The Gates of Eden-Brian Stableford 2011-10-21
Despite the development of a faster-than-light drive, Earth's space program has been in the doldrums for centuries, as has Earth itself. Hyperspace being impossible to navigate without beacons at which to aim, there is no alternative but to wait for vessels sent out at sub-light speed decades

previously to find somewhere worth going. Unfortunately, when a worthwhile planet finally turns up, it doesn't take long for political conflicts to materialize over its exploitation. Then, when an entire survey team perishes, the problems intensify. Lee Caretta is the man most likely to solve the problem—if his conflict-ridden employers will let him, if he can keep his tendency to suffer unexplained blackouts under control, and if the world really is sufficiently Earth-like not to be deadly to the explorers. And then the humans begin to die once more! Despite the development of a faster-than-light drive, Earth's space program has been in the doldrums for centuries, as has Earth itself. The Art of French Piano Music-Roy Howat 2009-08-11 An essential resource for scholars and performers, this study by a world-renowned specialist illuminates the piano music of four major French composers, in comparative and reciprocal context. Howat explores the musical language and artistic ethos of this repertoire, juxtaposing structural analysis with editorial and performing issues. He also relates his four composers historically and stylistically to

such predecessors as Chopin, Schumann, Liszt, the French harpsichord school, and Russian and Spanish music. Challenging long-held assumptions about performance practice, Howat elucidates the rhythmic vitality and invention inherent in French music. In granting Fauré and Chabrier equal consideration with Debussy and Ravel, he redresses a historic imbalance and reshapes our perceptions of this entire musical tradition. Outstanding historical documentation and analysis are supported by Howat's direct references to performing traditions shaped by the composers themselves. The book balances accessibility with scholarly and analytic rigor, combining a lifetime's scholarship with practical experience of teaching and the concert platform

The perfect book for teens and fans of Cathy Cassidy, Sarah Dessen or Karen McCombie Dear Dylan, Thanks SO much for your email and I'm sorry about my last one when I said I love you. I hope you don't think I'm a weirdo mentalist?!!! It's just that I was watching Oprah yesterday and she said we should all say we love each other a whole lot more. Not to everyone of course. There's no way I'd tell my scummy step-dad that I love him because that would be lying.
