Aging Well-George E. Vaillant 2008-12-14 In an unprecedented series of studies, Harvard Medical School has followed 824 subjects -- men and women, some rich, some poor -- from their teens to old age. Harvard's George Vaillant now uses these studies -- the most complete ever done anywhere in the world -- and the subjects' individual histories to illustrate the factors involved in reaching a happy, healthy old age. He explains precisely why some people turn out to be more resilient than others, the complicated effects of marriage and divorce, negative personality changes, and how to live a more fulfilling, satisfying and rewarding life in the later years. He shows why a person's background has less to do with their eventual happiness than the specific lifestyle choices they make. And he offers step-by-step advice about how each of us can change our lifestyles and age successfully. Sure to be debated on talk shows and in living rooms, Vaillant's definitive and inspiring book is the new classic account of how we live and how we can live better.

Entrepreneurial Failure-Dean A. Shepherd 2013 Entrepreneurs act in environments of great risk and high uncertainty, and as a result, failure is a common occurrence. For this volume, Professor Shepherd has made a judicious selection of published articles, which explore the antecedents to and potential outcomes of entrepreneurial failure. By understanding these causes and consequences, entrepreneurs may become better able to manage failure, to reduce its costs and to capitalise on its benefits.

Understanding Behavior in the Context of Time-Alan Strathman 2006-04-21 Understanding Behavior in the Context of Time reviews the research on temporal orientation and brings together the disparate social behaviors influenced by time perspective. Organized into four sections, each chapter includes theory, research, applications, and directions for future research. Some chapters outline novel theoretical approaches that help to expand and/or integrate existing theories. The second part focuses on individual level processes and reviews the conceptualization, measurement, and lifespan development of time orientation; the outcomes associated with various time orientations; and how temporal factors influence attitudes and persuasion. Part three explores the role of time within interpersonal and group level processes as applied to such areas as close relationships, group cooperation, aggression, organizational behavior, pro-environmental behavior, and cultural issues. This book will be of interest to social and personality psychologists, and the book's applied emphasis will appeal to health, environmental, and industrial psychologists.

Pandora's Box-Andrew A. Adams 2008-02-15 Computing technology is constantly evolving and changing, developing and consolidating its position as a vital component of our lives. It no longer plays a minor part in society - it is embedded in, and affects, all aspects of life, from education to healthcare to war. Dealing with the implications of this is a major challenge, and one that can impact upon us, both personally and professionally. As a consequence, it is vital that all in the computing industry make wise
decisions regarding their conduct. Using case studies and discussion topics drawn from entertaining real world examples, Pandora’s Box examines the background of a wide range of vital contemporary issues, encouraging readers to examine the social, legal and ethical challenges they will face in their own careers. Written in an engaging style and packed with international examples, this book addresses topics which have come to the forefront of public consciousness in recent years, such as online crime, piracy and peer to peer file sharing. Comprehensive coverage is provided of digital entertainment, censorship and privacy issues, presenting a rich source of context in which to consider ethical matters. Suitable for students on computer science degree programmes, as well as those taking IT related modules on other courses which consider the impact of technology on 21st century living, Pandora’s Box is an essential read and a unique and timely textbook.

Criminological Theory-George E. Higgins 2015-11-17 Criminological Theory provides easy access to criminological theory through simplicity in writing, drawing the theories, and providing summary statements of the theory. The purpose of this book is to bring criminological theory to non-abstract thinker by presenting the theories in a manner that is easy to understand written in everyday language. Features: The book provides an extensive discussion of the historical background of the theory, as well as its current manifestations. Modern day examples and case studies are presented so students can understand the application of the theory. Broad coverage, including deterrence and rational choice theory, biological and biosocial theories, psychological theories, social bonding and control theories, labeling theory, social structure theory, anomie and strain theories, conflict theories, feminist theory, and integrated theory. The text can be used as a main text or supplement, and has a flexible approach useful for a wide range of courses. An understandable and accessible structure, and helpful charts and figures, enhance the text.

Urban Sustainable Mobility-Elisabetta Venezia 2011

Tax Policy and the Economy, Volume 34-Robert A. Moffitt 2020-06-22 This volume presents five new studies on current topics in taxation and government spending. Mark Shepard, Katherine Baicker, and Jonathan Skinner explore implementation aspects of a Medicare-for-All program, which provides a uniform health insurance benefit to everyone, and contrast it
2007 Dealing directly and exclusively with the issue of older workers, this book brings together up-to-the minute research findings by many of the leading researchers and writers in the field exploring key issues that will influence public policy in the UK and beyond.

1972-73 Quality of Employment Survey-Robert P. Quinn 1975

Dynamic Risk Factors-Tony Ward 2018-10-25

Dynamic risk factors are the children of risk prediction. They were identified to help practitioners assess risk of recidivism and to set treatment targets likely to reduce reoffending. This resulted in the development of intervention programs designed to modify the characteristics of individuals and their environments associated with crime. The predictive nature of their legacy lies in their ability to provide reliable information about the likelihood of future reoffending. In this respect, dynamic risk factors are useful complements to static risk factors such as age, gender, and history of offending, and add incremental validity to recidivism prediction.

Their treatment utility resides in the fact that practitioners increasingly rely on the identification of dynamic risk factors to direct correctional assessment and interventions. Thus, dynamic risk factors have a dual status. They are both useful predictors of reoffending and measures of risk status, and potential causes of reoffending, capable of serving an explanatory role as well as a predictive one. It is a simple and powerful conceptualization that has streamlined forensic and correctional research, program development, and the delivery of treatment. Despite its conceptual elegance we believe that the dual conceptualization of dynamic risk factors is problematic and these difficulties spill over into their role in assessment, assessment, treatment, and desistance contexts. In this publication, the nature and function of dynamic risk factors are investigated and their strengths and limitations identified. This book was originally published as a special issue of Psychology, Crime and Law.

Entrepreneurial Cognition-Dean A. Shepherd 2018-01-31

This open access book investigates the selection of an entrepreneurial career. This book considers the pursuit of a potential opportunity, of the (potential) entrepreneur as he or she explores the impact of the organization and the environment only inasmuch as they impact the individual’s cognitions. Readers will learn why some individuals and managers are able to identify and successfully act upon opportunities in uncertain environments while others are not. This book applies a cognitive lens to understand individuals’ knowledge, motivation, attention, identity, and emotions in the entrepreneurial process.

Schizoaffective Psychoses-Andreas Marneros 1986-10-01

Hive Succinctly-Elton Stoneman 2017-02-01

Hive allows you to take data in Hadoop, apply a fixed external schema, and query the data with an SQL-like language. With Hive, complex queries can yield simpler, more effectively visualized results. Author Elton Stoneman uses Hive Succinctly to introduce the core principles of Hive and guides readers through mapping Hadoop and HBase data in Hive, writing complex queries in HiveQL, and running custom code inside Hive queries using a variety of languages. With this e-book, getting the most out of big data and Hadoop has never been easier.

Cambridge International AS and A Level Mathematics: Mechanics Coursebook-Jan Dangerfield 2018-03-22

This series has been
developed specifically for the Cambridge International AS & A Level Mathematics (9709) syllabus to be examined from 2020. Cambridge International AS & A Level Mathematics: Mechanics matches the corresponding unit of the syllabus, with clear and logical progression through. It contains materials on topics such as velocity and acceleration, force and motion, friction, connected particles, motion in a straight line, momentum, and work and energy. This coursebook contains a variety of features including recap sections for students to check their prior knowledge, detailed explanations and worked examples, end-of-chapter and cross-topic review exercises and 'Explore' tasks to encourage deeper thinking around mathematical concepts. Answers to coursebook questions are at the back of the book.

Ideology and Modern Culture-John B. Thompson 2013-05-02 In this major new work, Thompson develops an original account of ideology and relates it to the analysis of culture and mass communication in modern Societies. Thompson offers a concise and critical appraisal of major contributions to the theory of ideology, from Marx and Mannheim, to Horkheimer, Adorno and Habermas. He argues that these thinkers - and social and political theorists more generally - have failed to deal adequately with the nature of mass communication and its role in the modern world. In order to overcome this deficiency, Thompson undertakes a wide-ranging analysis of the development of mass communication, outlining a distinctive social theory of the mass media and their impact.

The Individual in the Changing Working Life-Katharina Naswall 2010-12-02 Working life has been the subject of great change in recent years with contemporary conditions generally providing increased opportunities and autonomy for individuals. But these benefits can coincide with greater demands and responsibilities, increasing the pressure to work outside of traditional working hours and so creating conflict between work and family life. This book contributes towards our understanding of contemporary working life, considering how recent changes have affected the work climates, attitudes and well-being of individuals. Combining traditional theoretical frameworks with innovative research, it discusses both the positive and negative effects contemporary working life has on organizations and employees. International experts in the fields of work and organizational psychology present strategies to prevent negative working conditions and help individuals achieve a healthy work-life balance.

Work Without Boundaries-Michael Allvin

Urban conditions are crucial to our experience of modernity, and, as reflected by art, literature and popular culture, have influenced contemporary ideas of what urban life is about. The Urban Lifeworld contributes to our understanding of the cultural role of cities by offering new insight into the analysis of urban experience. Two exceptional cities, New York and Copenhagen, are the focus of this exploration of cultural representations of urban life, which investigates the contrasts between perceptions and formation of the urban lifeworld. Integrating sociological, aesthetic and anthropological approaches to urban questions, this collection of essays presents a new vision of the cityscape which will enrich both academic debate and public life.

Infant Vision-European Brain and Behaviour Society 1996 This extensive book provides an up-to-date overview by leading international authorities, spanning the disciplines of neuroscience, psychology, ophthalmology, optometry, and paediatrics, of normal and pathological infant visual development. It covers the development of retinal receptors; infant sensitivity to detail, colour, contrast, and movement; binocularity, eye movements, and refraction, and cognitive processing. Childrens' visual deficits, including amblyopia and cataract are covered.

Work Without Boundaries-Michael Allvin
2011-03-21 Drawing on more than a decade of inter-disciplinary research, this book provides a comprehensive overview of the available theories, concepts, data and research on new work organizations and the concept of ‘work without boundaries’. Explores a concept of work that is not restricted by traditional organizational rules like regular office hours, a single workplace, fixed procedures and limited responsibility. Provides a comprehensive overview of the available theories, concepts, data and research on new work organizations. Examines the shift of power away from organizations to make individuals accountable for their own employability and work. Draws on over a decade of original research into ‘work without boundaries’ in which the authors are key authorities. Brings together organization theory and work psychology with scholarship from related fields including sociology, social psychology, cognition and psychobiology. Performs Feminisms-Sue-Ellen Case 1990-02 A valuable, provoking, important addition to any theatre scholar or practitioner’s library, especially since feminist theory is a relative newcomer to the world of theatre. Global Youth?-Pam Nilan 2006-11-22 This innovative collection of studies by international youth researchers, critically addresses questions of ‘global’ youth, incorporating material from regions as diverse as Sydney, Tehran, Dakar and Manila, and advancing our knowledge about young people around the globe. Exploring specific local youth cultures whilst mediating global mass media and consumption trends, this book traces subaltern ‘youth landscapes’ and tells subaltern ‘youth stories’ previously invisible in predominantly western youth cultural studies and theorizing. The chapters here serve as a refutation of the colonialist discourse of cultural globalization. Showcasing previously unpublished youth research from outside the English-speaking world alongside the work of well-known researchers such as Huq and Holden, these accounts of youth cultural practices highlight much that is predictably different, but also a great deal of common ground. This book goes inside creative cultural formation of youth identities to critically examine the global in the local. Bringing together an internationally diverse group of researchers, who describe and analyze youth cultures throughout Europe, the Americas, Asia, Africa and Oceania, this volume presents the first comprehensive review of global youth cultures, practices and identities, and as such is a valuable read for students and researchers of youth studies, cultural studies and sociology. Aquatic Rehabilitation-Richard Gene Ruoti 1997 Aquatic Rehabilitation has been developed to address the needs of professionals of diverse backgrounds. The editors have envisioned this text to be useful not only to students, but also to physical therapists, physicians, occupational therapists, nurses, athletic trainers, exercise physiologists, recreational therapists, and others who use aquatics as part of the rehabilitation process. Work, Subjectivity and Learning-Stephen Billett 2007-06-03 This book focuses on relations among subjectivity, work and learning that represent a point of convergence for diverse disciplinary traditions and practices. There are contributions from leading scholars in the field. They provide emerging perspectives that are elaborating the complex relations among subjectivity, work and learning, and circumstances in which they are played out. Handbook of the Neuroscience of Language-Brigite Stemer 2008-04-29 In the last ten years the neuroscience of language has matured as a field. Ten years ago, neuroimaging was just being explored for neurolinguistic questions, whereas today it constitutes a routine component. At the same time there have been significant developments in linguistic and psychological theory that speak to the neuroscience of language. This book consolidates those advances into a single reference. The Handbook of the Neuroscience of Language provides a comprehensive overview of this field. Divided into five sections, section one discusses methods and techniques including clinical assessment approaches, methods of mapping the human brain, and a theoretical framework for interpreting the multiple levels of neural organization that contribute to language comprehension. Section two discusses the impact of imaging techniques (PET, fMRI, ERPs, electrical stimulation of language cortex, TMS) have made to language research. Section three discusses experimental approaches to the field, including disorders at different language levels in reading as well as writing and number processing. Additionally, chapters here present computational models, discuss the role of mirror systems for language, and cover brain lateralization with respect to language. Part four focuses on language in special populations, in various disease processes, and in developmental disorders. The book ends with a listing of resources in the neuroscience of language and a
glossary of items and concepts to help the novice become acquainted with the field. Editors Stemmer & Whitaker prepared this book to reflect recent developments in neurolinguistics, moving the book squarely into the cognitive neuroscience of language and capturing the developments in the field over the past 7 years. History section focuses on topics that play a current role in neurolinguistics research, aphasia syndromes, and lesion analysis Includes section on neuroimaging to reflect the dramatic changes in methodology over the past decade Experimental and clinical section reflects recent developments in the field Economic Dynamics-John Stachurski 2009 "Topics covered in detail include nonlinear dynamic systems, finite state Markov chains, stochastic dynamic programming, and stochastic stability and computation of equilibria. The models are predominantly nonlinear, and the emphasis is on studying nonlinear systems in their original form, rather than by means of rudimentary approximation methods such as linearization."--Pub. desc. Youth Transitions-René Bendit 2008-01-01 What will become of today's young people? Will they be supportive of the world they live in? Or are they perhaps doomed to be criminal drop-outs? This book investigates to what extent different and contradictory trends of social modernization and economic progress determine the biographical development and social integration of young people in different countries and world regions. The book looks at the role young people themselves can play in the future, either as constructive social actors or as a problematic and partly excluded group, unable to face the challenges of a permanently changing world. It examines youth transition from education to work; patterns of vulnerability and the processes of social inclusion/exclusion; political participation, exclusion, and instrumentalization; youth cultures and new technologies; and regional research networks, governance, and supra-national youth policy. Women Researching in Africa-Ruth Jackson 2018-07-31 This edited collection explores the lives, consequences and motivations of female researchers in Africa, giving unprecedented insights into how their gender—and sometimes their ethnicity and age—impacted on their research experiences, and how doing research in Africa affected them as women. Each contributor considers her place or position in the research process and provides a vivid portrait of that experience. Drawing on research findings from Nigeria, Ethiopia, Cameroon, Ghana, Guinea, Malawi, Uganda and other African countries, the book looks at gender and identity as a female researcher in Africa; relationships with 'others'; and unique methodological challenges for female researchers in Africa. With refreshing candour, each chapter challenges other researchers in Africa (both women and men), to integrate critical reflections of gender and diverse gendered field experiences into their work. Women Researching in Africa will be of interest to students and scholars across a range of disciplines including development studies, anthropology, geography, gender studies and international studies. Global Handbook on Noncommunicable Diseases and Health Promotion-David V. McQueen 2013-07-03 Global Handbook on Noncommunicable Diseases and Health Promotion David V. McQueen, editor A scan of health challenges around the globe readily brings to mind a range of infectious illnesses, from HIV to influenza. Yet chronic non-contagious conditions--heart disease, asthma, diabetes, cancer--are more prevalent, and their rates soaring, across the developed and developing worlds. The Global Handbook on Noncommunicable Diseases and Health Promotion is an important resource for understanding and approaching chronic illnesses and their prevention. This timely text balances theory and strategies to provide an integrative context for health-affecting behaviors regarding tobacco use, food choices, and physical activity. Coverage expands on current medical/clinical public health perspectives, arguing that closer attention to social context is crucial to better use of health resources and more relevant preventive efforts. Possible roles for hospitals, the workplace, government agencies, NGOs, and other institutions are analyzed, as is the potential for addressing larger underlying health factors (e.g., inequities and poverty) at the societal level. Topics covered include: The nature of causality: beyond traditional evidence Learning from the social sciences in chronic disease health promotion Contextual factors in health and illness Understanding and applying a social determinants of health framework for addressing NCDs Public health, NCDs, health promotion and business partnering NCDs and civil society: a history and a roadmap As the authors of the Global Handbook on Noncommunicable Diseases and Health Promotion make abundantly clear, opportunities are as numerous as the issues, and researchers and graduate students in global
public health, health promotion, and chronic disease epidemiology will find these chapters positive and realistic.

Heavy Work Investment-Itzhak Harpaz
2014-07-17

The book deals with the concept of Heavy Work Investment (HWI) recently initiated by Snir and Harpaz. Since its introduction the period of early modern history. Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life, both of our planet and on our planet, which may only be understood through the application of multiple logics. There is no substitute for the knowledge of literature: it is the knowledge of life, from life. This English translation will be of great interest to English-speaking scholars in the fields of Global and Area Studies, Literary Studies, Cultural Studies, History, Political Science, and many more. About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam, Germany, since 1995. He is Honorary Member of the Modern Language Association of America (MLA) (elected in 2014), member of the Berlin-Brandenburg Academy of Sciences and Humanities (elected in 2013), and regular member of the Academia Europaea (since 2010).

Ottmar Ette's TransArea proceeds from the thesis that globalization is not a recent phenomenon, but rather, a process of long duration that may be divided into four main phases of accelerated globalization. These phases connect our present, across the world's widely divergent modern eras, to the period of early modern history. Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life, both of our planet and on our planet, which may only be understood through the application of multiple logics. There is no substitute for the knowledge of literature: it is the knowledge of life, from life. This English translation will be of great interest to English-speaking scholars in the fields of Global and Area Studies, Literary Studies, Cultural Studies, History, Political Science, and many more. About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam, Germany, since 1995. He is Honorary Member of the Modern Language Association of America (MLA) (elected in 2014), member of the Berlin-Brandenburg Academy of Sciences and Humanities (elected in 2013), and regular member of the Academia Europaea (since 2010).

Plural Masculinities-Sofia Aboim 2016-04-22

Plural Masculinities offers a contemporary portrait of the plural dynamics and forms of masculinity, emphasizing the multiple, even contradictory, pathways through which men are remaking their identities. Proceeding from the premise that it is impossible to fully understand masculinity without considering its connection with family change and women's change, it places men and masculinities within the realm of family life, examining men's practices and discourses in their relationships with women and their changing femininities. Combining an empirical study based in Portugal with cross-national analyses of attitudes towards ideal gender arrangements in Europe and the USA, this book examines the various ways in which men come to define their identities and will appeal to those working in the fields of masculinities, gender studies and the sociology of the family.

Duck Notebook-DuckForYou Book 2019-12-29

This newly revised and updated Fourth Edition continues to focus on speech therapy, addressing concerns that aid in the rehabilitation and recovery of aphasia patients. Topics include: assessment of language and communication, principles of language intervention, restorative approaches to language intervention, cognitive neuropsychological approach implications, functional intervention, and treatment for each syndrome. Other approaches and therapy for associated neuropathologies of speech and language related functions are also discussed. For more information, visit http://connection.LWW.com/go/chapey.

Heavy Work Investment-Itzhak Harpaz 2014-07-17

The book deals with the concept of Heavy Work Investment (HWI) recently initiated by Snir and Harpaz. Since its introduction the interest in the general HWI model has increased considerably. The book illustrates the development of HWI conceptualization, theory, and research. It deals with the foremost HWI subtype of workaholism. However, it also compares workaholism as a "negative" HWI subtype with work devotion/passion/engagement, as a "positive" HWI subtype. Most importantly, it addresses HWI in general, including its possible situational subtypes. In view of Snir and Harpaz's claim that the study of situational heavy work investors is relatively scarce, this certainly constitutes a promising step in the right direction. Finally, it deals with timely and important topics examined by prominent international researchers on Heavy Work Investment and such issues as: personality factors of workaholism, work-life balance, cross-cultural similarities and differences in HWI, work addiction and technology, HWI and retirement, and intergenerational similarity in work investment.

2011-06-09 Life in the World's Oceans: Diversity, Abundance and Distribution is a true landmark publication. Comprising the synthesis and analysis of the results of the Census of Marine Life this most important book brings together the work of around 2000 scientists from 80 nations around the globe. The book is broadly divided into four sections, covering oceans past, oceans present, oceans future and a final section covering the utilisation of the data which has been gathered, and the coordination and communication of the results. Edited by Professor Alasdair McIntyre, Marine Life is a book which should find a place on the shelves of all marine scientists, ecologists, conservation biologists, oceanographers, fisheries scientists and environmental biologists. All universities and research establishments where biological, earth and fisheries science are studied and taught should have copies of this essential book on their shelves. A true landmark publication One of the most important marine science books ever published Contributions from many world leading researchers Synthesis of a huge amount of important data Represents the culmination of 10 years' research by 2000 scientists from 80 countries
