Test Anxiety-Marty Sapp 2013-11-20 This book is designed to give students and researchers the confidence to understand, assess, treat, and research test anxiety. Marty Sapp presents the various cognitive and behavioral theories of test anxiety along with instruments for measuring test anxiety.

He integrates statistical methodology, measurement, and research designs with actual research situations that occur within the test anxiety field. In addition, the SPSS codes for conducting sample reliability and validity are provided along with the codes for finding confidence intervals around population reliability measures. Like the previous edition, the logic of structural equations modeling is presented with the EQS structural equations program. Many researchers view test anxiety as existing of factors such as Sarason's four-factor model or Spielberger's two-factor model. Both models can be easily analyzed by EQS. In terms of treatment, affective, cognitive, behavioral, hypnosis, systematic desensitization, Eye-Movement Desensitization and Reprocessing (EMDR), and the Eye-Movement Technique (EMT) are presented. This book integrates applied research designs and statistical and measurement methodology that frequently occur in the test anxiety literature, but the methodological treatment of research is nonmathematical. Finally, extensive discussions of treatments for test anxiety are provided.

A Philosophy of Second Language Acquisition-Marysia Johnson 2008-10-01

div>How does a person learn a second language? In this provocative book, Marysia Johnson proposes a new model of second language acquisition (SLA)—a model that shifts the focus from language competence (the ability to pass a language exam) to language performance (using language competently in real-life contexts). Johnson argues that current SLA theory and research is heavily biased in the direction of the cognitive and experimental scientific tradition. She shows that most models of SLA are linear in nature and subscribe to the conduit metaphor of knowledge transfer: the speaker encodes a message, the hearer decodes the sent

message. Such models establish a strict demarcation between learners' mental and social processes. Yet the origin of second language acquisition is located not exclusively in the learner's mind but also in a dialogical interaction conducted in a variety of sociocultural and institutional settings, says the author. Drawing on Vygotsky's sociocultural theory and Bakhtin's literary theory, she constructs an alternative framework for second language theory, research, teaching, and testing. This approach directs attention toward the investigation of dynamic and dialectical relationships between the interpersonal (social) plane and the intrapersonal (individual) plane. Johnson's model shifts the focus of SLA away from a narrow emphasis on language competence toward a broader view that encompasses the interaction between language competence and performance. Original and controversial, *A Philosophy of Second Language Acquisition* offers: · an introduction to Vygotsky's sociocultural theory and Bakhtin's literary theory, both of which support an alternative framework for second language acquisition; · an examination of the existing cognitive bias in SLA theory and research; · a radically new model of second language acquisition. /DIV/DIV

Therapeutic and Nutritional Uses of Algae-Leonel Pereira 2018-01-29 Algae have been used since ancient times as food, fodder, fertilizer and as source of medicine. Nowadays seaweeds represent an unlimited source of the raw materials used in pharmaceutical, food industries, medicine and cosmetics. They are nutritionally valuable as fresh or dried vegetables, or as ingredients in a wide variety of prepared foods. In particular, seaweeds contain significant quantities of protein, lipids, minerals and vitamins. There is limited information about the role of algae and algal metabolites in medicine. Only a few taxa have been studied for their use in medicine. Many

traditional cultures report curative powers from selected algae, in particular tropical and subtropical marine forms. This is especially true in the maritime areas of Asia, where the sea plays a significant role in daily activities. Nonetheless, at present, only a few genera and species of algae are involved in aspects of medicine and therapy. Beneficial uses of algae or algal products include those that may mimic specific manifestations of human diseases, production of antibiotic compounds, or improvement of human nutrition in obstetrics, dental research, thallassotherapy, and forensic medicine.

Fay Wray and Robert Riskin-Victoria Riskin 2019-02-26 A Hollywood love story, a Hollywood memoir, a dual biography of two of Hollywood's most famous figures, whose golden lives were lived at the center of Hollywood's golden age, written by their daughter, an acclaimed writer and producer. Fay Wray was most famous as the woman—the blonde in a diaphanous gown—who captured the heart of the mighty King Kong, the twenty-five-foot, sixty-ton gorilla, as he placed her, nestled in his eight-foot hand, on the ledge of the 102-story Empire State Building, putting Wray at the height of New York's skyline and cinematic immortality. Wray starred in more than 120 pictures opposite Hollywood's biggest stars—Spencer Tracy, Gary Cooper (The Legion of the Condemned, The First Kiss, The Texan, One Sunday Afternoon), Clark Gable, William Powell, and Charles Boyer; from cowboy stars Hoot Gibson and Art Accord to Ronald Colman (The Unholy Garden), Claude Rains, Ralph Richardson, and Melvyn Douglas. She was directed by the masters of the age, from Fred Niblo, Erich von Stroheim (The Wedding March), and Mauritz Stiller (The Street of Sin) to Leo McCarey, William Wyler, Gregory La Cava, “Wild Bill” William Wellman, Merian C. Cooper (The Four Feathers, King Kong), Josef von Sternberg (Thunderbolt), Dorothy Arzner (Behind the Make-Up), Frank Capra (Dirigible), Michael Curtiz (Doctor X), Raoul Walsh (The Bowery), and Vincente Minnelli. The book's—and Wray's—counterpart: Robert Riskin, considered one of the greatest screenwriters of all time. Academy Award-winning writer (nominated for five), producer, ten-year-long collaborator with Frank Capra on such pictures as American Madness, It Happened One Night, Mr. Deeds Goes to Town, Lost Horizon, and Meet John Doe, hailed by many, among them F. Scott Fitzgerald, as “among the best screenwriters in the business.” Riskin wrote women characters who were smart, ornery, sexy, always resilient, as he perfected what took full shape in It Happened One Night, the Riskin character, male or

female—breezy, self-made, streetwise, optimistic, with a sense of humor that is subtle and sure. Fay Wray and Robert Riskin lived large lives, finding each other after establishing their artistic selves and after each had had many romantic attachments—Wray, an eleven-year-long difficult marriage and a fraught affair with Clifford Odets, and Riskin, a series of romances with, among others, Carole Lombard, Glenda Farrell, and Loretta Young. Here are Wray's and Riskin's lives, their work, their fairy-tale marriage that ended so tragically. Here are their dual, quintessential American lives, ultimately and blissfully intertwined.

Ben Robertson-Jodie Peeler 2019-10-30 In Ben Robertson: South Carolina Journalist and Author, Jodie Peeler tells the story of a man consumed with a need to see the world but whose heart never really left home. Drawing heavily on Robertson's writings and personal papers, Peeler describes his active career as a journalist, which took him to Hawaii, Australia, Europe, Java, New York, and Washington, D.C. The early years of Robertson's career were spent as a reporter for the New York Herald-Tribune. After several

years as a freelance writer, he became a World War II correspondent covering England for the New York newspaper PM. While Robertson's wartime dispatches drew attention and praise, they represented but one aspect of the man's wide-ranging works and career, for the Ben Robertson who witnessed destruction and heroism in the fires of London was also a proud son of South Carolina. In addition to his work as a journalist, Robertson wrote three books. *Travelers' Rest*, a fictionalized account of his ancestors' settling in South Carolina, ruffled southern feathers. In *I Saw England* he presents a firsthand account of the Battle of Britain and advocates for the United States to intervene in World War II. His heartfelt memoir, *Red Hills and Cotton*, which recalls his boyhood days in Pickens County and calls for the South to look to the future, became a southern classic. In 1943, while en route to his new job as London bureau chief for the New York Herald-Tribune, Robertson lost his life in a plane crash. Throughout his decidedly brief but adventurous life, Robertson never stopped being what one friend described as "a sentimental South Carolinian who carried his dreams on the tip of his tongue." And over time he evolved into a progressive voice calling on the South to reevaluate its attitudes on race and economics. This is the story of that proud South Carolinian, from the dreams that propelled him around the world to the sentiment that always called him home.

Fairy Tales-Ruth B. Bottigheimer 2010-03-25 Where did Cinderella come from? Puss in Boots? Rapunzel? The origins of fairy tales are looked at in a new way in these highly engaging pages. Conventional wisdom holds that fairy tales originated in the oral traditions of peasants and were recorded for posterity by the Brothers Grimm during the nineteenth century. Ruth B. Bottigheimer overturns this view in a lively account of the origins of these well-loved stories. Charles Perrault created Cinderella and her fairy godmother, but no countrywoman whispered this tale into Perrault's ear. Instead, his Cinderella appeared only after he had edited it from the book of often amoral tales published by Giambattista Basile in Naples.

Distinguishing fairy tales from folktales and showing the influence of the medieval romance on them, Bottigheimer documents how fairy tales originated as urban writing for urban readers and listeners. Working backward from the Grimms to the earliest known sixteenth-century fairy tales of the Italian Renaissance, Bottigheimer argues for a book-based history of fairy tales. The first new approach to fairy tale history in decades, this book answers questions about where fairy tales came from and how they spread, illuminating a narrative process long veiled by surmise and assumption.

Key Debates in Anthropology-Tim Ingold 2003-12-16 Every year, leading social anthropologists meet to debate a motion at the heart of current theoretical developments in their subject and this book includes the first six of these debates, spanning the period from 1988 to 1993. Each debate has four principal speakers: one to propose the motion, another to oppose it, and two seconders. The first debate addresses the disciplinary character of social anthropology: can it be regarded as a science, and if so, is it able to establish general propositions about human culture and social life? The second examines the concept of society, and in the third debate the spotlight is turned on the role of culture in people's perception of their environments. The fourth debate focuses on the place of language in the formation of culture. The fifth takes up the question of how we view the past

Downloaded from liceolefilandiere.it on January 20, 2021 by guest

in relation to the present. Finally, in the sixth debate, the concern is with the cross-cultural applicability of the concept of aesthetics. With its unique debate format, *Key Debates in Anthropology* addresses issues that are currently at the top of the theoretical agenda, which register the pulse of contemporary thinking in social anthropology. It will be of value to students who are not only introduced to the different sides of every argument, but are challenged to join in and to develop informed positions of their own.
