expanding. Moreover we are just beginning to test in planta the potential of these results for biotechnological applications, aimed at improving plant resistance to diseases. The 2nd Conference of the European Foundation for Plant Pathology, hosted by the "Societe Fran~aise de Phytopathologie", was devoted to "Mechanisms of plant defense responses" and was held in Strasbourg, France. It brought together over 350 scientists from universities, research institutes and private sectors of 24 countries. Major

advances in the areas under study have been reviewed in plenary lectures and are developed in the main articles of this book. Over 160 high-quality posters were presented and are summarized in short articles. Data from outstanding posters, which were discussed after a short oral presentation, are found in extended articles. As a whole the book presents a collection of papers arranged in six sections and reflecting the present day state-of-the-art of research in the field of plant defense reactions. Hegel on Action-Arto Laitinen 2010-10-13 This collection of essays focuses on various aspects of Hegel's 'Philosophy of Action' including (but not limited to) issues relating to conceptualization, explanation, intention, agency, narrativity holism, objectivity, practical reasoning, moral responsibility, free will and tragedy.
