La société en sablier-Alain LIPJETZ 2013-09-26 Le modèle de la " société en sablier " qui s'est imposé dans de nombreux pays désigne la polarisation des revenus entre une minorité de riches, qui gagnent de plus en plus, et une majorité de pauvres, qui gagnent de moins en moins, tandis que fond la part des " couches moyennes ". Un ouvrage de référence pour l'analyse des mutations sociales et économiques contemporaines. (Cette édition numérique reprend, à l'identique, l'édition de poche de 1998.) Depuis les années quatre-vingt, le modèle de la " société en sablier " s'est imposé dans de nombreux pays, et en particulier en France. Cette image désigne la polarisation des revenus entre une minorité de riches, qui gagnent de plus en plus, et une majorité de pauvres, qui gagnent de moins en moins, tandis que fond la part des " couches moyennes ". La société en sablier est la solution aujourd'hui adoptée, de part et d'autre de l'Atlantique, par les élites productivistes et libérales, face au " problème " du progrès technique et de la mondialisation. Une solution dont l'un des effets majeurs est d'aggraver la " déchirure sociale " qui menace désormais la majorité des citoyens et la cohésion même de la société. Ce modèle n'a pourtant rien d'inéluctable. Pour en faire la preuve, Alain Lipietz s'efforce de comprendre la logique de la société en sablier avec une précision qui fait de ce livre un ouvrage de référence pour l'analyse des mutations sociales et économiques contemporaines. (Cette édition numérique reprend, à l'identique, l'édition de poche de 1998.)

Bulletins Et Mémoires de la Société Médicale Des Hôpitaux de Paris- 1907

Movements in the City-Vincenzo Ruggiero 2014-09-19 For 2nd and 3rd year courses in urban sociology, sociology of exclusion, social stratification, planning and cultural studies in departments of sociology and urban geography. This book provides an in depth examination of social movements and urban life in European cities today. Unique in its interdisciplinary approach, it covers traditional areas of urban studies, sociological concerns about the concept of change and the characteristics of social movements. It presents current theory as well as discursive sections based around empirical work conducted in major European cities including London, Paris and Berlin.

Alternative Exchanges-Laurence Fontaine 2008 Exchanges have always had more than economic significance: values circulate and encounters become institutionalized. This volume explores the changing meaning of the circulation of second-hand goods from the Renaissance to today, and thereby examines the blurring of boundaries between market, gifts, and charity. It describes the actors of the market - official entities such as corporations, recognized professions, and established markets but also the subterranean circulation that develops around the need for money. The complex layers that not only provide for numerous intermediaries but also include the many men and women who, as sellers or buyers, use these circulations on countless occasions are also examined.

Culture- 1990

Notre-Dame de Paris-Victor Hugo 1906

Notre-Dame de Paris-Hugo V. Victor Hugo est un écrivain romantique français mondialement célèbre. L'infl uence de son œuvre, créée au XIXe siècle, sur l'évolution de la littérature est indéniable. Maintes fois adapté au cinéma, son roman «Notre-Dame de Paris» est une de ses œuvres les plus connues et encensées. Le lecteur suit les méandres d'un amour tragique de trois hommes pour une femme. Cependant c'est Notre-Dame qui est le personnage principal, cette cathédrale qui recèle une multitude de secrets, qui réunit des personnes les plus oppoosées et décide de leur sort.

Genie Civil- 1904

L'effet sablier-Jean-Marc Vittori 2009-10-07 Les classes moyennes ont peur. Peur de perdre leur emploi, avant et plus encore dans la crise. Peur de voir leurs revenus laminés par des hausses de prix et d'impôts, alors que les augmentations de salaire se raréfient. Peur de chuter, de ne plus avoir de statut dans la société. Et les classes moyennes ont raison d'avoir peur. Car dans notre société, il n'y a plus rien de « moyen ». Plus de produits moyens, plus d'emplois moyens. Il ne reste que des gros moyens et des petits moyens. Tout ce qui ne grossit pas est condamné à maigrir. Il n'y a plus de stabilité. Il n'y a plus d'embellie assurée, plus d'amélioration automatique, plus d'escalier mécanique qui entraîne toute la société vers le haut. La révolution industrielle du XXIe siècle, celle des technologies de l'information, favorise la main d'œuvre qualifiée : ceux qui savent se servir d'un ordinateur et manier les flux d'information. Du coup, le peloton social s'étire. La société ressemblait à une pyramide, où tous les échelons intermédiaires constituaient les classes moyennes. La révolution de l'information écrase le milieu ! Les uns sont propulsés vers le haut. Les autres descendent. A la pyramide succède un sablier. Cette révolution technologique chamboule toute la société. Dans l'emploi, mais aussi dans la production (le « milieu de gamme » disparaît inexorablement), dans la consommation (nous arbitrons de plus en plus entre des produits de base et des produits de luxe), dans la société (écrasement des « corps intermédiaires »).

Tackling Social Exclusion in Europe-Louis Favreau 2001 This study looks at the growth of enterprises and initiatives whose main aim is the integration of unemployed and disadvantaged people into work. It presents its findings to show how the

voluntary sector, and others like it, is changing in response to rapidly changing work and welfare systems.

Social Economy-Jean-Marc Fontan 2000 An examination of the 'social economy' from a variety of vantage points.

Business Intelligence-Corine Cohen 2013-03-04 Following a long process of qualitative, quantitative, and empirical research next to Strategic Intelligence (SI) experts and large companies, this book proposes a way to improve SI and its impact on the performance of an organization. From an exploration, description and evaluation model of SI, a measurement tool in two parts has been built. For all kind of firms and all advancement levels of SI, it explains the construction of a control panel which can be used to pilot SI and its impact on the performance of an organization.

Bulletin de la Société d'encouragement pour l'industrie nationale-Société d'encouragement pour l'industrie nationale 1857

Nature, Production, Power-Fred P. Gale 2000 This book introduces readers to the discipline of ecological political economy, an approach that aims at a theoretical synthesis of nature, production and power relations. At its heart is a critical appreciation of the social institutions and organizations that can provide the basis for strong environmental sustainability. The complex of ecological, political and economic interrelationships are analysed by eleven authors from backgrounds in economics, political theory, political economy, law and theology. Unifying the disparate treatments is each author's commitment to critical reflection in the pursuit of an ever-more informed debate. Key themes include the nature of 'community', the role of civil society in resisting and reforming modern (un)sustainable development, the new place of transnational advocacy networks, the transformative possibilities for the state and new economic institutions.This book will be of special interest to political scientists and economists, as well as geographers, sociologists and students of environmental studies.

Prometheus Revisited-Arthur Mitzman 2003 The myth of Prometheus has long served as a symbol of the industrialization and individualism of the modern world, yet Arthur Mitzman aims to demonstrate an alternative conception emphasizing creativity over productivity, and a harmonious union with nature rather than its technocratic conquest.

Public Governance-Mark Bevir 2007-04-06 A vast literature encompassing contributions derived from many of the leading theories in the contemporary social sciences, including rational choice, institutionalism, functionalism, systems theory, and interpretive approaches can be found across a large range of journals severing different academic disciplines. This four volume set is the first to collect the most significant and insightful articles into a single volume set.

Bulletins et mémoires de la Société d'anthropologie de Paris-Société d'anthropologie de Paris 1907

Beyond the Regulation Approach-Bob Jessop 2006 This book presents a detailed and critical account of the regulation approach in institutional and evolutionary economics. Offering both a theoretical commentary and a range of empirical examples, it identifies the successes and failures of the regulation approach as an explanatory theory, and proposes new guidelines for its further development. Although closely identified with heterodox French economists, there are several schools of regulation theory and the approach has also been linked to many topics across the social sciences. Bob Jessop and Ngai-Ling Sum provide detailed criticisms of the various schools of the regulation approach and their empirical application, and have developed new ways of integrating it into a more general critical exploration of contemporary capitalism. The authors go on to describe how the regulation approach can be further developed as a progressive research paradigm in political economy. Also presented is a detailed philosophical as well as theoretical critique of the regulation approach and its implications for the philosophy of social sciences and questions of historical analysis (especially periodization). Addressing the implications of the regulation approach for both the capitalist economy and the changing role of the state and governance, this book will be of great interest to a wide-ranging audience, including institutional and evolutionary economists, economic and political sociologists and social and political theorists.
