Three Centuries of Greek Culture under the Roman Empire. Homo Romanus Graeca Oratione (eBook)-Francesca Mestre 2014-05-15 The underlying theme of Three Centuries of Greek Culture under the Roman Empire is the idea that, under Roman rule, Greek culture was still alive and dynamic and continued to exert a degree of cultural domination, either real or apparent. So, we hope to analyse the meanings of concepts such as "Greek" or "Greece" in the Empire. Are we right to assume that there was a clear opposition between Greek and Roman? Or would it be more accurate to speak of a "Graeco-Roman world"? It would certainly be possible to make a list of "elements of identity", on both sides —Greek and Roman—, but, in this case, where should the borders between identity and community be placed? Three Centuries of Greek Culture under the Roman Empire presents several approaches to the period between the second and fourth centuries AD from a variety of angles, perspectives and disciplines. Until now, this time has usually been considered to be the junction of the decline between the classical world and the emergence of the medieval world; however, this book establishes a basis for considering the Imperial period as a specific stage in cultural, historical and social development with a distinct personality of its own.

Leibniz, Humboldt, and the Origins of Comparativism-Tullio De Mauro 1990 Both Leibniz and Humboldt are scholars in whose work we find a passionate interest in the history and development of languages combined with a strong theoretical commitment. Linking their names to linguistic comparativism draws attention to the contribution these scholars have made to the history of comparativism and also promotes discussion of the relationship of theory and practice in linguistic research in more general terms. In September 1986, a conference on Leibniz, Humboldt and the Origins of Comparativism' was held in Rome. The papers included in this volume are revised versions of the papers presented at the conference.

The Child in the Family-Maria Montessori 1989 Municipal Trade-Leonard Darwin 1903 Paolozzi and Wittgenstein-Diego Mantoan 2019-05-10 This impressive edited collection investigates the relationship between British Pop Art pioneer Eduardo Paolozzi and the philosopher Ludwig Wittgenstein. At this time, when Paolozzi's oeuvre is in the process of being rediscovered, his long-time fascination with Wittgenstein requires thorough exploration, as it discloses a deeper understanding of his artistic production, further helping to reassess the philosopher's actual impact on visual arts and its theory in the second half of the 20th century. With 13 diverse and comprehensive chapters, bringing together philosophers and art historians, this volume aims at retracing and

pondering the influence of Wittgenstein on the idea of art in Paolozzi, thus giving an unprecedented insight into Wittgenstein's philosophy as employed by contemporary artists. Taking Turns with the Earth-Matthias Fritsch 2018-10-02 The environmental crisis, one of the great challenges of our time, tends to disenfranchise those who come after us. Arguing that as temporary inhabitants of the earth, we

cannot be indifferent to future generations, this book draws on the resources of phenomenology and poststructuralism to help us conceive of moral relations in connection with human temporality. Demonstrating that moral and political normativity emerge with generational time, the time of birth and death, this book proposes two related models of intergenerational and environmental justice. The first entails a form of indirect reciprocity, in which we owe future people both because of their needs and interests and because we ourselves have been the beneficiaries of peoples past; the second posits a generational taking of turns that Matthias Fritsch applies to both our institutions and our natural environment, in other words, to the earth as a whole. Offering new readings of key philosophers, and emphasizing the work of Emmanuel Levinas and Jacques Derrida in particular, Taking Turns with the Earth disrupts human-centered notions of terrestrial appropriation and sharing to give us a new continental philosophical account of future-oriented justice.

Evolved Morality: The Biology and Philosophy of Human Conscience-Frans de Waal 2014-02-20 Morality is often defined in opposition to the natural "instincts," or as a tool to keep those instincts in check. New findings in neuroscience, social psychology, animal behavior, and anthropology have brought us back to the original Darwinian position that moral behavior is continuous with the social behavior of animals, and most likely evolved to enhance the cooperativeness of society. In this view, morality is part of human nature rather than its opposite. This interdisciplinary volume debates the origin and working of human morality within the context of science as well as religion and philosophy.

Creativity in Schools-Anna Craft 2005-08-24 Creativity in schools is changing, with greater emphasis being placed on creative skills across the curriculum than ever before. This shift has thrown up some challenging questions which this book tackles head-on in order to better understand the implications of this change and the effects on pedagogy and policy. The questions raised include: What is creative learning? How does it relate to creative teaching? How do we organize the curriculum to nurture creativity? What pedagogical strategies support creativity? How is creative learning different to effective learning? What responsibilities do schools have for stimulating creativity in relation to society, ethics and the

wider environment? Laying out the key concepts in the current debate on creativity and placing them in a broader context based on practice, policy and research, this volume sets the agenda for future discussion and suggests practical ways to encourage pupils' creative development in a new and more thoughtful way.

Creative Collaboration in Teaching-Marcelo Giglio 2016-04-29 Creative Collaboration in Teaching focuses on the question of how best to facilitate creative collaboration among students in the classroom setting—with a focus on music composition and from the perspective of social-cultural psychology. This book is comprehensive, cutting-edge and scholarly in its approach. Marcelo Giglio's attention to music and creativity is detailed enough to satisfy any researcher, educator or teacher educator; but at the same time, his research approach, classroom observations and overriding recommendations can be easily applied to a wide range of subject areas. Giglio combines a rigorous review of the relevant literatures on creativity and social interactions with the reporting and analysis of his own original data across the world, and then goes on to support this important work with detailed descriptions of classroom episodes—student-to-student and teacher-to-student interactions. By combining these three elements, this book offers socio-creative and pedagogical models for education in practice as well as teacher education and research.

Towards New Ways of Terminology Description-Rita Temmerman 2000-01-01 This title questions the validity of traditional terminology theory. The author's findings are that the traditional approach impedes a pragmatic and realistic description of a large number of categories of terms.

Listening-Jean-Luc Nancy 2009-08-25 In this

lyrical meditation on listening, Jean-Luc Nancy examines sound in relation to the human body. How is listening different from hearing? What does listening entail? How does what is heard differ from what is seen? Can philosophy even address listening, *écouter*, as opposed to *entendre*, which means both hearing and understanding? Unlike the visual arts, sound produces effects that persist long after it has stopped. The body, Nancy says, is itself like an echo chamber, responding to music by inner vibrations as well as outer attentiveness. Since "the ear has no eyelid" (Quignard), sound cannot be blocked out or ignored: our whole being is involved in listening, just as it is involved in interpreting what it hears. The mystery of music and of its effects on the listener is subtly examined. Nancy's skill as a philosopher is to bring the reader companionably along with him as he examines these fresh and vital questions; by the end of the book the reader feels as if listening very carefully to a person talking quietly, close to the ear.

Mad Like Artaud-Sylvère Lotringer 2015-11-15 Those who are mad like Antonin Artaud, are they just as mad as he was? Madness, like the plague, is contagious, and everyone, from his psychiatrists to his disciples, family, and critics, everyone who gets close to Artaud, seems to participate in his delirium. Sylvère Lotringer explores various embodiments of this shared delirium through what Artaud called "mental dramas"—a series of confrontations with his witnesses or "persecutors" where we uncover the raw delirium at work, even in Lotringer himself. Mad Like Artaud does not intend to add one more layer of commentary to the bitter controversies that have been surrounding the cursed poet's work since his death in 1948, nor does it take sides among the different camps who are still haggling over his corpse. This book speaks of the site where "madness" itself is simmering.

Tragedy and Civilization-Charles Segal 1999 Drawing on comprehensive analyses of all of Sophocles' plays, on structuralist anthropology, and on other extensive work on myth and tragedy, Charles Segal examines Sophocles both as a great dramatic poet and as a serious thinker. He shows how Sophoclean tragedy reflects the human condition in its constant and tragic struggle for order and civilized life against the ever-present threat of savagery and chaotic violence, both within society and within the individual. Tragedy and Civilization begins with a study of these themes and then proceeds to detailed discussions of each of the seven plays. For this edition Segal also provides a new preface discussing recent developments in the study of Sophocles.

Mirror For the Muslim Prince-Mehrzad Boroujerdi 2013-05-01 In this volume, a group of distinguished scholars reinterpret concepts and canons of Islamic thought in Arab, Persian, South Asian, and Turkish traditions. They demonstrate that there is no unitary "Islamic" position on important issues of statecraft and governance. They recognize that Islam is a discursive site marked by silences, agreements, and animated controversies. Rigorous debates and profound disagreements among Muslim theologians, philosophers, and literati have taken place over such questions as: What is an Islamic state? Was the state ever viewed as an independent political institution in the Islamic tradition of political thought? Is it possible that a religion that places an inordinate emphasis upon the importance of good deeds does not indeed have a vigorous notion of "public interest" or a systematic theory of government? Does Islam provide an edifice, a

common idiom, and an ideological mooring for premodern and modern Muslim rulers alike? The nuanced reading of the Islamic traditions provided in this book will help future generations of Muslims contemplate a more humane style of statecraft.

Sophocles' Tragic World-Charles Segal
2009-06-30 Much has been written about the heroic figures of Sophocles' powerful dramas. Now Charles Segal focuses our attention not on individual heroes and heroines, but on the world that inspired and motivated their actions--a universe of family, city, nature, and the supernatural. He shows how these ancient masterpieces offer insight into the abiding question of tragedy: how one can make sense of a world that involves so much apparently meaningless violence and suffering. In a series of engagingly written interconnected essays, Segal studies five of Sophocles' seven extant plays: Ajax, Oedipus Tyrannus, Philoctetes, Antigone, and the often neglected Trachinian Women. He examines the language and structure of the plays from several interpretive perspectives, drawing both on traditional philological analysis and on current literary and cultural theory. He pays particular attention to the mythic and ritual backgrounds of the plays, noting Sophocles' reinterpretation of the ancient myths. His delineation of the heroes and their tragedies encompasses their relations with city and family, conflicts between men and women, defiance of social institutions, and the interaction of society, nature, and the gods. Segal's analysis sheds new light on Sophocles' plays--among the most widely read works of classical literature--and on their implications for Greek views on the gods, moral life, and sexuality. Abbreviations Notes Index Reviews of this book:
"Sophocles' Tragic World is...a lucidly written work of great theoretical sophistication and learning, offering many new insights into the fundamental meaning of the plays." DD--Victor Bers, Bryn Mawr Classical Review "[Segal] refutes reductionist attempts to derive from a Sophoclean tragedy a unitary moral or message. The dramas, Segal argues, present insoluble dilemmas that require the audience to engage with the situations the characters face, the choices the characters make, and the consequences of those choices...This book will be of interest to anyone who wants a fuller appreciation of Sophocles' dramatic art." DD--Andrew Szegedy-Maszak, New England Classical Journal "Segal's strengths as a critic are sensitivity to detail, breadth of cultural reference, and open-mindedness; these qualities make his writing rich...This is a book which could enhance any reader's understanding of Sophocles." DD--Greece and Rome "A fine collection of nine essays...A richly rewarding collection amply illustrated with specific detailed reference to the texts that one always tries to inculcate in one's pupils: for them, this will be invaluable." DD--Jim Neville, JACT Review "Sophocles' Tragic World is an organized collection of nine essays (plus introduction) on five plays, Ajax, Trachiniae, Philoctetes, Antigone, and--especially--OT, to which four of the chapters are devoted. The introduction and three of the essays (one on Ant., two on OT) are new; the others are revisions of published articles, dating originally from 1976 to 1993. For several decades now, [Segal] has been so articulate about Greek tragedy, and so productive in his articulations, that one has acquired an unusually sharp sense...of the changing shape and direction that his readings have taken over the years." DD--M.S. Silk, Classical Review "Charles Segal has written a superb critical study of five of the seven extant plays by Sophocles...Segal's analytical interests go beyond the usual discussion of the nature of heroic greatness of tragic stature. He is principally concerned with the 'tragic world' which Sophocles depicts...Segal writes in a lucid, jargon-free prose that is also dramaturgy of the highest order...Segal's strength as a critic issues

directly from a wide-ranging sensitivity to the epic tradition and a nuanced awareness of the dramatic use of temporal shifts and poetic displacements. Segal's terrific, lucid book should also be required reading for anyone interested in the tragic stature of women in Greek tragedy. His complex thinking on the subject gives justice to the basic intractability of Sophocles's views on the nature of feminine sensibility." DD--Randy Gener, New York Theatre Wire "This work includes five previously published essays and four new essays. Once more, Segal brings his considerable scholarship to bear on the plays of Sophocles, addressing five of the seven extant tragedies." DD--Choice

Methodologies of Mediation in Professional Learning-Lily Orland-Barak 2017-03-20 This book critically explores the use of nine recognized methodologies for the mediation of professional learning in the context of teacher education: The story, the visual text, the case, the video, the simulation, the portfolio, lesson study, action research, and Information and Communication Technologies (ICT). Drawing on theories of mediation and professional learning, the book establishes connections between theoretical, empirical and practical-based aspects of each of these methodologies. It consolidates a body of knowledge that offers a holistic portrayal of these methodologies in terms of their purposes (what for), processes (how), and outcomes (what), both distinctively and inclusively. Each chapter offers four perspectives on each methodology (1) theoretical groundings of the genre (2) research-based evidence on methodologies-as-pedagogies for mediating teacher learning (3) mediation tasks for teacher education as reported in studies and (4) a synthesis of recurrent themes identified from selected books and articles, including a comprehensive list of publications organized by decades. The last chapter presents an integrative framework that conceptualizes connections and weak links across the different methodologies of mediation.

Auto Da Fé-Elias Canetti 2011-04-30 Auto Da Fé is the story of Peter Kien, a distinguished, reclusive sinologist living in Germany between the wars. With masterly precision, Canetti reveals Kien's character, displaying the flawed personal relationships which ultimately lead to his destruction. Manipulated by his illiterate and grasping housekeeper, Therese, who has tricked him into marriage, and Benedikt Pfaff, a brutish concierge, Kien is forced out of his apartment - which houses his great library and one true passion - and into the underworld of the city. In this purgatory he is guided by a chess-playing dwarf of evil propensities, until he is eventually restored to his home. But on his return he is visited by his brother, an eminent psychiatrist who, by an error of diagnosis, precipitates the final crisis... Auto Da Fé was first published in Germany in 1935 as Die Blendung (The Blinding or Bedazzlement) and later in Britain in 1947, where the publisher noted Canetti as a 'writer of strongly individual genius, which may prove influential', an observation borne out when the author was awarded the Nobel Prize for Literature in 1981. Auto Da Fé still towers as one of the greatest novels of the twentieth century, and Canetti's incisive vision of an insular man battling against the outside world is as fresh and rewarding today as when first it appeared in print.
