Pictures of Girlhood-Sarah Hentges 2015-01-09  
Although the “coming of age” story has been a popular film plot for decades, producers have only recently realized the commercial potential of targeting films to adolescent girls. Movies like Clueless, Legally Blonde and Mean Girls have been successfully marketed to teenage girls, as have several well-known independent films. Important as both cultural indicators and catalysts, these films simultaneously demonstrate pop culture’s influence on girls’ films, and the ability of girls’ films to affect pop culture and perceptions of girlhood. This critical survey of film and the modern girl concentrates largely on films of the last two decades, addressing key themes for girls within “coming of age” films, the

changing (but not always improving) young feminine paradigm, and the ways these films can be powerful determinants of culture. The first chapter explores the ways in which girls’ films construct, reinforce, challenge and dismantle mainstream conceptualizations of sexuality, race and power. The second chapter discusses mainstream limitations of “coming of age” narratives, including recycled plots and stars, treatments of parental and male authority, and adult conceptualizations of adolescence. The third chapter describes girls’ experiences within these narratives through such conventions as attitude, teen fashion, music and dance, unsanctioned rites of passage, and race. The fourth chapter covers the negotiation of sex and sexuality, virginity and sexual empowerment. Instructors considering this book for use in a course may request an examination copy here. The New Laokoon-Irving Babbitt 1924  
The Rejection of Consequentialism-Samuel Scheffler 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or

deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are

times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Women's Manga in Asia and Beyond-Fusami Ogi  
2019-03-14 Women's Manga in Asia and Beyond offers a variety of perspectives on women's manga and the nature, scope, and significance of the relationship between women and comics/manga, both globally as well as locally. Based on the activities since 2009 of the Women's MANGA Research Project in Asia (WMRPA), the edited volume elucidates social and historical aspects of the Asian wave of manga from ever-broader perspectives of transnationalization and glocalization. With a specific focus on women's direct roles in manga creation, it illustrates how the globalization of manga has united different cultures and identities, focusing on networks of women creators and readerships. Taking an Asian regional approach combined with investigations of non-Asian cultures which have felt manga's impact, the book details manga's shift to a global medium, developing, uniting, and involving increasing numbers of participants worldwide. Unveiling diverse Asian identities and showing ways to unite them, the contributors to this

volume recognize the overlaps and unique trends that emerge as a result.

Securing the Future-Sheldon Danziger  
2000-06-29 More than ever, the economic health of a country depends upon the skills, knowledge, and capacities of its people. How does a person acquire these human assets and how can we promote their development? Securing the Future assembles an interdisciplinary team of scholars to investigate the full range of factors—pediatric, psychological, social, and economic—that bear on a child's development into a well-adjusted, economically productive member of society. A central purpose of the volume is to identify sound interventions that will boost human assets, particularly among the disadvantaged. The book provides a comprehensive evaluation of current initiatives and offers a wealth of new suggestions for effective public and private investments in

child development. While children from affluent, highly educated families have good quality child care and an expensive education provided for them, children from poor families make do with informal child care and a public school system that does not always meet their needs. How might we best redress this growing imbalance? The contributors to this volume recommend policies that treat academic attainment together with psychological development and social adjustment. Mentoring programs, for example, promote better school performance by first fostering a young person's motivation to learn. Investments made early in life, such as preschool education, are shown to have the greatest impact on later learning for the least cost. In their focus upon children, however, the authors do not neglect the important links between generations. Poverty and inequality harm the development of parents and children alike. Interventions that empower parents to fight for better services and better schools are also of great benefit to their children. Securing the Future shows how investments in child development are both a

means to an end and an end in themselves. They benefit the child directly and they also help that child contribute to the well-being of society. This book points us toward more effective strategies for promoting the economic success and the social cohesion of future generations. A Volume in the Ford Foundation Series on Asset Building

Montaigne in Motion-Jean Starobinski 1985 Educated in the humanities and trained in psychiatry, Jean Starobinski is a central figure in the Geneva School of criticism. For twenty-five years his work has had considerable influence on postmodern European critics (notably Derrida), scholars of French literature, and intellectual historians. Montaigne in Motion is his subtly conceived and elegantly written study of the Essais of Montaigne, whose deceptively plainspoken meditations have entranced readers and stimulated philosophers since their first publication in 1580 and 1595. Starobinski here

offers a decidedly postmodern reading of Montaigne. In chapters dealing with the themes of public and private life, friendship, death, the body, and love, Starobinski interprets Montaigne's writings as a constant "working through" that leads Montaigne from a situation of unreasoned dependence to a revolt affirming his independence and self-sufficiency, and finally toward an acceptance and mastery of necessary relations. Placing this ternary movement at the very heart of the Montaignian enterprise, Starobinski reveals much that will remind us that Montaigne's thought is as apropos to our time as it was to his own.

Prelude to Empire-Bailey Wallys Diffie 1960 Prelude to Empire spotlights and brings into focus the events and developments in European history which prepared the way for Henry the

Navigator and the age of the Great Discoveries. "Henry's just fame," writes Bailey W. Diffie, "has obscured an essential fact: in 1415 he was a man with a past as well as a future. Some forty years lay before--some forty centuries lay behind. Just as the voyages of his captains would form the indispensable base for Columbus and Vasco de Gama, so the achievements which made Henry the dominating maritime figure of his time grew from the previous experience and generations of fishermen and traders." The first study in English to examine the development of Portuguese commercial methods and overseas contacts, and the first in any language to bring together all the pieces of the story, *Prelude to Empire* has been designed for the general reader and the college student as well as the specialist.
