TABLE OF CONTENTS: Translator's Introduction
Introduction by Genevieve Rodis-Lewis The
Because the motivations of the soul drive behavior, discipleship resulting in deep transformation must address the passions of the soul with the Gospel.

The Passions of Christ's Soul in the Theology of St. Thomas Aquinas—Paul Gondreau 2002 St. Thomas Aquinas' theology of Christ's human passions comes at the height of a medieval debate centering on the reality and extent of Christ's experience of affective suffering. Weighing in on the debate, Aquinas forges a defense of Christ's full humanity that stretches far beyond the inquiry into Christ's passions and seeks to uphold the realism of the dogma of the Incarnation. St. Thomas' doctrine of Christ's human affectivity owes much to patristic and medieval thought. Yet no less does it charter a course in Christology that stands out for its originality and depth of analysis.

10 Passions of a Man's Soul—Mark Elfstrand 2008-09-01 Morning show host of Moody Radio Network's flagship station in Chicago, Mark Elfstrand uses interviews with ten dynamic, powerfully gifted leaders to explore the driving passions that motivate authentic men of God. Exploring topics such as power, adventure, purpose, pleasure, and wealth, this transparent
disclosure of men's innermost feelings brings up thought-provoking questions and surprising revelations about contemporary leaders and historical figures. Readers will discover the hidden leader waiting to emerge from within themselves.

The Cambridge Descartes Lexicon-Lawrence Nolan 2015-01-01 The Cambridge Descartes Lexicon is the definitive reference source on René Descartes, 'the father of modern philosophy' and arguably among the most important philosophers of all time. Examining the full range of Descartes' achievements and legacy, it includes 256 in-depth entries that explain key concepts relating to his thought. Cumulatively they uncover interpretative disputes, trace his influences, and explain how his work was received by critics and developed by followers. There are entries on topics such as certainty, cogito ergo sum, doubt, dualism, free will, God, geometry, happiness, human being, knowledge, Meditations on First Philosophy, mind, passion, physics, and virtue, which are written by the largest and most distinguished team of Cartesian scholars ever assembled for a collaborative research project - 92 contributors from ten countries.

The Passions of the Soul in the Metamorphosis of Becoming-Anna-Teresa Tymieniecka 2013-03-09 This volume is relevant to Islamicists, phenomenologists, comparatists, metaphysicians, philosophers of religion, and historians of ideas. This book is the first volume in a new and unique book series: Islamic Philosophy and Occidental Phenomenology in Dialogue. The main aim of this series is to engage in a philosophical exploration, bringing back to the philosophical arena key philosophical issues presently forgotten.

On the Passions and the Errors of the Soul-Claudius Galenus 1963

From Passions to Emotions-Thomas Dixon 2003-06-05 Today there is a thriving 'emotions industry' to which philosophers, psychologists
and neuroscientists are contributing. Yet until two centuries ago 'the emotions' did not exist. In this path-breaking study Thomas Dixon shows how, during the nineteenth century, the emotions came into being as a distinct psychological category, replacing existing categories such as appetites, passions, sentiments and affections. By examining medieval and eighteenth-century theological psychologies and placing Charles Darwin and William James within a broader and more complex nineteenth-century setting, Thomas Dixon argues that this domination by one single descriptive category is not healthy. Overinclusivity of 'the emotions' hampers attempts to argue with any subtlety about the enormous range of mental states and stances of which humans are capable. This book is an important contribution to the debate about emotion and rationality which has preoccupied western thinkers throughout the eighteenth and nineteenth centuries and has implications for contemporary debates.

The Passions of the Mind in General-Thomas Wright 1986

Geometry of the Passions-Remo Bodei 2018-08-08 The passions have long been condemned as a creator of disturbance and purveyor of the temporary loss of reason, but as Remo Bodei argues in Geometry of the Passions, we must abandon the perception that order and disorder are in a constant state of collision. By means of a theoretical and historical analysis, Bodei interprets the relationship between passion and reason as a conflict between two complementary logics. Geometry of the Passions investigates the paradoxical conflict-collaboration between passions and reason, and between individual and political projects. Tracing the roles passion and reason have played throughout history, including in the political agendas of Descartes, Hobbes, and the French Jacobins, Geometry of the Passions reveals how passion and reason may be used as a vehicle for affirmation rather than self-enslavement.

Passion of the Western Mind-Richard Tarnas 2011-10-19 "[This] magnificent critical survey, with its inherent respect for both the 'Westt's mainstream high culture' and the 'radically
changing world' of the 1990s, offers a new breakthrough for lay and scholarly readers alike....Allows readers to grasp the big picture of Western culture for the first time." SAN FRANCISCO CHRONICLE Here are the great minds of Western civilization and their pivotal ideas, from Plato to Hegel, from Augustine to Nietzsche, from Copernicus to Freud. Richard Tarnas performs the near-miracle of describing profound philosophical concepts simply but without simplifying them. Ten years in the making and already hailed as a classic, THE PASSION OF THE WESTERN MIND is truly a complete liberal education in a single volume. From the Trade Paperback edition.

The Elemental Passions of the Soul Poetics of the Elements in the Human Condition:-Anna-Teresa Tymieniecka 2012-12-06
Platonism and Christian Thought in Late Antiquity-Panagiotis G. Pavlos 2019-06-27
Platonism and Christian Thought in Late Antiquity examines the various ways in which Christian intellectuals engaged with Platonism both as a pagan competitor and as a source of philosophical material useful to the Christian faith. The chapters are united in their goal to explore transformations that took place in the reception and interaction process between Platonism and Christianity in this period. The contributions in this volume explore the reception of Platonic material in Christian thought, showing that the transmission of cultural content is always mediated, and ought to be studied as a transformative process by way of selection and interpretation. Some chapters also deal with various aspects of the wider discussion on how Platonic, and Hellenic, philosophy and early Christian thought related to each other, examining the differences and common ground between these traditions. Platonism and Christian Thought in Late Antiquity offers an insightful and broad ranging study on the subject, which will be of interest to students of both philosophy and theology in the Late Antique period, as well as anyone working on the reception and history of Platonic thought, and the development of Christian thought.

Rhetoric and Medicine in Early Modern Europe-
Through close analysis of texts, cultural and civic communities, and intellectual history, the papers in this collection, for the first time, propose a dynamic relationship between rhetoric and medicine as discourses and disciplines of cure in early modern Europe. Although the range of theoretical approaches and methodologies represented here is diverse, the essays collectively explore the theories and practices, innovations and interventions, that underwrite the shared concerns of medicine, moral philosophy, and rhetoric: care and consolation, reading, policy, and rectitude, signification, selfhood, and autonomy—all developed and refined at the intersection of areas of inquiry usually thought distinct. From Italy to England, from the sixteenth through to the mid-eighteenth century, early modern moral philosophers and essayists, rhetoricians and physicians investigated the passions and persuasion, vulnerability and volubility, theoretical intervention and practical therapy in the dramas, narratives, and disciplines of public and private cure. The essays are relevant to a wide range of readers, including cultural, literary, and intellectual historians, historians of medicine and philosophy, and scholars of rhetoric.

Dwight Lyman Moody was the greatest evangelist of the 19th century. In the pre-television era, he traveled more than one million miles to preach the gospel to more than 100 million people. Although equipped with just four years of formal schooling, Moody launched ministries in education and publishing that remain vital and fruitful today. Moody had a passion for souls. Yet with all of his accomplishments for God, D. L. Moody remained a humble man. His greatest riches were found in the love of his Lord and the souls that had been changed for the glory of God. In these pages, today's believers will find a model of biblical passion, vision, and commitment. Lyle Dorsett reveals the heart of this great evangelist, recounting his life and realistically probing his strengths, weaknesses, virtues, faults, triumphs, struggles and motivations to find a man after
God's own heart. The Deluxe Leather Collector's Edition is perfect for people any age. Passion and Action-Susan James 1999 Passion and Action explores the place of the emotions in seventeenth-century understandings of the body and mind, and the role they were held to play in reasoning and action. Interest in the passions pervaded all areas of philosophical enquiry, and was central to the theories of many major figures, including Hobbes, Descartes, Malebranche, Spinoza, Pascal, and Locke. Yet little attention has been paid to this topic in studies of early modern thought. Susan James surveys the inheritance of ancient and medieval doctrines about the passions, then shows how these were incorporated into new philosophical theories in the course of the seventeenth century. She examines the relation of the emotions to will, knowledge, understanding, desire, and power, offering fresh analyses and interpretations of a broad range of texts by little-known writers as well as canonical figures, and establishing that a full understanding of these authors must take account of their discussions of our affective life. Passion and Action also addresses current debates, particularly those within feminist philosophy, about the embodied character of thinking and the relation between emotion and knowledge. This ground-breaking study throws new light upon the shaping of our ideas about the mind, and provides a historical context for burgeoning contemporary investigations of the emotions. The Passions-P. M. S. Hacker 2017-12-18 A survey of astonishing breadth and penetration. No cognitive neuroscientist should ever conduct an experiment in the domain of the emotions without reading this book, twice. Parashkev Nachev, Institute of Neurology, UCL There is not a slack moment in the whole of this impressive work. With his remarkable facility for making fine distinctions, and his commitment to lucidity, Peter Hacker has subtly characterized those emotions such as pride, shame, envy, jealousy, love or sympathy which make up our all too human nature. This is an important book for philosophers but since most of its illustrative material comes from an astonishing range of
British and European literature, it is required reading also for literary scholars, or indeed for anyone with an interest in understanding who and what we are. David Ellis, University of Kent

Human beings are all subject to boundless flights of joy and delight, to flashes of anger and fear, to pangs of sadness and grief. We express our emotions in what we do, how we act, and what we say, and we can share our emotions with others and respond sympathetically to their feelings. Emotions are an intrinsic part of the human condition, and any study of human nature must investigate them. In this third volume of a major study in philosophical anthropology which has spanned nearly a decade, one of the most preeminent living philosophers examines and reflects upon the nature of the emotions, advancing the view that novelists, playwrights, and poets – rather than psychologists and cognitive neuroscientists – elaborate the most refined descriptions of their role in human life. In the book’s early chapters, the author analyses the emotions by situating them in relation to other human passions such as affections, appetites, attitudes, and agitations. While presenting a detailed connective analysis of the emotions, Hacker challenges traditional ideas about them and criticizes misconceptions held by philosophers, psychologists, and cognitive neuroscientists. With the help of abundant examples and illustrative quotations from the Western literary canon, later sections investigate, describe, and disentangle the individual emotions – pride, arrogance, and humility; shame, embarrassment, and guilt; envy and jealousy; and anger. The book concludes with an analysis of love, sympathy, and empathy as sources of absolute value and the roots of morality. A masterful contribution, this study of the passions is essential reading for philosophers of mind, psychologists, cognitive neuroscientists, students of Western literature, and general readers interested in understanding the nature of the emotions and their place in our lives.

Discovering Your Soul Signature-Panache Desai

2014-04-29 An invitation to change the energy that surrounds you, find the harmony that comes with self-acceptance, and, in the process,
discover your life’s purpose and the boundless possibilities that await you. Your soul signature is your spiritual DNA—it is who you are at your core, the most authentic part of you, your singular contribution to this world. And yet we reject our authentic selves. We allow our soul signature to become blocked by any number of emotional obstacles that life throws in our path: anger, fear, guilt, shame, sadness, despair. Any or all of these feelings overtake us and create a density, a heaviness that doesn’t permit us to embrace who we truly are, deep inside. We are energetic beings, Panache Desai reminds us, and emotions are energy in motion. When we are blocked we feel unworthy, less than, unloved, incomplete. In Discovering Your Soul Signature, Panache invites us on a 33-day path of meditations—short passages to be read at morning, noon, and night that are designed to dismantle the emotional burden that holds us back and open us up to changing our lives. Through this distilled, poetic, practical, and inspiring course, he invites us to live a life of authenticity, to rediscover purpose and passion, and to believe from our soul in the possibility of all things.

Galen on the Passions and Errors of the Soul—Galenus 1963

Principles of Philosophy—Reuven Agushevits 2008

"Principles of Philosophy is an attempt, by a self-taught genius, to persuade the Yiddish speaking public that philosophy has not lost its central importance vis a vis both religion and science. He does this, first, by identifying religion with philosophy - and he is the first Orthodox rabbi since Maimonides to do so. Next, he argues that philosophical principles, which are broader than those of science, are at the basis of all existence, and that the same principles that account for the organization of matter can account for the varieties of human organization (and disorganization). He argues, finally, that the study of philosophy itself can lead to the weakening of egotism and the strengthening of altruism."—BOOK JACKET.

The Enneagram of Passions and Virtues—Sandra Maitri 2005

How the mysterious nine-pointed symbol of the enneagram illuminates the worst
pitfalls and highest virtues of our psyches. The Enneagram of Passions and Virtues elucidates human experience beyond the personality structure. In the tradition of the enneagram, the Virtues are said to be the affective atmosphere that replaces the compulsive and reactive emotional patterns-called the Passions-as one becomes freer of the ego. Sandra Maitri shows how the shift in our consciousness, or soul, from being informed by the Passions to being informed by the Virtues, is one of the hallmarks of inner development. In this book, Maitri explores how our awareness of the Passions, in turn, leads to the manifestation of the Virtues. This shift supports growth on the level of personality as well as on the level of what is beyond-Being, or True Nature. Maitri is widely known as one of the most literate and in-depth writers and teachers on the uses of the enneagram as a tool of inner development. In this book she provides what can be for some an entry into inner work, and for others, who have been engaged in the journey for a longer time, a uniquely incisive explication of concepts they may have missed.

The Passions of Law-Susan Bandes 2001-05-01
The Passions of Law is the first anthology to treat the role that emotions play, don't play, and ought to play in the practice and conception of law and justice. Lying at the intersection of law, psychology, and philosophy, this emergent field of law scholarship raises some of the most profound and interesting questions at the heart of jurisprudence. For example, what role do emotions ranging from disgust to compassion play in the decision-making processes of judges, lawyers, juries, and clients? What emotions belong in which legal contexts? Is there a hierarchy of emotions, and, if so, through what sources do we identify it? To what extent are emotions subject to change or tutelage? How can we evaluate the role of emotion in such disparate contexts as death sentencing, laws about same sex marriage, hate crime legislation, punitive damages or shaming penalties? Consisting of original essays by leading scholars of law, theology, political science, and philosophy, The Passions of Law contributes to ongoing efforts to humanize law and reveals how this previously
unacknowledged aspect of decision-making exerts a much greater impact on justice and the practice of law than most tend, or like, to think. Learn more about Susan Bandes Passions and Subjectivity in Early Modern Culture-Dr Freya Sierhuis 2013-12-28 Bringing together scholars from literature and the history of ideas, Passions and Subjectivity in Early Modern Culture explores new ways of negotiating the boundaries between cognitive and bodily models of emotion, and between different versions of the will as active or passive. In the process, it juxtaposes the historical formation of such ideas with contemporary philosophical debates. It frames a dialogue between rhetoric and medicine, politics and religion, in order to examine the relationship between mind and body and between experience and the senses. Some chapters discuss literature, in studies of Shakespeare, Donne, and Milton; other essays concentrate on philosophical arguments, both Aristotelian and Galenic models from antiquity, and new mechanistic formations in Descartes, Hobbes and Spinoza. A powerful sense of paradox emerges in treatments of the passions in the early modern period, also reflected in new literary and philosophical forms in which inwardness was displayed, analysed and studied—the autobiography, the essay, the soliloquy—genres which rewrite the formation of subjectivity. At the same time, the frame of reference moves outwards, from the world of interior states to encounter the passions on a public stage, thus reconnecting literary study with the history of political thought. In between the abstract theory of political ideas and the inward selves of literary history, lies a field of intersections waiting to be explored. The passions, like human nature itself, are infinitely variable, and provoke both literary experimentation and philosophical imagination. Passions and Subjectivity in Early Modern Culture thus makes new connections between embodiment, selfhood and the emotions in order to suggest both new models of the self and new models for interdisciplinary history. The Passion for Souls-John Henry Jowett 2018-02-14 This work has been selected by
The Passions in Roman Thought and Literature—Susanna Morton Braund 1997-08-07
Understanding the emotions or 'passions' in key literary and intellectual Latin writings.

Thomas Aquinas on the Passions—Robert Miner 2009-04-09
Provides an understanding of Thomas Aquinas' account of the passions, the elemental forces that affect human happiness.

The Expression of the Passions—Jennifer Montagu 1994
In 1688, Charles Le Brun delivered a lecture on expression that was extremely popular. This book reconstructs and translates the text of the lecture, explores the context in which it was conceived, delivered, received, and finally rejected, and reproduces the images that accompanied the lecture.

Passions and Persuasion in Aristotle's Rhetoric—Jamie Dow 2015
Jamie Dow presents an original treatment of Aristotle's views on rhetoric and the passions, and the first major study of Aristotle's 'Rhetoric' in recent years. He attributes to Aristotle a normative view of rhetoric and its role in the state, and ascribes to him a particular view of the kinds of cognitions involved in the passions.
The Principles of Philosophy—Rene Descartes  
2019-08-14 The present volume contains a reprint of the preface and the first part of the Principles of Philosophy, together with selections from the second, third and fourth parts of that work, corresponding to the extracts in the French edition of Gamier, are also given, as well as an appendix containing part of Descartes' reply to the Second Objections (viz., his formal demonstrations of the existence of Deity). The translation is based on the original Latin edition of the Principles, published in 1644. The work had been translated into French during Descartes' lifetime, and personally revised and corrected by him, the French text is evidently deserving of the same consideration as the Latin originals, and consequently, the additions and variations of the French version have also been given—the additions being put in square brackets in the text and the variations in the footnotes. 

Law and the Passions—Julia Shaw 2019 Although the connection of law, passion and emotion has become an established focus in legal scholarship, the extent to which emotion has always been, and continues to be, a significant influence in informing legal reasoning, decision-making, decision-avoidance and legal judgment—rather than an adjunct—is still a matter for critical analysis. Engaging with the underlying social context in which emotional states are a motivational force—and have produced key legal principles and controversial judgments, as evidenced in a range of illustrative legal cases—Law and the Passions: A Discrete History provides a uniquely inclusive commentary on the significance and influence of emotions in the history and continuing development of legal institutions and legal dogma. Law, it is argued, is a passion; and, as such, it is a primarily emotional endeavour. 

Descartes' Deontological Turn—Noa Naaman-Zauderer 2010-11-04 This book offers a way of approaching the place of the will in Descartes' mature epistemology and ethics. Departing from the widely accepted view, Noa Naaman-Zauderer suggests that Descartes regards the will, rather than the intellect, as the most significant mark of human rationality, both intellectual and practical.
Through a close reading of Cartesian texts from the Meditations onward, she brings to light a deontological and non-consequentialist dimension of Descartes’ later thinking, which credits the proper use of free will with a constitutive, evaluative role. She shows that the right use of free will, to which Descartes assigns obligatory force, constitutes for him an end in its own right rather than merely a means for attaining any other end, however valuable. Her important study has significant implications for the unity of Descartes’ thinking, and for the issue of responsibility, inviting scholars to reassess Descartes’ philosophical legacy.

Aquinas on Emotion’s Participation in Reason-
Nicholas Kahm 2019

The Passion Paradox-Brad Stulberg 2019-03-19

The coauthors of the bestselling Peak Performance dive into the fascinating science behind passion, showing how it can lead to a rich and meaningful life while also illuminating the ways in which it is a double-edged sword. Here’s how to cultivate a passion that will take you to great heights—while minimizing the risk of an equally great fall. Common advice is to find and follow your passion. A life of passion is a good life, or so we are told. But it's not that simple. Rarely is passion something that you just stumble upon, and the same drive that fuels breakthroughs—whether they're athletic, scientific, entrepreneurial, or artistic—can be every bit as destructive as it is productive. Yes, passion can be a wonderful gift, but only if you know how to channel it. If you're not careful, passion can become an awful curse, leading to endless seeking, suffering, and burnout. Brad Stulberg and Steve Magness once again team up, this time to demystify passion, showing readers how they can find and cultivate their passion, sustainably harness its power, and avoid its dangers. They ultimately argue that passion and balance--that other virtue touted by our culture--are incompatible, and that to find your passion, you must lose balance. And that's not always a bad thing. They show readers how to develop the right kind of passion, the kind that lets you achieve great things without ruining your life. Swift, compact, and powerful, this thought-
provoking book combines captivating stories of extraordinarily passionate individuals with the latest science on the biological and psychological factors that give rise to—and every bit as important, sustain—passion.

Emotion and Cognitive Life in Medieval and Early Modern Philosophy—Martin Pickavé 2012-10-04
This volume explores emotion in medieval and early modern thought, and opens a contemporary debate on the way emotions figure in our cognitive lives. Thirteen original essays explore the key themes of emotion within the mind; the intentionality of emotions; emotions and action; and the role of emotion in self-understanding and social situations.

The Philosophical Writings of Descartes: Volume 1—René Descartes 1984
A completely new translation of the works of Descartes is intended to replace the Haldane and Ross edition, first published in 1911. All material from that edition is translated here, with a number of other texts crucial for understanding Cartesian philosophy.

The Therapy of Desire—Martha C. Nussbaum 2013-06-06
The Epicureans, Skeptics, and Stoics practiced philosophy not as a detached intellectual discipline but as a worldly art of grappling with issues of daily and urgent human significance. In this classic work, Martha Nussbaum maintains that these Hellenistic schools have been unjustly neglected in recent philosophic accounts of what the classical "tradition" has to offer. By examining texts of philosophers such as Epicurus, Lucretius, and Seneca, she recovers a valuable source for current moral and political thought and encourages us to reconsider philosophical argument as a technique through which to improve lives. Written for general readers and specialists, The Therapy of Desire addresses compelling issues ranging from the psychology of human passion through rhetoric to the role of philosophy in public and private life.

Awakening Your Creative Soul—Sandra Duran Wilson 2018-10-17
Open the door to your creative awakening! "Do everything with great love, whether it is painting, writing, dancing, relationships or learning." --Sandra Duran Wilson

Sharing your passion is the greatest gift you can
give, and the journey to your creative awakening starts with a single step--or a single exercise. You never know what will open the door. This book is for curious souls wanting to find the right spark to jump-start their creativity. Inside, there are 52 chapters with an exercise for each week of the year featuring a step-by-step art, writing or meditation project. Following the flow of the seasons, the exercises are designed to take you from the spring of your intuition, through the summer of personal growth, fall of self-discovery to arrive at the end of your creative cycle refreshed, revived and renewed. Find your voice and vision: • 52 fun and beautiful projects offer a new chance at self-discovery every week for one year--they are not necessarily sequential and can be completed at any time on your journey • Weekly prompts merge art making with universal life challenges to help you open your mind and explore different spiritual and creative philosophies Refill your well, become the light, expand yourself and your story.

The Passions Of The Soul Rene Descartes
