Criminal Poisoning-John H. Trestrail, III 2007-10-28
In this revised and expanded edition, leading forensic scientist John Trestrail offers a pioneering survey of all that is known about the use of poison as a weapon in murder. Topics range from the use of poisons in history and literature to convicting the poisoner in court, and include a review of the different types of poisons, techniques for crime scene investigation, and the critical essentials of the forensic autopsy. The author updates what is currently known about poisoners in general and their victims. The Appendix has been updated to include the more commonly used poisons, as well as the use of antifreeze as a poison.

New Orleans as It Was-Henry C. Castellanos 2006-09-01
A criminal lawyer and popular journalist, Henry C. Castellanos lived nearly three-quarters of the nineteenth century in New Orleans. In his later years, between 1892 and 1895, he wrote more than 120 articles for the Times-Democrat on the history and mores of his beloved city, and in 1895 he published a selection of those episodes in New Orleans as It Was. This facsimile reproduction of the volume includes a new introduction by historian Judith Kelleher Schafer, which pieces together the little-known life of Castellanos and provides insights about a period when New Orleans was the queen city of the South.Castellanos's collection of vignettes, incidents, anecdotes, personalities, and descriptions focuses on the years 1820 to 1860 and reflects the interests of a city newspaperman. The reader encounters duels, voodooos, executions, and piracy, and meets mayors, generals, slaves, masters, princes, paupers, judges, prisoners, and jailers. Castellanos describes in detail buildings, public parks, suburbs, notable houses, churches, and neighboring plantations as well as the characteristics, customs, dress, food, and amusements of New Orleanians. In capturing what he called New Orleans's "unwritten history," Castellanos brings alive for readers today America's most interesting city at a younger age.

My Maine-Normand Chartier 2005-01-01
Although he spends most of the year teaching and painting in Connecticut, internationally recognized artist Normand Chartier's heart lies in Maine, where he rents a cottage on Southport Island every summer and spends hours capturing the essence of the coast in his unique style. Here, the reader will find old farmhouses that grace tidal coves as no modern structure could; lobster boats whose curves and ruggedness match those of the shoreline along which they fish; and spruce-graced, granite shorelines found nowhere else in America.

Toxicology in Antiquity- 2018-10-22
Toxicology in Antiquity provides an authoritative and fascinating exploration into the use of toxins and poisons in antiquity. It brings together the two previously published shorter volumes on the topic, as well as adding considerable new information. Part of the History of Toxicology and Environmental Health series, it covers key accomplishments, scientists, and events in the broad field of toxicology, including environmental health and chemical safety. This first volume sets the tone for the series and starts at the very beginning, historically speaking, with a look at toxicology in ancient times. The book explains that before scientific research methods were developed, toxicology thrived as a very practical discipline. People living in ancient civilizations readily learned to distinguish safe substances from hazardous ones, how to avoid these hazardous substances, and how to use them to inflict harm on enemies. It also describes scholars who compiled compendia of toxic agents. New chapters in this edition focus chiefly on evidence for the use of toxic agents derived from religious texts. Provides the historical background for understanding modern toxicology
Illustrates the ways previous civilizations learned to distinguish safe from hazardous substances, how to avoid the hazardous substances and how to use them against enemies
Explores the way famous historical figures used toxins
New chapters focus on evidence of the use of toxins derived from religious texts

The Land in Between-Béatrice Craig 2009
The "land in between" is the upper St. John Valley, a region straddling the MaineNew Brunswick border. A zone of contacts between different Native American cultures until the arrival of the Europeans, it was disputed by the British and the French in the colonial period and settled by Acadians and French Canadians in the eighteenth century. To this day, it has remained the site of a distinct FrenchAmerican culture, and its residents have striven to preserve their specificity and unity despite the international boundary. The Land in Between is a narrative survey history of this fascinating and unique region and is also designed to serve as a reference for teachers, librarians, archivists, and historians. It includes documents (many translated from the original), maps, and an extensive bibliography.
Batrice Craig holds a PhD in Canadian-American history from the University of Maine. She is a full professor of History at the University of Ottawa (Canada), and the author of Homespun Capitalists and Backwoods Consumers, University of Toronto Press, 2007, as well as numerous articles on the history of the Upper Saint John Valley.
Maxime Dagenais is a doctoral candidate in Nineteenth-Century Canadian History at the University of Ottawa. He obtained his BA in History from Concordia University in 2003 and his MA from the University of Ottawa in 2006. The Ethics of Modernism-Lee Oser 2007-01-11
What was the ethical perspective of modernist literature? How did Yeats, Eliot, Joyce, Woolf and Beckett represent ethical issues and develop their moral ideas? Lee Oser argues that thinking about human nature restores a perspective on modernist literature that has been lost. He offers detailed discussions of the relationship between ethics and aesthetics to illuminate close readings of major modernist texts. For Oser, the reception of Aristotle is crucial to the modernist moral project, which he defines as the effort to transform human nature through the use of art. Exploring the origins of that project, its success in modernism, its critical heirs, and its possible future, The Ethics of Modernism brings a fresh perspective on modernist literature and its interaction with ethical strands of philosophy. It offers many new insights to scholars of twentieth-century literature as well as intellectual historians.
Sur Le Vif-Hannelore Jarausch 2010-01-31
Designed specifically for one-semester intermediate French programs, SUR LE VIF, International Edition offers a contextualized review of the fundamentals, adding just enough new material to expand the language skills of French learners without overwhelming them. The textbook is divided into an in-class conversation manual and an out-of-class grammar reference, giving the flexibility to choose among readings, activities, and grammar practice to meet the varied needs of intermediate students. In nine short chapters, SUR LE VIF encompasses a full-length intermediate course with its provocative readings, active grammar review, and updated cultural notes. The program also takes into account the importance of audio and visual elements: the "Prélude" (before Chapter 1), two "Interludes" (after Chapters 3 and 6), and "Postlude" (after Chapter 9) contain new songs and follow-up activities. The accompanying video program, featured on the new Premium Website, adds a visual component.By skillfully weaving grammar review into thought-provoking chapter themes, SUR LE VIF provides a solid review of first-year French while adding refinements for improved skills in reading, listening, composition, and conversation.

The Social and Economic Roots of the Scientific Revolution-Gideon Freudenthal 2009-05-20
The texts of Boris Hessen and Henryk Grossmann assembled in this volume are important contributions to the historiography of the Scienti?c Revolution and to the methodology of the historiography of science. They are of course also historical documents, not only testifying to Marxist discourse of the time but also illustrating typical European fates in the ?rst half of the twentieth century. Hessen was born a Jewish subject of the Russian Czar in the Ukraine, participated in the October Revolution and was executed in the Soviet Union at the beginning of the purges. Grossmann was born a Jewish subject of the Austro-Hungarian Kaiser in Poland and served as an Austrian of?cer in the First World War; afterwards he was forced to return to Poland and then because of his revolutionary political activities to emigrate to Germany; with the rise to power of the Nazis he had to ?ee to France and then Americawhilehisfamily,whichremainedinEurope,perishedinNaziconcentration camps. Our own acquaintance with the work of these two authors is also indebted to historical context (under incomparably more fortunate circumstances): the revival of Marxist scholarship in Europe in the wake of the student movement and the p-fessionalization of history of science on the Continent. We hope that under the again very different conditions of the early twenty-?rst century these texts will contribute to the further development of a philosophically informed socio-historical approach to the study of science.
