In The Enlightenment in Practice, Jeremy L. Caradonna shows that an apparatus was put in place to legitimize and manage the professionalization of the didactic arts, which were considered a cornerstone of the values that had been enshrined in the Revolution of 1789. He argues that this apparatus was not built from scratch, but rather it was borrowed from the social and cultural practices of the ancien régime, and he examines the ways in which the state was able to harness this apparatus to further its own ends. Caradonna considers the Enlightenment in France can no longer be seen as a cultural movement restricted to a small coterie of philosophers or a limited number of printed texts. Moreover, Caradonna demonstrates that the French monarchy took academic contests very seriously, and it invested heavily in the training of state functionaries, the training of state functionaries, and the submittig the results of essays for scrutiny by panels of judges. move toward a global culture after the collapse of the Confucian world-view at the start of the twentieth century, and particularly since China’s re-entry into the world economy in the post-Mao era. Attitudes toward the prize reveal the same contradictory mix of admiration, resentment, and anxiety that intellectuals and writers have long felt toward Western values as they struggled to shape a modern Chinese identity. In short, the Nobel complex reveals the pressure points in an intellectual community not entirely sure of itself. Making use of extensive original research, including interviews with leading contemporary Chinese authors and critics, The Politics of Cultural Capital is a comprehensive, up-to-date treatment of an issue that cuts to the heart of modern and contemporary Chinese thought and culture. It will be essential reading for scholars of modern Chinese literature and culture, globalization, post-colonialism, and comparative and world literature.

What Is World Literature? David Damrosch 2018-06-05 World literature was long defined in North America as an established canon of European masterpieces, but an emerging global perspective has challenged both this European focus and the very category of the “masterpieces.” The first book to look broadly at the contemporary scope and purposes of world literature, What Is World Literature? probes the uses and abuses of world literature in a rapidly changing world. In case studies ranging from the Sumerians to the Aztecs and from medieval mysticism to postmodern metadiscussion, Damrosch looks at the ways works change as they move from national to global contexts. Presenting world literature not as a canon of texts but as a mode of circulation and of reading, Damrosch argues that world literature is work that gains in translation. When it is effectively presented, a work of world literature moves into an elliptical space created between the source and receiving cultures, shaped by both but incalculable by neither alone. Established classics and new discoveries alike participate in this mode of circulation, but they can be seriously misjudged in the process. From the rediscovered Epic of Gilgamesh in the nineteenth century to Hochepêche Menchi’s writing today, foreign works have often been distorted by the immediate needs of their own editors and translators. Elegantly written, argued largely by example, and replete with insightful close readings, this book is both an essay in definition and a series of cautionary tales.

“What is Literature?” and Other Essays-Jean-Paul Sartre 1981 What is Literature? challenges anyone who writes as if literature could be extricated from history or society. But Sartre does more than indict. He offers a definitive statement about the phenomenology of reading, and he goes on to provide a dazzling example of how to write a history of literature that takes ideology and institutions into account.
